OUTSEER

Stop Fraud Not Customers®

About Outseer

At Outseer, we are empowering our customers to liberate the world from digital fraud by providing solutions that stop fraud, not customers. Our market-leading fraud and authentication platform is used by thousands of financial institutions around the world to protect millions of customer accounts and billions of transactions annually. Leveraging proven data science, including our proprietary consortium data, our customers use our risk-based, machine learning platform to deliver the highest fraud detection rates, lowest false positive rates, and lowest customer intervention in the industry.

The Outseer Platform

The **Outseer Platform** is a proven fraud prevention and customer authentication platform that enables our customers to protect both digital payments and digital banking sessions from login to transaction completion. Outseer customers benefit from streamlined fraud operations and lower fraud losses while maintaining an exceptional consumer experience.

The Outseer Platform is powered by the **Outseer Risk Engine™**. Built for precision detection, it utilizes the most effective models and data to detect and prevent fraudulent activity. Our predictive algorithms work in real-time, analyzing transaction data, our unique consortium data signals from the Outseer Global Data Network, and first-party and third-party signals.

The **Outseer Global Data Network** gathers daily signals from millions of transactions marked as fraudulent across thousands of the largest financial institutions worldwide. This data drives decisions that protect your customers while enabling them to interact and transact seamlessly.

Outseer Offerings

Outseer Fraud Manager™

Fraud prevention and customer authentication platform that utilizes machine learning algorithms to accurately assess the risk associated with each step of the digital journey.

The Outseer platform is a centralized fraud prevention tool that orchestrates many signals into a single risk score and initiates action according to a risk or business policy. Additionally, the platform provides out-of-the-box step-up authentication options, which can be directly invoked when a policy rule triggers the need for additional authentication.

Outseer 3-D Secure™

An EMV® 3-D Secure Access Control Server that delivers the secure, frictionless digital shopping experience your cardholders expect. With Outseer 3-D Secure you can grow your business through increased transaction approvals, reduced fraud, and reduced operational costs associated with investigation and failed authentications.

Outseer FraudAction™

Protects your customers and your brand with rapid detection and swift takedown service of external threats such as phishing, trojans, rogue mobile apps, and brand abuse.

Outseer Cyber Intelligence Service keeps you on top of emerging threats and delivers intelligence feeds of compromised data relevant to your business and customers.
