

CHROMA[®]

PAINTABLE ACOUSTICAL WALL & CEILING PANELS

Our Chroma finish panels are the perfect solution where a traditional fabric finish is not desired. The acoustically transparent, paintable finish blends well with finished drywall to create a space absent of echo and reverberation. Rather than a textured finish of fabric, Chroma panels provide for an understated, more discreet acoustic finish within a space.

Chroma finish by Memtech Acoustics is part of a Class A rated system tested per ASTM E-84. In standard Natural White or any standard paint color, Chroma finished panels provide absorption required to create an acoustically correct space.

FEATURES:

- Excellent acoustical performance
- Class A fire rated per ASTM E-84
- Type A mount (wall panels),
Type E-400 mount (ceiling tiles)
- Custom sizes and shapes

APPLICATIONS:

- Schools/universities
- Auditoriums
- Houses of worship
- Office spaces

CHROMA PAINTABLE WALL & CEILING PANELS
