# Let our actions speak for us!

We designed a **patchwork structure** for a tech-driven business that **maximized the efficiency of funds** raised during critical financing rounds — both token-based and equity-based.

For an experienced investor, we created a **structure that consolidated all SPVs and protected designated beneficiaries** — ensuring the highest standards of **privacy and security**.

We helped several of our KOLs/influencers choose **the most favorable jurisdiction for their business activities** and successfully **relocated their tax residency** accordingly.

For a fast-growing Web3 project, we **audited** both fiat and crypto transactions to address potential tax and AML risks — resulting in **smooth listings on leading CEXs across Europe, the US, and Asia**.

**Tell us** a bit  
about yourself  
— and we'll tell  
you **how we**  
**can help.**
