ESSENCE

At sea, where you should be

A note from the founder

It didn't take long to realise that something in the yachting industry needed to change.

For more than thirty years, my family's work within Elica Group has been rooted in industries where precision, accountability and consistency are requirements. This is where OMAVA began.

It would have been easier to remain observers. Instead, we chose to build, applying the same discipline we know, in a field where it is often missing, and approaching yachts not only as objects of desire, but as systems that must perform and endure over time.

Founded in 2020, OMAVA Yachts operates as a fully integrated shipyard, ensuring that what is designed is exactly what is delivered.

As we listened to owners, studied the market, one thing became clear: ambition is high, but execution does not always match it. For a product of this scale, we chose to do things differently.

Our focus on power catamarans reflects this thinking, prioritising stability, efficiency, space and real performance, where form follows purpose.

Each model is developed within a single system of thinking, where every element is considered for how it performs over time. This requires discipline, early decisions and investment in what is not immediately visible.

Because a yacht should not only perform, but be something you can rely on completely, allowing your attention to return to the experience.

We tailor each yacht with you, with a clear understanding of the responsibility that comes with it.

If, years from now, one thing remains, from your days spent with OMAVA I hope it is this: that your time was truly your own.

With appreciation,
Kaloyan Radulov
Founder, OMAVA Yachts

The Story of OMAYA

OMAYA was born from the idea that being ready is not a destination, but a process. You begin before everything is clear. You make choices, adjust, learn, and slowly grow into the life you are meant to live. At sea, this truth becomes even more evident. The water does not wait. The wind does not follow plans. And yet, within that uncertainty, something deeper takes shape.

What once felt chaotic becomes instinct. What once felt fragile becomes confidence. Storms teach you more than calm ever could, and over time, movement becomes natural. You stop rushing. You start listening. To the horizon, to the weather, to yourself.

OMAYA was created for people who recognise that rhythm. For those who no longer seek escape, but presence. For those who understand that true luxury is not excess, but space. Space to think, breathe and share time with the people who matter.

Life on board is not about going somewhere else. It is about being fully where you are. Days that do not feel measured, but lived. A sense of comfort that does not demand attention, because it simply belongs.

Every OMAVA is built around that idea. A floating sanctuary that holds both movement and stillness. A home that travels with you, shaped by your habits, your pace, and the way you choose to live.

Over time, the yacht becomes more than a structure. It becomes a witness to moments. To laughter, to silence, to journeys that are remembered not for where they went, but for how they felt.

This is what OMAVA stands for. Not a promise of perfection, but a way of living that feels right. A life where purpose leads, where comfort supports, and where each day belongs to you.

Your shell of comfort.

OMAYA's Philosophy

OMAYA Yachts was born from a vision to **redefine life at sea**, where design, purpose, and emotion meet in perfect balance. A new generation of yacht building, blending industrial precision with the soul of handcrafted creation.

At her core, OMACA represents freedom: not just sailing from one place to another, but how you live in between. A new standard for liveability at sea, where design, performance, and emotion coexist effortlessly. To own an OMACA is to embrace a different rhythm of life, one defined by space, silence, and the subtle luxury of feeling truly free.

Next-Gen Power Catamaran

OMACA is a **next-gen power catamaran** designed for real-life onboard living. She offers yachts that are spacious, versatile, and thoughtfully engineered, combining comfort, performance, and intelligent design. More than a product, OMACA provides an experience, **a shell of comfort**, where owners and guests can feel at home, enjoy freedom at sea, and embrace meaningful moments without compromise.

Designed for Living

OMACA exists to redefine what luxury means on a power catamaran. She was created for people who seek **authentic, liveable experiences** at sea. Where comfort, calm, and thoughtful design matter more than status. OMACA's purpose is to offer serenity, freedom, and trust, enabling owners and guests to feel at home, connect with the environment, and embrace meaningful moments aboard, every day.

Precision You Can Feel

OMACA delivers her promise through purposeful design, meticulous craftsmanship, and thoughtful experiences. **Every yacht is built in-house** at the OMACA Yachts' shipyard, ensuring quality, precision, and direct connection with owners.

Flexible layouts, climate-adapted interiors, and quiet, efficient systems make each vessel liveable anywhere in the world. Through these actions, OMACA turns her vision of comfort, serenity, and intelligent design into a real, everyday experience.

ESSENCE

Your Shell of Comfort

“Your Shell of Comfort” is the soul of OMAA expressed in words. Rooted in the same inspiration as OMAA Yachts’ totem, the rapana shell, it captures the essence of **protection, harmony, and quiet beauty.**

A shell is a home shaped by the sea, strong on the outside, serene within. It embodies the balance between movement and stillness, strength and grace. OMAA’s catamarans are built on the same principle: crafted to explore the vastness of the ocean, yet designed to make you feel completely at ease inside it.

The slogan speaks of comfort not as softness, but as belonging, a feeling of calm confidence that surrounds you like a natural shield. It’s a space where design, technology, and emotion meet. Where every curve and surface is made to protect, embrace, and restore balance. The use of “your” makes the promise personal. It’s not a distant statement, but an invitation. A reminder that every OMAA yacht is more than a vessel, but your own shell of comfort, shaped by the sea, crafted for the soul.

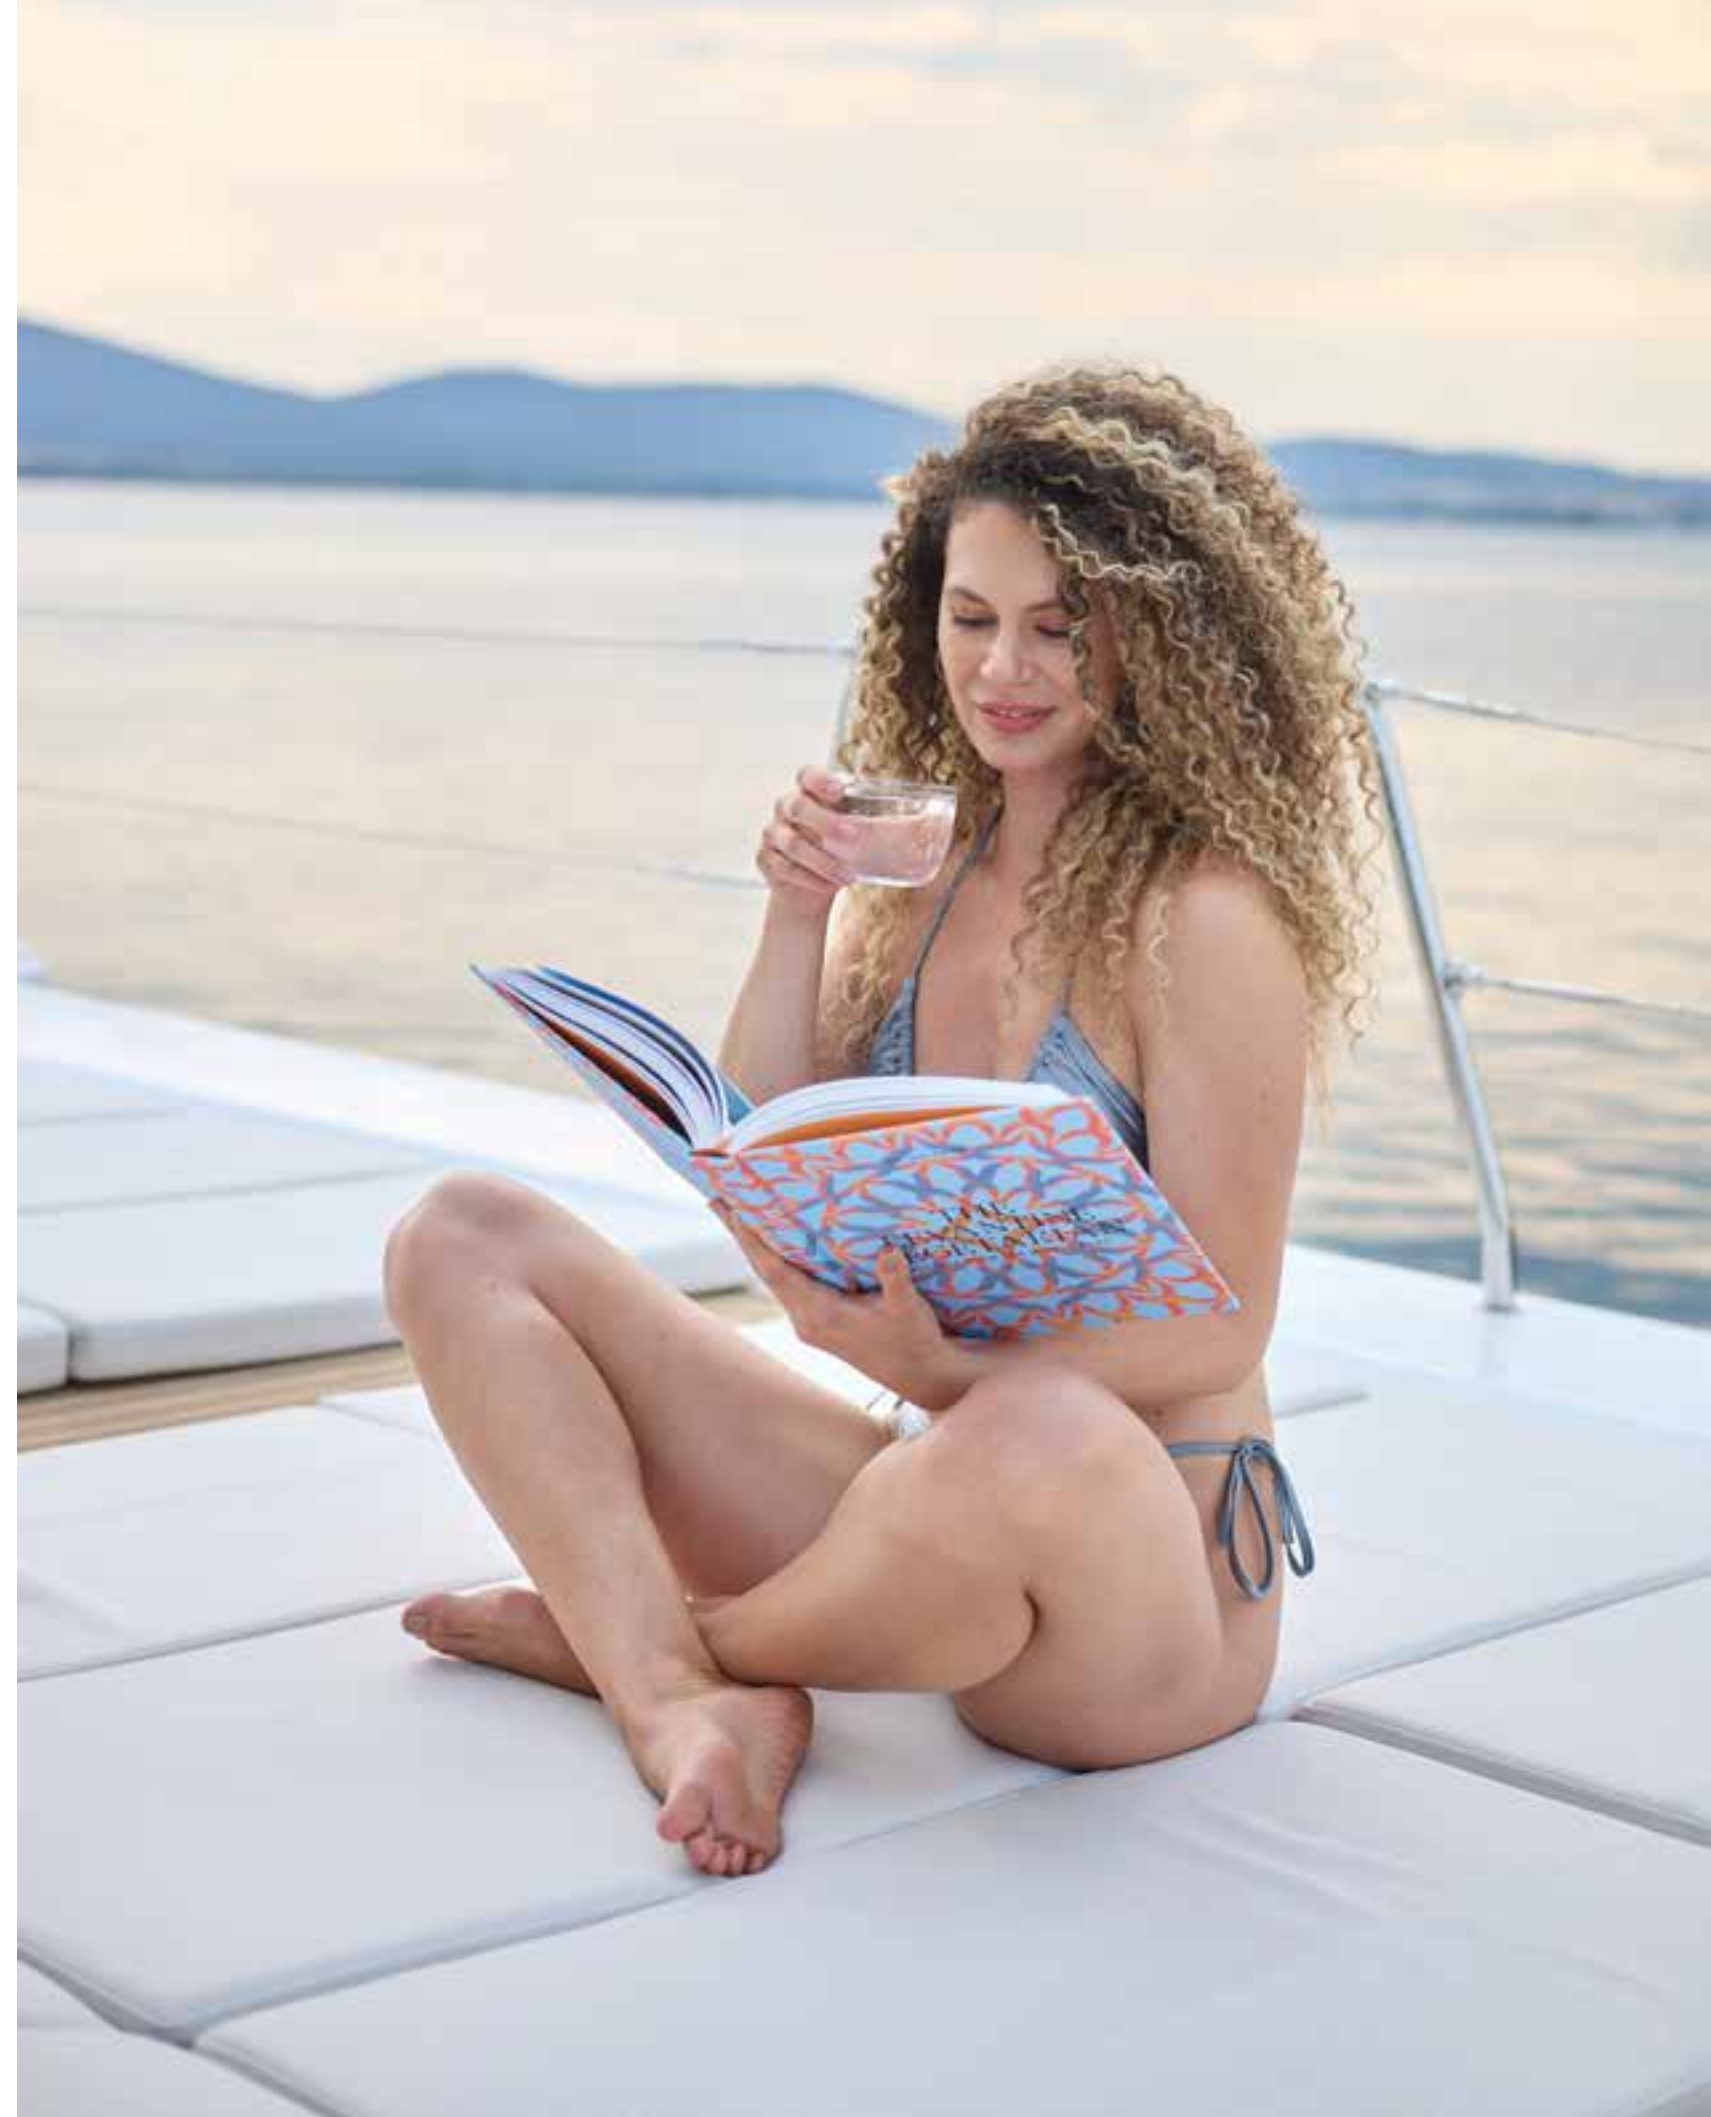

ESSENCE

Liveable

OMAYA's idea of liveability starts with how space feels and flows. Every inch is thoughtfully designed to serve both purpose and emotion. It's about balance: between openness and privacy, technology and calm, sophistication and ease.

A liveable yacht is one that adapts to the rhythms of real life at sea. Where mornings unfold effortlessly, and evenings invite stillness. It embodies OMAYA's belief that ***true luxury lies not in excess, but in harmony***, in spaces that let you breathe, move, and feel at home, wherever the water takes you.

In essence, livable captures OMAYA's promise: to craft yachts that are not just designed to impress, but designed to belong.

ESSENCE

OMAYA's symbol is inspired by the rapana, a seashell born from movement, time, and the quiet intelligence of the sea. Its spiral structure follows the golden ratio, a natural expression of harmony, balance, and infinite flow. Just like water, it evolves without haste, shaping itself with purpose and grace.

The rapana reflects the soul of OMA YA, ***elegant, calm, and instinctively connected to nature.*** Beneath its surface lies complexity and strength. The same duality that defines our catamarans. Each curve tells a story of precision and craft, of motion turned into form, of engineering made emotional.

In the symbol, the spiral becomes a wave, a horizon, a timeless shape that holds the essence of movement and serenity. It reminds us that true luxury is not loud, it's felt in the silence between two tides.

The logotype and the symbol together form OMA YA's visual identity, which is a seamless union of geometry and emotion, structure and freedom. A mark that stands still, yet carries the rhythm of the sea.

OMAYA
YACHTS

OMAYA YACHTS

Redefining Luxury at Sea

The world of yachting has long celebrated extravagance. OMAVA was created to celebrate something deeper. Space, calm, and the feeling of truly living on the water.

As a family-run builder with a fresh perspective, we saw the need to look beyond the noise and symbols of prestige. To design a power catamaran that feels human, liveable, and intuitively crafted for real life at sea.

The idea was simple:

What if a 50-foot catamaran could feel like ***a real home***, one you can sail, share, and stay in for weeks at a time?

That question shaped the philosophy of OMAVA.

Designed and built on the Danube, the OMAVA 50 is shaped by more than three decades of engineering and precision manufacturing expertise rooted in a family-owned industrial business.

OMAYA YACHTS

A New Category of Luxury

For us, true luxury means ***clarity of space and effortless comfort***. Every curve, every material choice, and every line of the OMaya 50 serves a purpose: to create harmony between form, function, and experience.

OMAYA 50 is designed to make you feel at ease, give you room to breathe, to think, to be.

We designed OMaya 50 to challenge outdated conventions in yacht design. Luxury doesn't need to shout. It can be quiet, purposeful, and deeply personal.

OMAYA 50
Reimagines
What a 50-Foot
Catamaran Can Be

Spacious Where It Matters Most

Thanks to the exceptional 8.4-metre beam, the saloon, cabins, and social areas feel expansive, bright, and open, offering more space than any yacht in its class.

Flexible in Layout

With configurations for private ownership or charter use, from a full-hull master suite to four-cabin arrangements with crew quarters.

Thoughtful Privacy

Cabins are positioned across both hulls, separated by structure and distance, ensuring privacy and a genuine sense of retreat.

Designed for Real Living

Generous storage, a full-size galley, dedicated dining spaces, and multiple indoor-outdoor lounges make extended onboard life effortless and natural.

Intelligent. Calm.
Human.

OMAYA is calm instead of crowded, intelligent instead of indulgent.
A yacht that doesn't just move through the water, it moves with your rhythm.

Presented to the world at the Cannes Yachting Festival, OMAVA 50 introduced a new voice in modern yachting: clear, confident, and focused on experience over excess.

A photograph of two men standing on the white, curved hull of a boat in a shipyard. The man on the left is younger, with a beard, wearing a white long-sleeved shirt and light-colored trousers. The man on the right is older, bald, wearing a white long-sleeved shirt and dark trousers. They are both looking towards the camera. The background shows the industrial structure of the shipyard.

OMAYA'S YARD

Photo by Minko Minev

OMAYA'S YARD

Family of Creators. Home of Yachts.

Behind OMAVA stands a place where engineering meets craft, and dedication shapes every detail. That place is OMAVA Yachts, part of the family-owned ELICA Group, a company with **more than 30 years of experience** in designing and manufacturing industrial equipment at the highest standards. Today, that expertise forms the foundation for a new chapter in yacht building.

Located on the banks of the Danube River, OMAVA Yachts spans 15,000 sqm of advanced production space, equipped to build power catamarans with precision, control, and agility. It is not a mass-production facility, but a carefully structured industrial ecosystem designed to deliver yachts with exceptional attention to detail.

OMAYA'S YARD

Boutique Craftsmanship

Every component of an OMAYA yacht is built under one roof, from hull fabrication and metalwork to interiors and finishing. This vertical integration allows full oversight of quality and scheduling, ensuring discipline and consistency throughout the build. It's a combination of modern technology and skilled craftsmanship, working side by side to achieve results that feel refined, balanced, and enduring.

The people behind the process are engineers, naval architects, and specialists who have chosen to build something meaningful together. A yacht created to live beautifully at sea, with long-term reliability at its core.

OMAYA'S YARD

Built Around You

The OMAVA 50 is shaped by how you want to live onboard. Long weekends with family, quiet mornings with coffee and a sunrise, dinners with friends on the flybridge, or a private retreat where you disconnect from everything except the sea. Every layout decision, every flow of space, every storage detail is ***designed to support your rhythm***, not force you to adapt to the yacht.

Before a single component is built, we begin by understanding how you move through your days: how you gather, relax, entertain, work, and escape into silence. From there, design and engineering teams translate those lifestyle preferences into real, intelligent spatial solutions that make life onboard effortless and natural.

OMAYA'S YARD

A Personal Way of Building

What our yacht owners appreciate most is not just the yacht itself, but the relationship behind it. At OMAVA Yachts, communication isn't passed through layers or intermediaries. Throughout your journey, you speak directly with our team, including the Commercial Director, the CEO and Co-founder. You are welcome on site to walk the yard. ***See your yacht take shape***, piece by piece and witness the craftsmanship up close.

The process becomes something you experience, not something hidden behind a curtain. For many owners, this is as rewarding as the day of delivery, a sense of connection, involvement, and pride in what is being built for them.

Transparent. Personal. Human. A shared journey from the first sketch to the first moment at sea.

OMAYA'S YARD

Connected to the World

The Danube provides a natural waterway connecting Central and Eastern Europe to the Black Sea and beyond, linking OMAVA Yachts directly to global maritime routes. From this point, your yacht can travel from the quiet currents of the river to the open horizons of the Mediterranean and, ultimately, anywhere in the world.

This access transforms logistics into an experience. Once an OMAVA yacht is launched, it begins its life already on the move, tested, refined, and delivered by water, just as it was meant to live.

For our international clients, this means unparalleled efficiency and reliability. Whether your destination is the Aegean, the Adriatic, or across the Atlantic, OMAVA Yachts' location ensures your yacht can be ***delivered swiftly and safely to any port in the world.***

From the first spark of design to the moment your yacht glides into open water, the journey begins here at the river's edge, where OMAVA Yachts connects its craft to the world.

Photo by Minko Minev

CANNES YACHTING FESTIVAL

CANNES YACHTING FESTIVAL

OMAYA 50's Official Debut on the World Stage

The OMAVA 50 made its official world debut at the Cannes Yachting Festival 2025. For six days in Vieux Port, visitors were welcomed on board to experience the space, balance, and atmosphere that define OMAVA 50's approach to modern power catamarans.

At Cannes, the OMAVA 50 ***stood out for its clarity of design and generous volume,*** shaped by the exceptional 8.4-metre beam, the fluid transition between indoor and outdoor spaces, and the calm, open feeling throughout the yacht.

Feedback from owners, brokers, and the press reinforced what we set out to achieve: a yacht designed for real onboard living, extended journeys, and comfort without excess.

CANNES YACHTING FESTIVAL

Catamaran Revelation 2025

At the World Yacht Trophies, OMAA 50 received the ***Catamaran Revelation of the Year 2025 award***. A recognition that celebrates technical excellence, as well as innovation that redefines the experience of life on water.

For OMAA Yachts, it validated a vision years in the making. A yacht can feel both intimate and spacious, elegant and practical,

crafted and contemporary. The recognition acknowledged OMAA Yachts' ability to merge industrial capability with boutique craftsmanship, which is a proof that precision engineering and emotion-driven design can exist in perfect harmony.

Cannes Yachting Festival 2025 was the beginning of OMAVA's story.
The debut and the award reflected a shift in how modern owners view luxury.

To live well at sea is to move with purpose, to enjoy beauty that serves function,
and to feel connected to nature, time and people.

OMAYA's success in Cannes reflected this belief. A yacht built with empathy and vision resonates across cultures, waters, and lifestyles.

From the docks of Cannes, a new chapter began: one where craftsmanship meets consciousness, and where luxury becomes an experience of presence.

SPACE &
LIVEABILITY

SPACE & LIVEABILITY

Life on Board Should Feel as Effortless as Life at Home

OMAYA 50 is designed around the way you actually live at sea with relaxed mornings, shared meals, quiet moments of privacy, and long days spent with the people who matter.

With an exceptional 8.4-metre beam and 156 sqm of liveable space, the yacht feels ***open, balanced, and easy to move through.*** Nothing is wasted, and everything has a purpose: to make time on board feel natural and unhurried.

Space That Brings People Together

The flybridge offers ***one of the most generous social areas in its class***, comfortably hosting large groups while maintaining an atmosphere of openness and calm. It feels more like an outdoor lounge than a traditional upper helm, a space where conversations unfold easily, every seat has a view, and gatherings stretch into the evening without anyone wanting to leave.

Below, the saloon provides a welcoming central space for dining and connection. Surrounded by panoramic windows, interior and exterior merge seamlessly, creating a sense of openness that makes even longer passages feel effortless.

The front cockpit is a vast, inviting area designed for the pure pleasure of doing nothing at all. A direct door from the saloon puts indoor and outdoor side by side. Across the full beam of the yacht stretches a set of spacious sunbeds, perfect for long, unhurried mornings, afternoon naps, or simply watching the horizon in silence. Open, social, and always connected to the sea.

True comfort is about balance. Room to cook properly, to rest deeply, to enjoy privacy when you want it, and to stay connected when you don't. The OMAYA 50 is designed for extended living, so staying onboard never feels like compromise. It feels like freedom.

Wake up to the sound of water. Stay longer than you planned.
Create routines, or escape them entirely. The OMAYA 50 isn't about how much space
you have, it's about how naturally that space allows you to live.

A photograph of a boat deck during the day. In the foreground, a wooden deck is set with a clear glass bottle of water, a glass of orange juice, a glass of water with a lemon slice, and a small white cup of coffee. A book with a colorful, abstract cover lies on a white cushion. In the background, the blue sea and a distant shoreline are visible under a clear sky.

DESIGN &
COMFORT

DESIGN & COMFORT

Design That Reflects Your Rhythm

From the outside, OMAVA 50 carries a confident, athletic silhouette with clean lines, balanced proportions, and a sleek profile that signals capability. Step inside, and the atmosphere shifts. Light softens, textures warm, and the pace of life changes. Spaces open gradually, inviting you to slow down, settle in, and stay longer than planned.

DESIGN & COMFORT

Shaped by You

What sets OMAVA apart is the freedom to make it your own.

The interior concept is fully configurable, from colour palette and materials to lighting and layout. Whether your vision leans toward rich tones and intimate ambience, or a bright, minimal environment inspired by the sea around you, the space adapts without losing its identity.

You are welcome to OMAVA Yachts' yard to explore materials in person, to compare finishes, and to shape details with the team behind the build. It's a hands-on process designed to ensure the yacht reflects how you want to live, not how someone else imagined you should.

And yet, no matter the combination, the essence remains the same: a yacht that never asks you to compromise. You don't have to trade space for aesthetics, or performance for peace. In OMAVA 50, design and comfort are reflections of the same idea: that elegance is effortless when it's made to fit you.

YEAR-
ROUND
LIVEABILITY

YEAR-ROUND LIVEABILITY

Comfort in Every Season

OMAYA 50 is designed for those who don't think about yachting in months or weather windows. Whether your journey takes you across Mediterranean summers, into quiet tropical anchorages, or along cooler northern coastlines, the yacht adapts to every environment, keeping comfort consistent wherever the journey leads.

Every detail of the OMAYA 50 is engineered for **year-round liveability**. Its structure features a PVC foam core that provides effective thermal and acoustic insulation, ensuring quiet interiors and stable temperatures in changing conditions.

In warmer climates, the advanced air conditioning system keeps every space cool. As temperatures drop, integrated heating and a fully protected indoor helm ensure the same freedom of movement and navigation.

Unlike catamarans designed around short summer seasons, OMAYA 50 is designed for **longevity and flexibility**. The rear cockpit extends the interior volume, allowing for a larger, better-insulated saloon that feels just as welcoming in November as it does in July. Outdoor openness and indoor protection exist in balance, letting the yacht adapt to the moment.

The result is an all-season experience and a yacht that belongs as much to the warmth of the tropics as to the stillness of the northern waters. Every voyage feels like home, every climate feels familiar.

SOCIAL ZONES

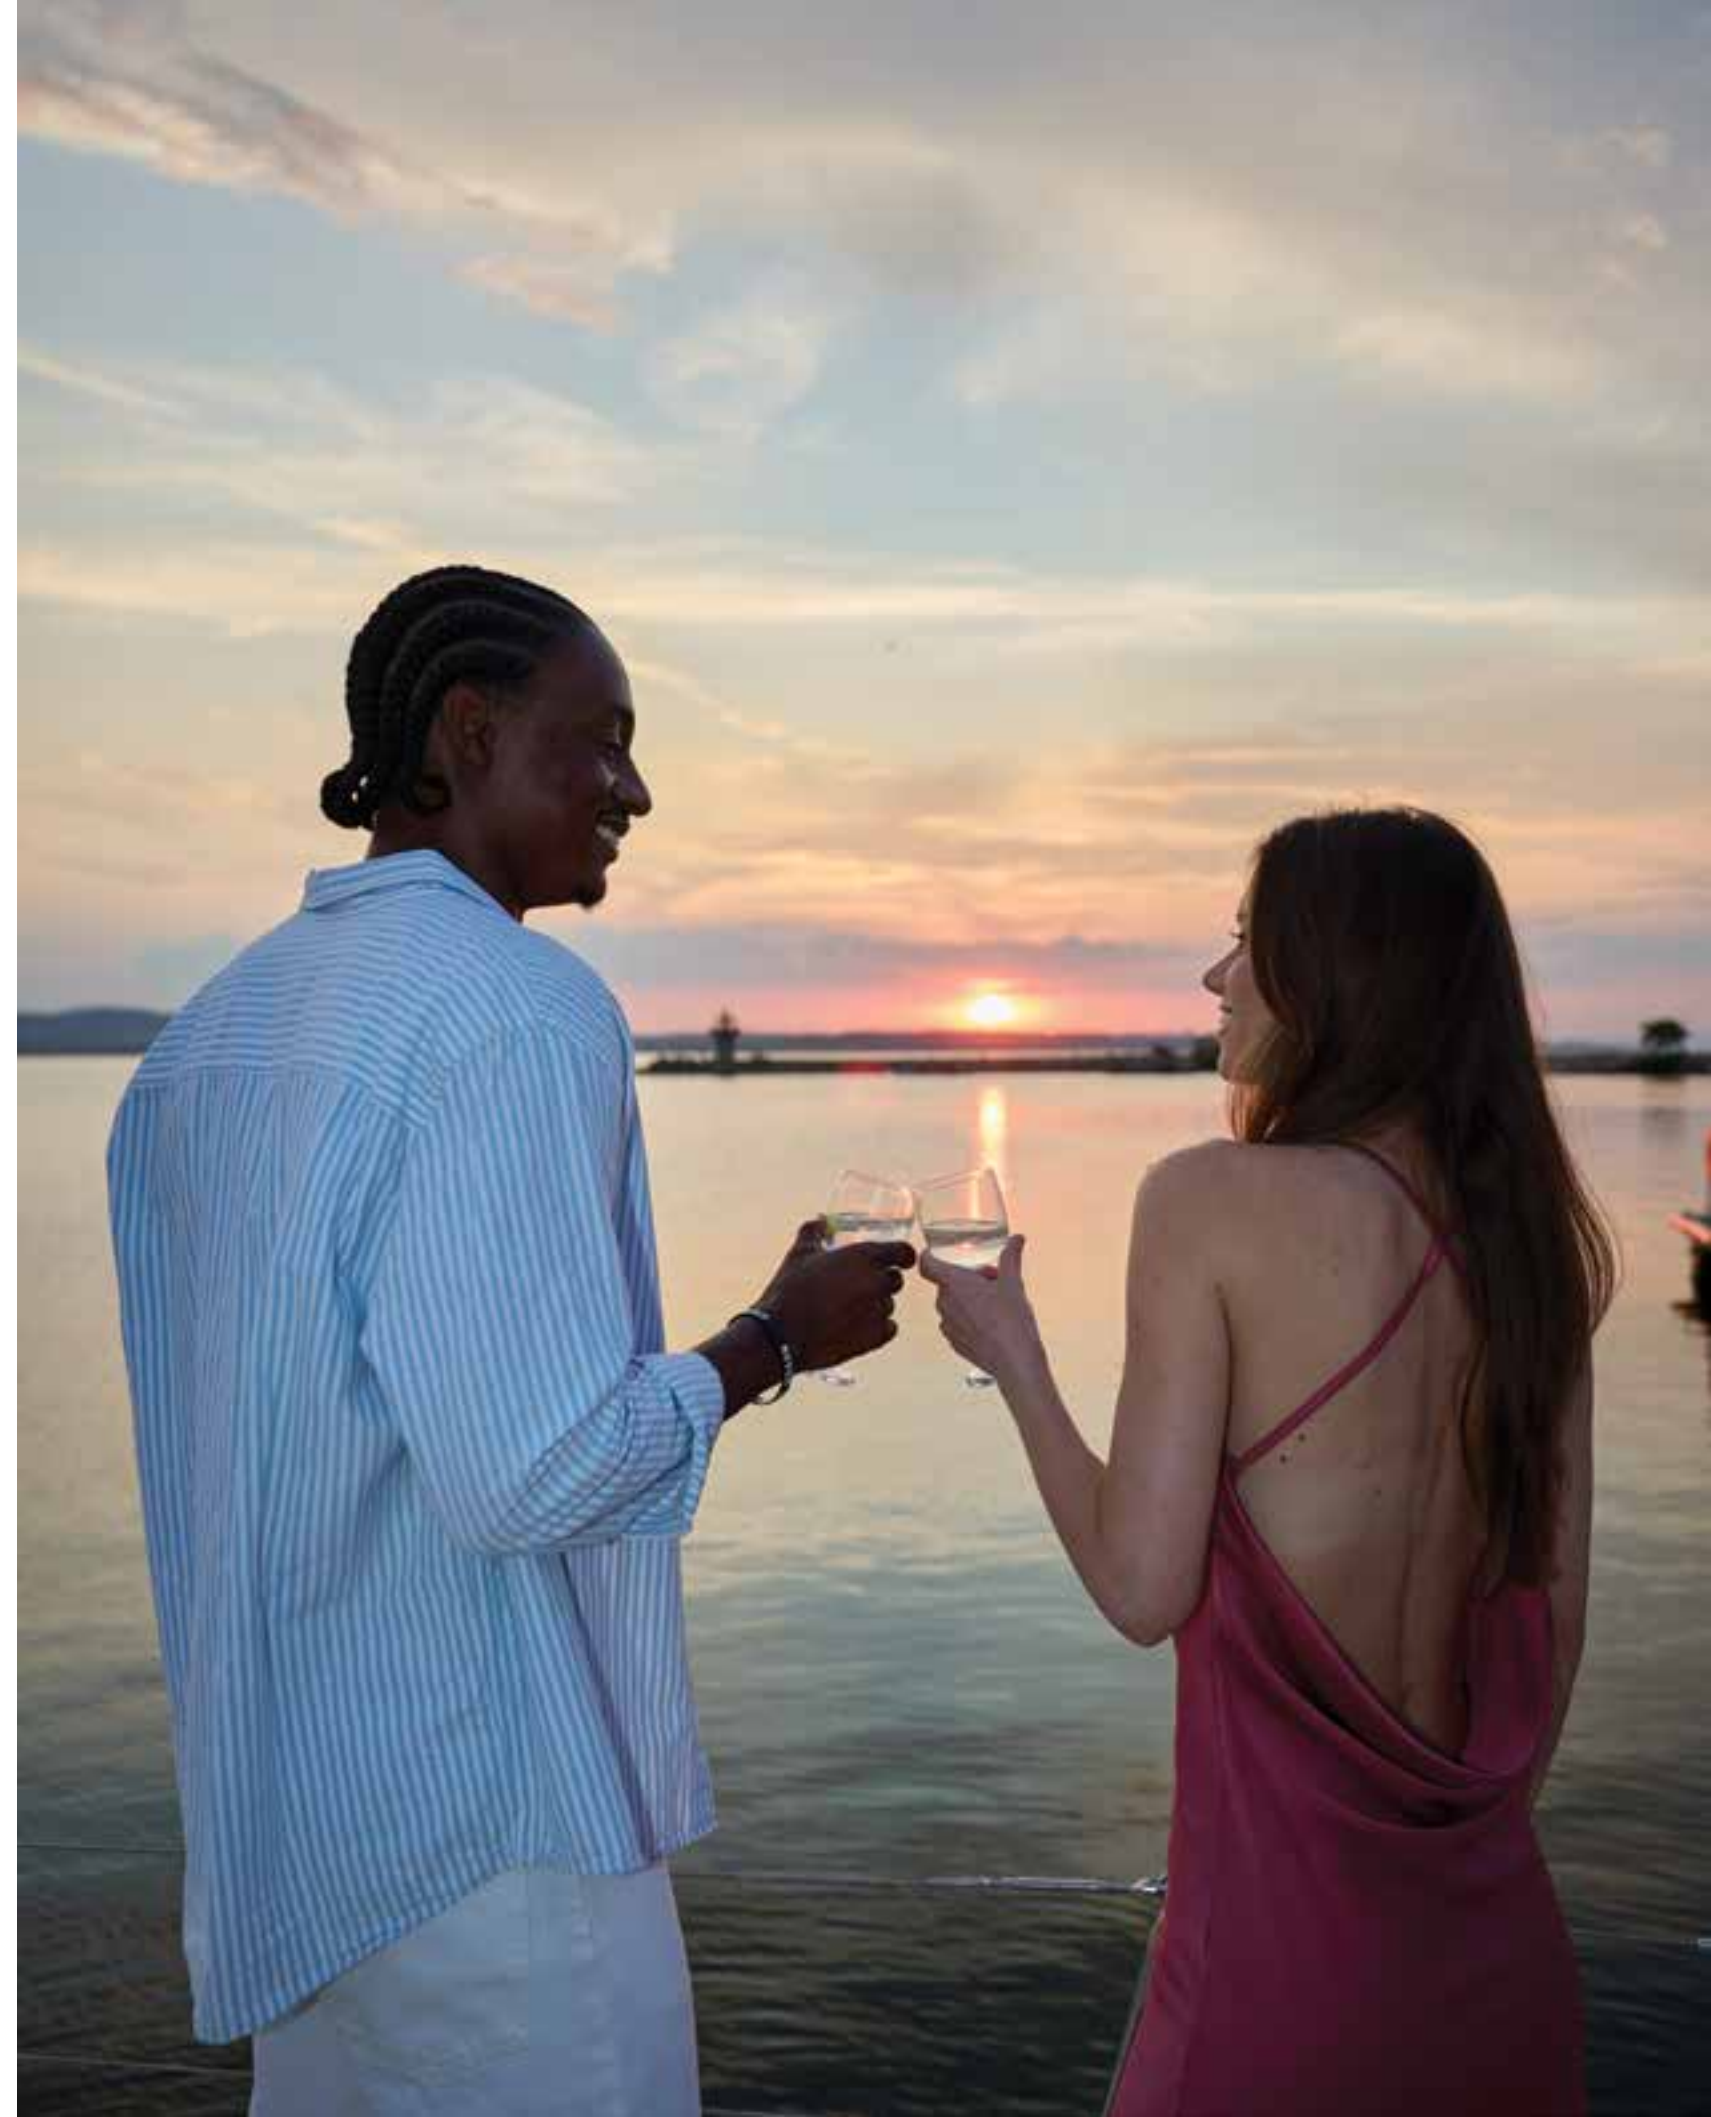

SOCIAL ZONES

Shared Moments, Personal Space

Life onboard the OMAVA 50 unfolds from quiet mornings on the front cockpit to long evenings in the aft cockpit. The yacht is shaped to **encourage connection, while preserving moments of privacy and retreat.**

Across four distinct social zones, the flybridge, aft cockpit, saloon, and front cockpit, the OMAVA 50 defines a new sense of liveable luxury at sea. Each space responds to your rhythm, your company, and the pace of your day.

SOCIAL ZONES

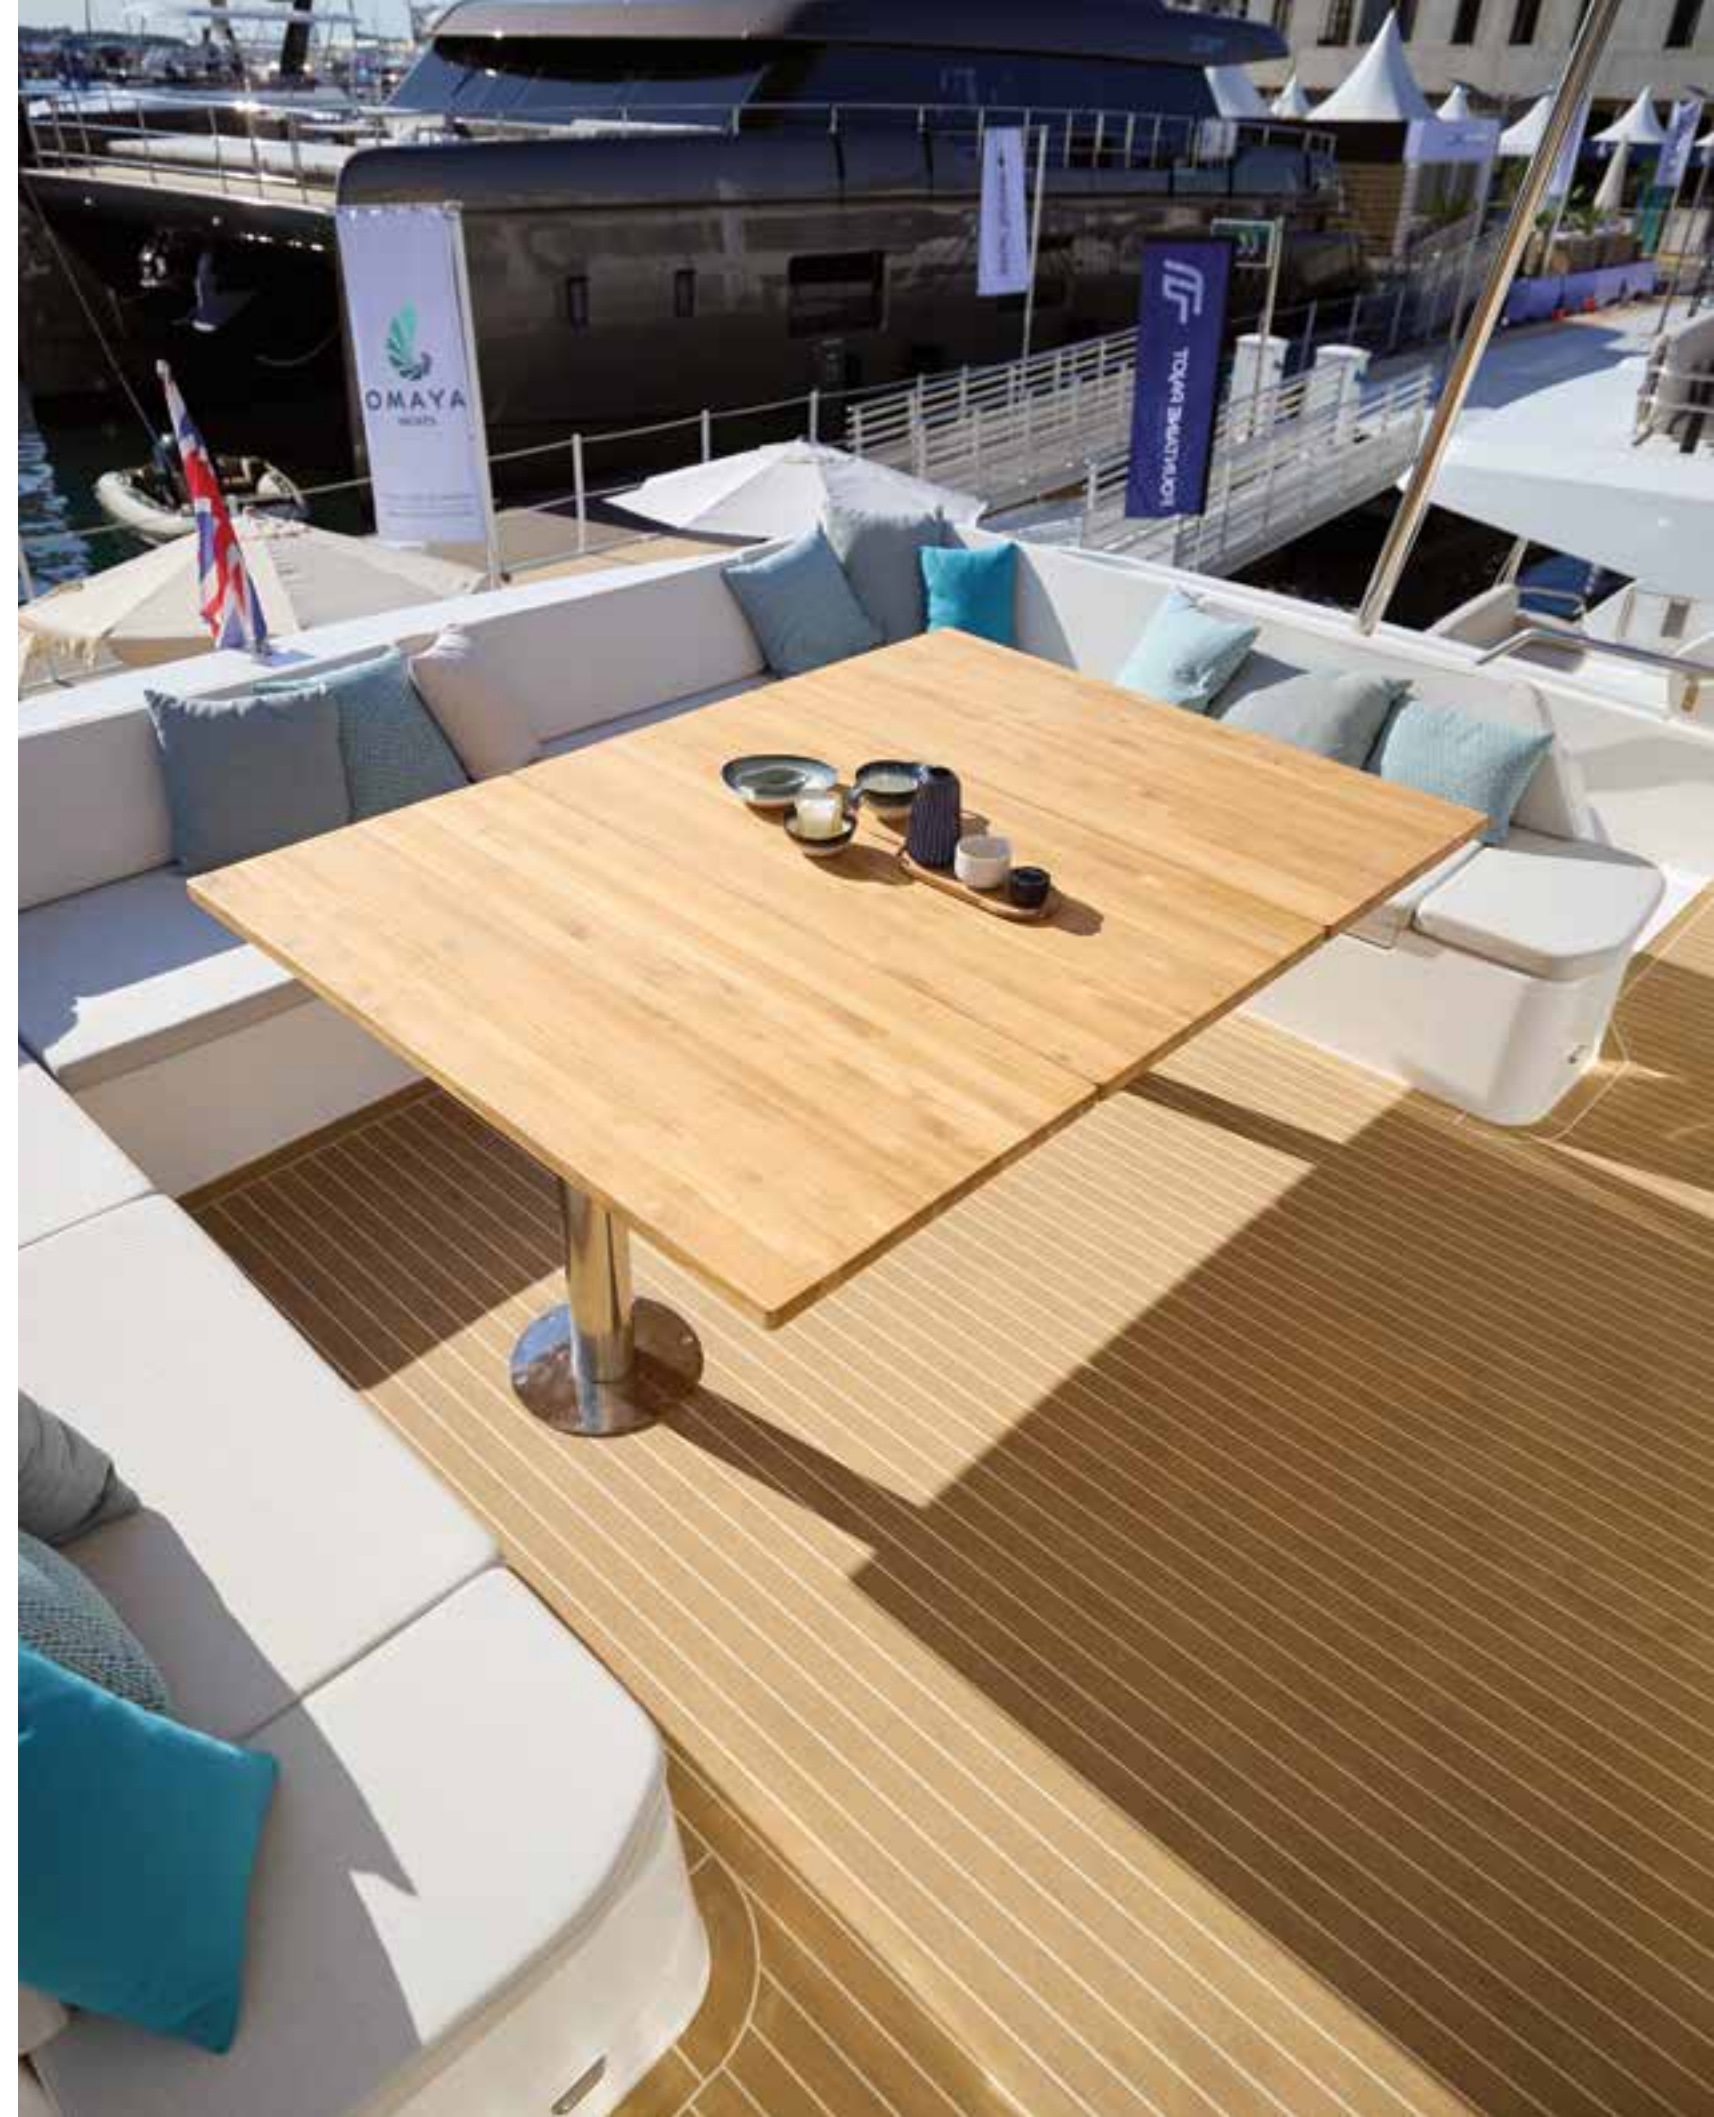

Flybridge

Freedom Above All

The flybridge of OMAVA 50 is an open-air living space that redefines how you experience the sea. Stretching across the yacht's full 8.4-metre beam, it has ***the largest social area in its class***, offering panoramic views and complete flexibility in layout.

This is where mornings begin slowly with the sound of the sea below and the horizon within reach. By afternoon, it transforms effortlessly from a relaxed sunbathing zone to a dining area for twelve. The modular design allows furniture and tables to be rearranged or removed entirely, creating up to three distinct social areas, perfect for hosting, lounging, or simply being still.

Every detail on the flybridge serves both comfort and control. The helm station provides excellent visibility for easy navigation, while the bar and optional grill make entertaining intuitive. Integrated Fusion surround sound, adjustable sun awnings, and thoughtfully placed lighting extend the enjoyment from sunrise to long after dark.

SOCIAL ZONES

Aft Cockpit

Living by the Water

The aft cockpit extends life outward, bringing you closer to the water. A hydraulic platform integrates seamlessly with the deck, creating a private beach club atmosphere where swimming, lounging, and dining come together with ease.

The area adapts to your mood. It can be arranged as a sunbed, set for a generous dining table, or opened into a flat deck for relaxed social gatherings. Throughout the day, it shifts naturally between hosting and retreat, always maintaining a sense of comfort and openness.

Dual freshwater showers on both sides of the stern make the transition from sea to deck simple and intuitive. Here, life is shaped by the water itself, balancing comfort and freedom in a way that feels natural and unforced.

SOCIAL ZONES

Saloon

Space That Serves Every Occasion

The saloon is designed for togetherness, a place where **dining, entertaining, and moments of calm come together in one living space.**

A dining table for ten adjusts effortlessly in height, set low and relaxed for quiet mornings, then elevated and formal for evening gatherings.

Nearby, a fully equipped galley keeps everything within reach. A double-door refrigerator, dedicated drinks cooler, stove,

sink, and dishwasher are all integrated, with every element chosen for both practicality and enjoyment.

Technology supports life on board without interrupting it. A 50-inch fold-down TV and Starlink make it easy to stay connected, whether you are working, relaxing, or sharing moments with others.

SOCIAL ZONES

Front Cockpit

A Vast Open Space

Located at the very front of the OMAVA 50, the front cockpit opens fully to the sky and the horizon ahead. A vast, inviting area designed for the pure pleasure of doing nothing at all.

With direct access from the saloon, indoor and outdoor living sit naturally side by side. The layout allows movement between shade and sun, comfort and openness. Here, the yacht feels expansive rather than enclosed, offering ***a sense of freedom that is felt rather than explained.***

SOCIAL ZONES

Front Cockpit

Open to the Sea

Across the full beam of the yacht stretches a set of spacious sunbeds, perfect for long, unhurried mornings, afternoon naps, or simply watching the horizon in silence. The flat deck layout supports different ways of living throughout the day. It can become a private spot for coffee, a relaxed social lounge, or an open deck for evenings under the stars. With the sun awning in place, the atmosphere shifts again, offering shade, airflow, and comfort even in the height

of summer. Whether you're sharing sunset drinks, reading in the breeze, or listening to the soft rhythm of waves against the hull, the front cockpit becomes ***the yacht's heartbeat***. Open, social, and always connected to the sea.

LAYOUT
AND
FLEXIBILITY

LAYOUT & FLEXIBILITY

OMAYA 50

On the portside, the entire hull is dedicated to the owner’s suite. The result is a calm, expansive environment that feels closer to a waterfront apartment than a traditional cabin.

A queen-size bed, sofa lounge, and dedicated desk define separate areas for rest, reading, and work. Integrated wardrobes provide generous storage for extended cruising, while the ensuite bathroom features double sinks and a spacious walk-in shower, designed for everyday comfort.

The starboard hull accommodates two guest cabins, each beautifully appointed with a private ensuite bathroom and built-in wardrobe, ensuring comfort and privacy for everyone on board.

Forward, a crew cabin located in the forepeak offers practical accommodation for support staff. This layout maintains clear separation between guest and service areas, contributing to a sense of ease, discretion, and onboard harmony.

Best-in-class beam of 8.39 m

Engine-powered, reaching 21 knots

A social space above for 12 people,

with solar panels for quiet living at anchor

A seamless water-level transition

A versatile layout for dining, relaxing, and enjoying your own beach club

Private or charter-ready

All cabins are equipped with ensuite access, built-in storage, and a layout that prioritises rest

Room for 10 with space to sit, cook, and stay in

Infinity view, indoor entertainment, and all-weather comfort in one seamless space

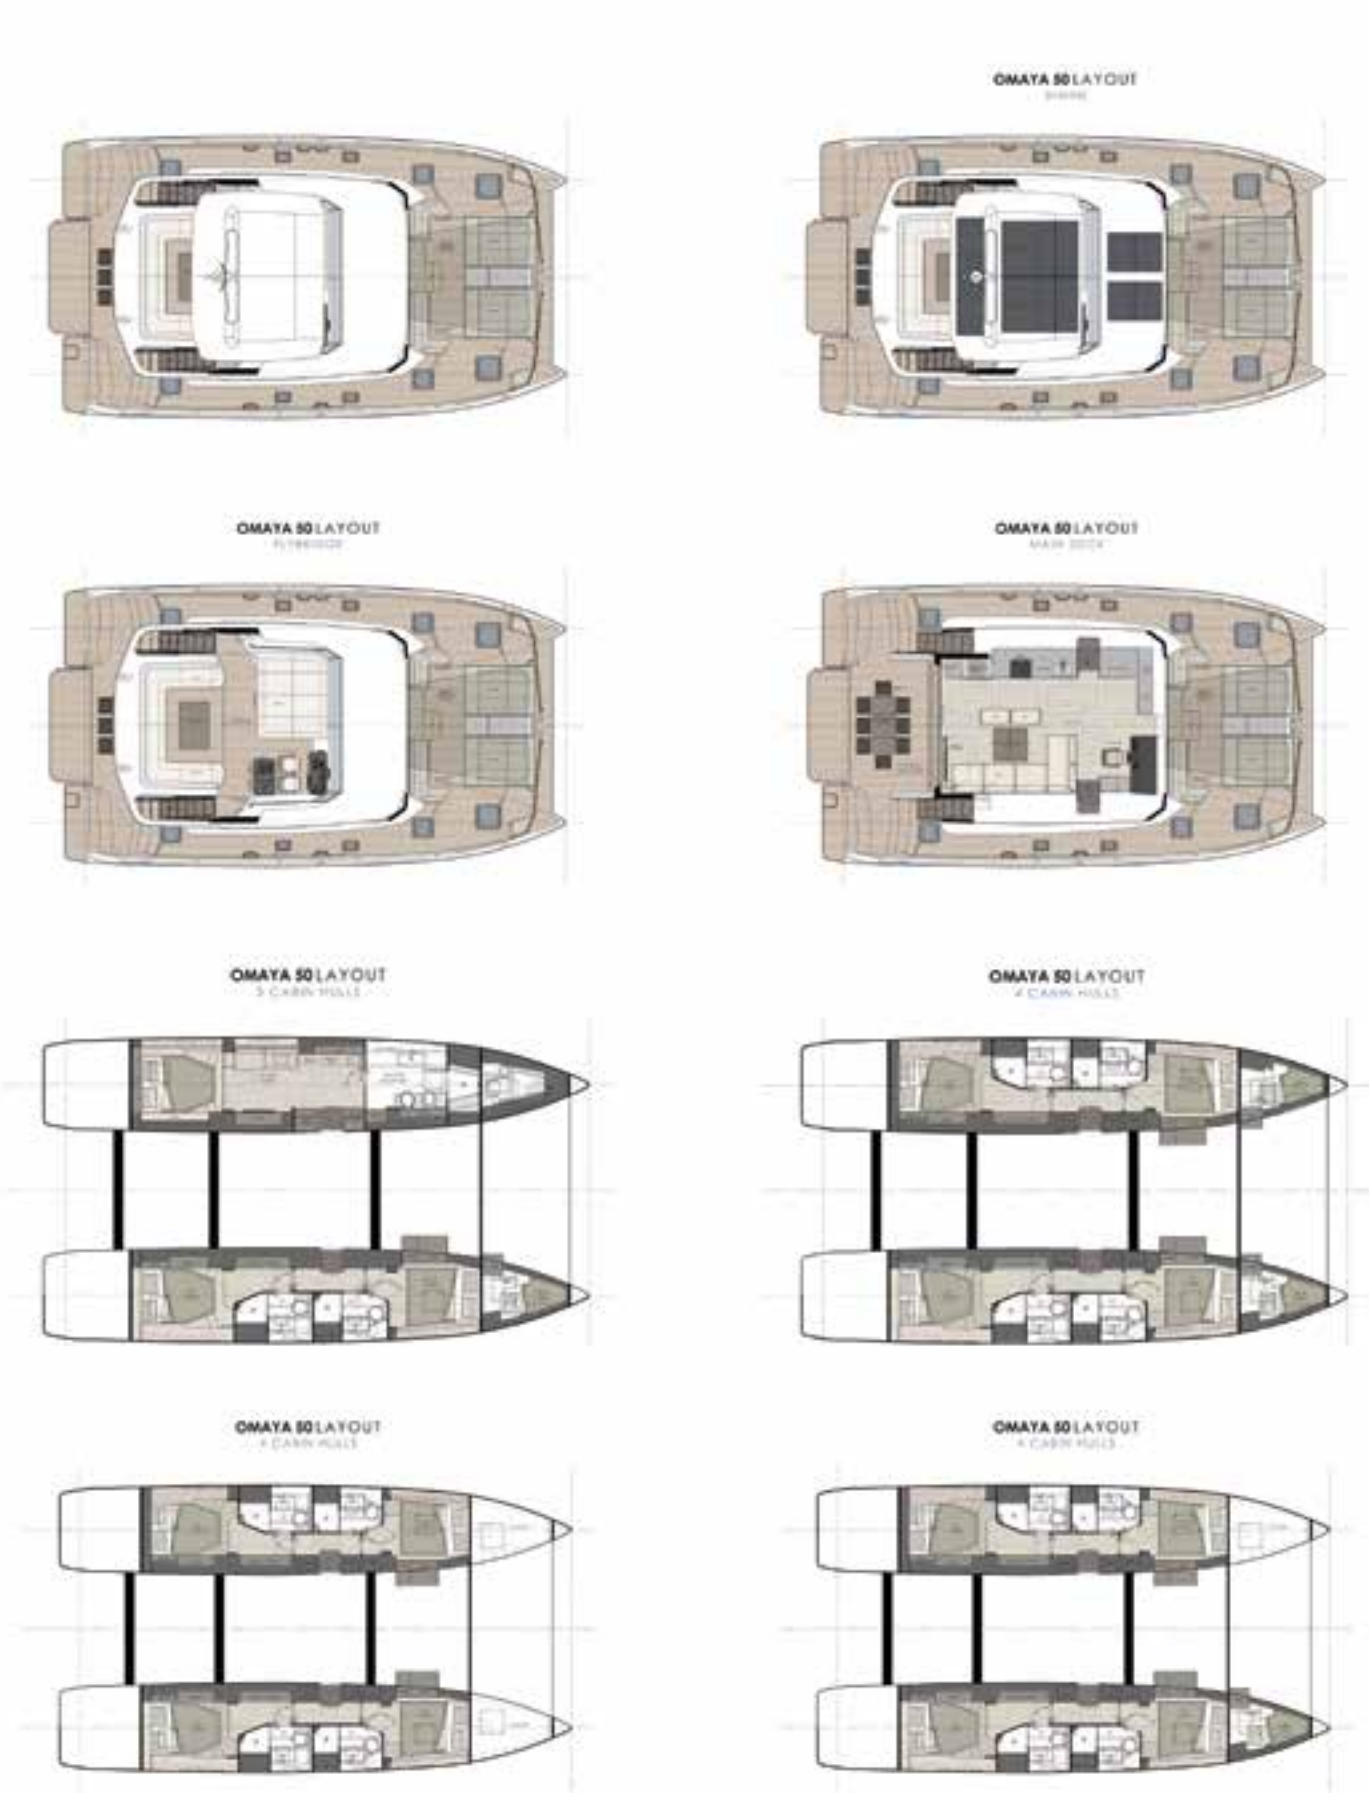

Vast open space for leisure time

Directly connected to the saloon, this generous outdoor area is a natural place to relax

LAYOUT & FLEXIBILITY

Accommodation

Private and Charter-Ready

The OMAVA 50 offers the same generous footprint across all configurations, while adapting naturally to your way of life. Whether you seek a private retreat for extended journeys or a refined charter yacht designed for sharing, the experience remains balanced, spacious, and considered.

LAYOUT & FLEXIBILITY

Owner's Version

A Private Retreat

On the portside, the entire hull is dedicated to the owner's suite. The result is a calm, expansive environment that feels closer to a waterfront apartment than a traditional cabin.

A queen-size bed, sofa lounge, and dedicated desk define separate areas for rest, reading, and work. Integrated wardrobes provide generous storage for extended cruising, while the ensuite bathroom features double sinks and a spacious walk-in shower, designed for everyday comfort.

The starboard hull accommodates two guest cabins, each beautifully appointed with a private ensuite bathroom and built-in wardrobe, ensuring comfort and privacy for everyone on board.

Forward, a crew cabin located in the forepeak offers practical accommodation for support staff. This layout maintains clear separation between guest and service areas, contributing to a sense of ease, discretion, and onboard harmony.

LAYOUT & FLEXIBILITY

Charter Version

Designed for Sharing

For those who envision the OMAVA 50 as a charter-ready catamaran, the four-cabin layout offers the same sense of balance and light, arranged symmetrically across both hulls. Each double guest cabin includes a private bathroom, wardrobe space, and indirect lighting that creates a warm, inviting atmosphere.

Direct access to the main deck allows guests to move easily between interior comfort and time spent outdoors, supporting a relaxed and intuitive onboard experience.

In this configuration, two crew cabins can be added forward in the hulls. Each is accessed independently and, in some versions, includes its own bathroom.

Whichever configuration you choose, the OMAVA 50 reflects a simple principle. Space is not defined by size alone, but by how it is considered, arranged, and lived in, with care for comfort, clarity, and life at sea.

SERENITY &
SUSTAINABILITY

SERENITY & SUSTAINABILITY

Solar Support & Silent Operation

Power in Harmony With the Sea

On the OMAVA 50, comfort extends **beyond what you see**. Even the systems working in the background are designed to support a calm, uninterrupted experience on board.

As you relax on deck, integrated solar panels quietly capture energy, reducing reliance on the generator and supporting everyday onboard systems. The result is a more peaceful atmosphere at anchor, where mornings remain still, evenings stay quiet, and time on board feels undisturbed.

By combining solar support with energy-efficient systems, the OMAVA 50 balances sustainability with comfort. It allows you to linger longer in tranquil surroundings, explore remote anchorages, and remain connected.

This approach reflects a modern way of yachting, where responsibility and refinement exist side by side, and true luxury is felt in the absence of noise and compromise.

PERFORMANCE & HANDLING

PERFORMANCE & HANDLING

Designed to Go Further

OMAYA 50 is engineered for confident, efficient cruising. Her power catamaran hulls balance stability, speed, and low resistance, delivering smooth handling and reduced fuel consumption in a wide range of conditions.

A wide beam enables **a shallow draft of just 1.05 metres**, allowing access to shallow bays and coastal areas that remain out of reach for most yachts. Manoeuvring is precise and intuitive, whether navigating open water or handling close quarters in a marina.

Stability is central to the experience. Carefully distributed weight and twin hulls provide a **steady platform at sea**, maintaining comfort and safety even in moderate conditions.

Efficiency extends your time on the water. With optimised hull geometry, extended range, and intelligent energy management, the OMA YA 50 allows longer stays at anchor and fewer interruptions for refuelling.

Every technical decision supports how owners actually use the yacht. The result is performance that feels controlled, practical, and effortless, designed to give you more freedom to explore and more time where you want to be.
