

Pray for always:

- God's blessing on the President** and all those in leadership in our nation, state and city.
- All members of our staff** as they seek to honor the Lord in their respective ministries.

Missionary focus of the week:

- The Son Foundation, serving in Indianapolis, Indiana.

New Prayer Requests:

- Bob Logsdon**, who was diagnosed with multiple myeloma. His bone marrow biopsy did not show cancer. However the cancer is in the plasma cells of the bones of the spine, which is much more treatable. Praise! There is another area of the spine they are monitoring but its location makes biopsying difficult. Please pray that the treatments will take care of that area too! He will have 25 treatments. Bob and Marilyn are praising God for his mercy and ask for prayer for the radiation treatments.
- John Hawk**, who has AFib. He saw his cardiologist who increased his heart meds and put him on a monitor. He will followup with his cardiologist in July.
- Jeff Lathrop**, who had surgery for bladder cancer in May. He began treatments 6/10 and they will continue for 6 weeks. He is progressing through treatments but experiencing a lot of pain. Please pray for that as well as his body to handle the treatments and for them to go well.
- Jerry Fudge**, who had pneumonia which progressed to sepsis. His overall health is improving but he is still weak and lightheaded. He and Karen love their new home and Jerry feels relieved to be there.
- Mary Zoller**, who was diagnosed with colon cancer. She is going through chemotherapy. Her doctor has adjusted her dose due to the side effects. She will be on the meds until October. Pray for the chemo to be successful and the side effects tolerable.

On-going Requests:

- Shawna Luke**, who has an infection in her legs. She is doing a little better but may need additional antibiotics and is to visit the wound clinic weekly. Pray they will clear up the infection.
- Sue Smith**, has started the targeted cell therapy medication that she will need to take for at least 2 years. However, after 2 weeks she had a lot of pain in her legs. The oncologist ordered an ultrasound and now a precautionary PET scan. She is to remain off the targeted cell therapy until she has results from the PET scan. She is thankful for doctors and everyone's prayers. Please pray for wisdom for her doctors. Finally, please pray for her eyes as she will see the retina specialist this week. Pray for improvement so she does not have to have another injection.
- Mary Helm**, prayers for Mary as she recovers from pneumonia at home. She was hospitalized for 2 days last week for pneumonia treatment. The doctors noticed a spot on her rib and have scheduled a biopsy of the spot for this Friday, June 26th. Pray that the spot is something treatable and hopefully not a return or spread of the cancer she had in 2025. She asked especially that we pray for John. He has been so strong caring for Mary and Jill but at times he feels the overwhelming weight of this responsibility.
- Jill Helm**, daughter of John and Mary Helm, who has fast progressing Alzheimer's and is declining quickly. Jill is now staying at University Heights Health and Living Community; Mary and John are very pleased with the wonderful care the staff is providing for her. Please pray that she will get completely settled there and that the great care will continue.
- Elijah Smith, Char Urban's son**, who is recovering from a stroke. His balance is improving. He is able to sit up with little or no assistance. He continues to work on his speech. Please pray that they would be able to get the supplies sent to them that they need at this time. Please continue to pray for his recovery. They appreciate your prayers.
- Brian Luke**, is still at Southpointe Healthcare Center but has been moved to room 504. He would appreciate visitors from LifePoint if it's convenient.
- Hearl Herrod**, who was diagnosed with cancer that spread from his eye to his liver. He is still taking steroids to relieve the liver inflammation and is not yet ready to resume his treatment. Please pray that the steroids will work quickly. Also, pray for peace and strength as they go through this, Hearl said this is a "really tough road."
- Morgan Harley**, and her family as Morgan faces a long medical journey. Kim Harley, Morgan's mother, asks that we please continue in prayer for guidance and understanding as they navigate through all the decision they are facing about Morgan's treatment plan.

Pray for those serving in our military: Mark Amos, Patrick Bramell Stephen Emminger, Jason Kegerreis, Mckinley Key, Chadwick Lewis, Jenny McCreary, Hope (Moore) Robbins, Tim Six, Derek Sutton, Andrew Weick, Calissa Weick
