Hectronic

Pay

CiteaPico – Cashless. Compact. Smart.

The future begins now. Here comes the cashless parking machine. Functional, economic, sustainable – corresponds to the "zeitgeist" and fits elegantly into modern cityscapes.

Customers can pay by card or contactless with mobile phone. The user guidance is realized by a large and very robust touch display. Upon successful payment, the ticket can be issued via QR code or email.

Everything you need and nothing you don't

The CiteaPico is small and compact, thus cost-efficient to purchase and economic to operate. After all, it is not necessary to replace paper rolls or coin boxes. With fewer rides personnel costs can be reduced. If, however, maintenance becomes necessary the upper part, i.e. the head of CiteaPico, can be exchanged by one turn.

Your Benefits

✓ **Cashless and ticketless**

✓ **Cost-efficient to purchase, economic and little prone to breakdowns during operation**

✓ **Elegant, robust and customizable housing**

✓ **Easy handling and flexible use thanks to two-component design**
