

Public Opinion Survey Residents of Ukraine

July 16-30, 2015

Detailed Methodology

- The survey was conducted by [Rating Group Ukraine](#) on behalf of the [International Republican Institute](#).
- Data was collected throughout Ukraine (except the occupied territories of Crimea, Donetsk and Luhansk *oblasts*) between July 16-30, 2015 through face-to-face interviews at respondents' homes.
- The sample consisted of 1,200 permanent residents of Ukraine aged 18 and older and eligible to vote. It is representative for the general population by age, education, region and size of the settlement. In addition, 665 respondents were also surveyed from the Odesa region. Please refer to the next slide for information on how the Odesa polling was conducted.
- Multistage probability sampling method was used with the random route and next birthday respondent's selection procedures.
 - Stage one: 25 official administrative regions of Ukraine were defined (24 regions of Ukraine and Kyiv). All regions of Ukraine were surveyed except occupied territories of Crimea, Donetsk and Luhansk.
 - Stage two: selection of the settlements - towns and villages. Towns were grouped into subtypes according to the size
 - City more than one million residents
 - City 500,000-999,000 residents
 - City 100,000-499,000 residents
 - City 50,000-99,000 residents
 - City to 50,000 residents
 - Village
 - Settlements were selected at random. The number of selected settlements in each region was proportional to the share of population living in a particular type of the settlement in each region.
 - Stage three: primary sampling units were described.
- The margin of error does not exceed plus or minus 2.8 percent.
- Response rate was 62.8 percent.
- Charts and graphs may not add up to 100 percent due to rounding.
- The survey was funded by the [U.S. Agency for International Development](#).

Detailed Methodology

Odesa Oversample

- Data was collected throughout the Odesa region between July 16-30, 2015, through face-to-face interviews at respondents' homes.
- The sample consisted of 665 permanent residents of the Odesa region, aged 18 and older and eligible to vote. It is representative for the general population by age, education, region and size of the settlement.
- Multistage probability sampling method was used with the random route and next birthday respondent selection procedures.
 - Stage one: region territory was divided into 33 administrative districts (26 districts, six cities of regional subordination and the regional center). The survey was conducted in all districts.
 - Stage two: selection of the settlements - towns and villages. Towns were grouped into subtypes according to the size
 - City more than one million residents (Odesa)
 - City 50,000-99,000 residents
 - City to 50,000 residents
 - Village
 - Settlements were selected at random. The number of selected settlements in each region was proportional to the share of the population living in a particular type of the settlement in each region.
 - Stage three: primary sampling units were described.
- The margin of error does not exceed plus or minus 3.8 percent.
- Response rate was 61.8 percent.
- Charts and graphs may not add up to 100 percent due to rounding.

Geographical Key

Due to the Russian occupation of Crimea and the ongoing conflict in eastern Ukraine, residents of the regions of Donetsk, Luhansk and Crimea were not included in this poll.
