Turn Pavement into Possibility

**S**treetBond Pro 220 and Pro 250 Pavement Coatings are liquid-applied, MMA resin-based systems that provide UV-stable color and anti-skid aggregates in a fast-curing formula.

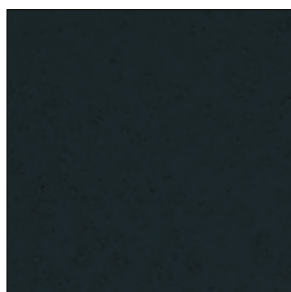

Available in the fourteen standard colors shown below, StreetBond Pro Pavement Coatings incorporate UV-stable pigments that help resist fading in harsh sunlight. The color palette includes options appropriate for standard traffic markings as well as off-road applications to meet your creative vision.

The performance advantages of StreetBond Pro's MMA-based formulation are significant. But perhaps the most remarkable advantage of MMA technology is application speed. Typical StreetBond Pro applications are rainproof in 30 minutes, and stress resistant in 2 hours. That's how quickly you can transform walk paths, bike lanes, bus lanes, traffic lanes, pedestrian plaza, sport courts, and playgrounds with StreetBond Pro!
