

It's more than a coating. It's long-lasting pavement protection.

Parking lot shown five years after application of StreetBond DuraShield.

As an epoxy-modified acrylic coating, DuraShield provides a non-slip, non-skid surface, is low VOC, and comes in an optional solar reflective formula that helps “cool” the asphalt.

Less recoating — more protection

DuraShield is formulated to perform under extreme weather conditions. That means:

- Less prone to cracking and wear
- Less frequent recoating
- Less business disruption

Reduce mess and hassle

Fast-drying DuraShield is traffic-ready in hours, instead of the days you'd wait with traditional asphalt sealant. It dries hard, which helps protect your floors, carpets, vehicles and crosswalks from the sticky black asphalt tracks that accompany traditional asphalt-based sealcoats.

And low VOC DuraShield has none of the pungent odors common with asphalt sealcoat, so it won't irritate tenants, guests, and employees.

The “cool” pavement alternative

Black asphalt gets hot in sunlight, which isn't good for the environment or for the asphalt itself. In fact, heat and UV exposure can lead to stiffening, thermal expansion, contraction, water infiltration—and ultimately potholes, maintenance calls, and safety issues. And adding a black asphalt sealcoat can make the surface even hotter.

Fortunately, DuraShield is available in Solar Gray, with an SR of .34, which meets LEED V4 requirements for solar reflectivity.

By keeping the asphalt cooler, Solar Reflective DuraShield:

- Extends the life of the asphalt
- Mitigates the Urban Heat Island effect
- Creates a more comfortable walking surface for employees, customers, and pets

StreetBond Pavement Solution Team

To help make sure every DuraShield job is done right and installed to last, reach out to our Sales, Service, and Technical Support teams for:

- Coating Plan (provided for all warranty jobs)
- Submittal Packages
- Local and Regional Sales Support
- Field Technical Training & Support
- 1-Year Warranty on product performance included
