

PERFECT POLISH

SHUTDOWN REPAIR GUIDE

SAFETY | QUALITY | SCHEDULE

MAKE THE MOST OF YOUR FACILITY DOWNTIME

Small floor problems don't stay small. A chipped joint turns into a broken slab edge. A worn coating lets chemicals and wear reach the concrete. A low spot becomes a trip hazard or a constant puddle. Fixing these during a shutdown costs far less than an emergency repair that forces you to stop production later.

WHY CHOOSE PERFECT POLISH

Perfect Polish brings the crews, equipment, and experience to handle even the toughest repairs on tight shutdown schedules. With hundreds of millions of square feet of industrial repair and flooring work completed nationwide, we know how to get the job done right and get you back to full production on time.

SHUTDOWN FLOOR REPAIR CHECKLIST:

JOINT AND CRACK REPAIR	Repair chipped joints and cracks before they spread under heavy-traffic: • Joints with chipped or broken edges • Missing or failed joint filler • Joints that bump or rattle under forklifts • New cracks, or old cracks that are getting wider	CHECK: ☐
CONCRETE LEVELING	Fix dips and low spots to stop trip hazards, standing water, and equipment wear: • Dips or low spots in traffic lanes • Standing water near docks and drains • Uneven transitions between slabs or at doorways	CHECK: ☐
CONCRETE REPLACEMENT	Remove and replace broken or sunken slabs that are past repair: • Sunken or shifting slab sections • Crumbling or broken concrete • Heavily damaged areas at docks and high-impact zones	CHECK: ☐
COATINGS REPAIR	Fix peeling or worn coatings to restore protection and easy cleaning: • Peeling, bubbling, or flaking coatings • Worn-through areas in traffic lanes • Chemical or impact damage	CHECK: ☐
POLISHED CONCRETE	Restore dull or dusting floors to a dense, bright, easy-to-clean surface: • Dusting concrete • Dull, worn, or uneven polish • Tire marks and surface stains • Rough or damaged surface areas	CHECK: ☐
LINE STRIPING	Refresh faded aisles, walkways, and traffic lanes so everyone returns to a safe floor: • Faded aisle and traffic lane lines • Worn pedestrian walkways and crosswalks • Markings that need to change for new equipment or layouts	CHECK: ☐
