

Dynamic Health™

Content & expertise you can trust

Quality content leads to quality care.

When the need for evidence-based skills resources arises, don't leave your clinicians scrambling for information while trying to administer care. Dynamic Health is a comprehensive mobile-friendly solution to help nurses and healthcare professionals quickly access the latest evidence-based content to master skills and find answers to enhance clinical decision-making and patient outcomes. The versatile tool can be used in a variety of healthcare settings by nurses, allied health professionals, and clinical educators.

Content within Dynamic Health is derived from a systematic approach to identify, evaluate, and synthesize

evidence from healthcare literature databases (including CINAHL), peer-reviewed journals, and numerous other reliable sources. EBSCO's evidence-based methodology ensures ongoing and consistent surveillance of the latest literature to drive content updates. This process results in the highest quality evidence to guide clinical decision support, policy and procedures, and best practice. Through one easy-to-use interface, you can give your clinicians peace of mind that the information they are accessing is trusted and up-to-date and their learning resources are evidence-based. Be confident in any setting and any specialty that your staff's skills support needs are met.

Competency at the Point of Learning

Dynamic Health skills are seamlessly integrated to support staff development at the point of learning.

- Enhance onboarding programs, annual skills validation, and competency development by incorporating Dynamic Health skills.
- Minimize practice variability by assigning evaluators for any of the electronic Dynamic Health skills checklists, while benefiting from the convenience of centralized assignment, tracking, and reporting.
- Clinical staff can efficiently manage earned Continuing Education (CE) credits for skills course completion, as well as any externally earned CEs, all within the HealthStream learning platform.
