## SPOT™ Secure PeopleSoft Orchestration Tool

SPOT™ by Elire is an AI-powered bolt-on that enhances the PeopleSoft user experience through natural language interaction, process automation, intelligent guidance, and AI-driven task execution, without replacing or modifying your existing PeopleSoft investment.

### Key Capabilities

- Natural language querying and navigation
- AI-assisted training and user guidance
- Workflow automation
- OCR document processing
- Forecasting and recommendations
- Requisition and voucher creation
- Reconciliation assistance
- Custom AI agents development

### Supports Multiple PeopleSoft Areas

- Financials
- Supply Chain
- Procurement
- Customizations and bolt-ons
- Treasury
- HCM
- Accounts Payable

SPOT™ can also orchestrate processes across multiple PeopleSoft pillars. You can communicate and perform actions/data sourcing from any PSFT pillar to any other pillar in your organizations domain.

### Flexible Deployment

- SPOT™ supports:
- Fully on-premise deployments
  - Hybrid deployments (on-prem + Hyperscaler)
  - Cloud deployments

For air-gapped environments, organizations can deploy their own on-premise LLM infrastructure to power SPOT reasoning.

### Continuous Innovation

- Elire provides:
- Quarterly product releases
    - Ongoing enhancements / new features
  - Support and troubleshooting
  - Diagnostic tooling
  - Automated testing support

### Why SPOT™?

- Modernize the PeopleSoft experience
- Automate manual processes
- Improve productivity and user adoption
- Preserve and extend your PeopleSoft software investment
