Path to Cloud - Day 0
Maximizing Your On-Premise Investment

Spending time extending the value of your on-prem investment with updates to tools and technology ensures better opportunities for long-term transformation success while also lowering TCO and alleviating pain points. There are many opportunities to gain more value from PeopleSoft, while also making decisions that support your eventual transition to Oracle Cloud.

Elire can help you wherever you are with your PeopleSoft Application.

Pre 9.2

- **Supporting Upgrade Readiness –** Evaluating 9.2 Readiness by reviewing business processes, customizations, change impact, and business goals

- **Upgrading to 9.2 -** Setting the scope and making the move to a modern PeopleSoft 9.2 with confidence using Elire's Success Delivered Upgrade Methodology and Scope Object Tracker

- **Prioritizing Customization Removal –** utilizing Elire's Customization Identification Accelerator tool to group customizations at the component level, evaluate level of effort to re-engineer, and easily compare to delivered functionality

On 9.2

- **Developing a CDM Strategy –** to support continued application of new features at regular intervals, including testing and application strategy

- **PUM/PeopleTools Upgrades –** leveraging the most up-to-date delivered functionality, modern tools and fluid pages, and application enhancements

Optimizing 9.2

- **Extending PS Applications and Utilities –** by assessing your business needs, then evaluating and implementing the "bells and whistles" of 9.2 including Kibana, PICASO Chatbots, and Process Automation that will have the biggest impact

- **Testing Automation -** with PeopleSoft Test Framework to automate PUM Image testing and support a more robust testing strategy

Preparing Your Cloud Roadmap

- **Defining Your Strategy** – including your Cloud software strategy, organizational considerations for transformation, current state readiness, and potential paths to cloud

- **Implementing a SaaS TMS** – to dip your toe in the Cloud with a best-in-breed treasury application like Kyriba

- **AP Automation** – to support P2P Process optimization, alleviate manual errors, increase AP process flexibility, and increase visibility

- **PS Hosted on Cloud** – Shifting your application to Cloud infrastructure to reduce infrastructure costs and flexibility to scale based on demand

- **Cloud Pilot/POC -** testing the waters of Oracle Cloud with a pilot for your pressing pain points and targeted process improvements, without the long-term commitment

At any stage in your PeopleSoft maturity, Elire can support you with:

- **PeopleSoft Optimization -** Reviewing your PeopleSoft Application to identify areas for improvement, re-configuration, new functionality available, and removal of manual processes to take advantage of the power within PeopleSoft

- **Prioritizing Customization Removal -** continuing to evaluate customizations for removal or re-engineering for easier PUM

application and movement towards best practice vanilla processes

- **Evaluating PeopleSoft 9.2 vs Cloud** – with Elire's Application Roadmap to map your ideal future state to your application options, taking into consideration your unique business needs and goals for IT Transformation

Why Elire?

- Experts with Average 20+ Years of PeopleSoft Application and Roadmapping Expertise

- PeopleSoft 9.2 Upgrade Leader with 20+ 9.2 Upgrades Across Industries

- 100+ PeopleSoft Clients including Federal, Public Sector, Healthcare, Education, and Financial Services
