Path to Cloud - Day 1
Making the Move to Oracle Cloud

Go live on Cloud with the strategy that works best for your organization. Elire Experts have the process and the proven PeopleSoft to Cloud Accelerators to get you there.

Strategies for Your Move to Oracle Cloud:

Co-Existence

Co-Existence - Utilize a single module or process to resolve pain points with Oracle Cloud. Coexistence offers the opportunity to set the foundation for your Cloud transformation without the large time or financial commitment and minimizes your implementation risk.

Elire can support your choice to "co-exist" with:

- **Co-existence Strategy Creation –** Helping define your Co-existence strategy and assessing how to sync your data, providing the roadmap for your transformation

- **Co-existence Implementation –** Implementing your initial Cloud module and the supporting data migration and integrations with Elire's PS to Cloud DataSync Accelerator

- **PS to Cloud DataSync Accelerator –** Synchronizing your PeopleSoft data with Oracle Cloud while maintaining PeopleSoft as your system of record providing simplicity and maintainability

- **Managed Services –** Maintaining your co-existence integrations and extend your PeopleSoft and Cloud teams with experts for both applications. Managed Services gives your team the flexibility to advance internal skillsets and capabilities with support when you need it

Big Bang

Big Bang - Transforming your HR or Finance Application to Oracle Cloud with a coordinated, comprehensive approach. The "Big Bang" approach to transformation minimizes change fatigue while empowering your users with modern applications and business processes to meet their needs

Elire Can Support your choice to go "big bang" with:

- **Cloud Readiness –** Determining current state capabilities for a successful implementation including evaluation and presentation of key criteria such as integrations, data conversions, end-user impact and change readiness, business process alignment, and more

- **Success Delivered Cloud Implementation –** Utilizing Elire's Success Delivered Methodology to efficiently implement and integrate Oracle Cloud. Elire supports an agile prototype implementation approach to quickly build engagement with your implementation team, backed by strong project and change management to support your users from mobilization through go-live and support

- **PeopleSoft to Cloud Data Conversion Accelerator –** Offering a secure, flexible, robust, and configurable tool to extract, transform, and prepare your data to load into Oracle Cloud

Training and Change Management

Training and Change Management - Effective change management mitigates the impact to your systems and business caused by IT transformation and aligns all stakeholders across your organization. Elire can support training and change management initiatives to ensure your organization is prepared, and set up for success to leverage the new capabilities in Oracle Cloud and make strategic process, policy, and scope decisions with confidence

Why Elire?

- **PeopleSoft to Cloud Experts –** 18+ years of on-premise PeopleSoft expertise and 8+ years of PeopleSoft to Cloud transformations, making Elire the only implementation partner who can understand your legacy and future ERP system

- **Proprietary Accelerator Tools –** Built, tested, and proven across 10+ transformations, including pre-defined programs, dashboards, and reports

- **Deep Understanding and Expertise –** Expertise in common Cloud pain points and roadblocks, including the volume and complexities specific industries face, while maintaining success on high visibility projects

- **Dedicated Team of Oracle Certified Consultants –** Leveraging Elire's proven Success Delivered Implementation methodology and industry best practices to provide the expertise needed to navigate your cloud transformation
