# Elire Oracle Cloud Quarterly Update Services

## Part of Elire's Managed Services

### Maximize Performance. Minimize Disruption.

With Oracle's continuous innovation via quarterly updates, staying current is no longer optional—it's essential. But managing frequent updates while maintaining peak performance while balancing strategic initiatives of your team can strain internal resources and delay progress.

*That's where Elire steps in. Leave the quarterly updates to us.*

## We'll Take on the Day-to-Day

The Elire Managed Services Team will allow your organization the flexibility and cost savings to enjoy your application's full potential. Our Oracle Cloud Quarterly Update service provides hands-on support to test, validate, and implement updates with minimal disruption.

## What's Included:

- Comprehensive review of quarterly Oracle release notes
- Impact analysis and validation for your unique environment
- Testing support and defect triage
- Configuration and regression testing
- Coordination with Oracle Service Requests
- Post-update performance check and stabilization

## Focus on Strategic Initiatives

Let Elire handle the heavy lifting of your Oracle Cloud maintenance so your internal teams can focus on innovation and transformation. Whether you're operating ERP, HCM, or EPM modules, our experts ensure smooth adoption of updates—without compromising business continuity.

## Why Elire?

With over 20 years of experience supporting enterprise applications, Elire offers a true trusted advisor partnership to our clients. With deep Oracle Cloud expertise, our Managed Services team becomes an extension of yours—proactively managing your application lifecycle with precision, care, and an unparalleled attention to detail.
