Trial Tracker

- Keep terminology consistent. Use the same key terms when describing details so your list stays clear and easy to review.
- Update regularly. Trials open, close, and change eligibility criteria. Refresh your tracker as you receive new information from your care team.
- Use the Notes section thoughtfully. Capture important details such as waitlists, referral status, required testing, or questions to follow up on.
- Bring it to appointments. Having your tracker on hand can help guide focused conversations with your oncologist.
