
🌐 Official Recruitment | Aren Web Company

A Design & Interface Division of MEGA HOLDING | GOD AI FATHER
Crafting Human–AI Web Ecosystems with Precision, Emotion, and Scalable Design Intelligence

Aren Web Company is more than a website agency.
We are a multi-platform interface lab where artificial intelligence, cognitive behavior, and UI psychology converge to build digital spaces that understand, adapt, and evolve. From government-grade dashboards to fully personalized UX paths—**we build the internet of next consciousness.**

Key Positions Include:

1. Head of Adaptive UX Architecture

- Design dynamic user paths based on personality, intention, and language
 - Tools: Figma, Hotjar, UX decision-tree AI
 - Experience: Behavior-driven UI design
-

2. Full Stack Developer (AI-Centric)

- Develop seamless front–back systems with AI integrations
 - Tools: React, Node.js, TensorFlow.js
 - Experience: API-heavy or AI-powered platforms
-

3. Webflow Expert & No-Code Strategist

- Build modular, editable, high-conversion websites
 - Tools: Webflow, Zapier, Memberstack
 - Experience: Design-to-delivery in startup ecosystems
-

4. UI Animation & Microinteraction Designer

- Create visual motion for emotion, focus, and delight
 - Tools: Lottie, GSAP, After Effects
 - Experience: Interface psychology + animation
-

5. Content-Aware CMS Engineer

- Design intelligent content management logic with AI tagging
 - Tools: Headless CMS, Sanity.io, Contentful
 - Experience: Dynamic content ecosystems
-

6. AI Personalization Developer

- Integrate decision-tree AI that tailors layout, offers, tone
 - Tools: A/B AI frameworks, personal logic layers
 - Experience: Personalization at scale
-

7. Data Privacy & Consent Experience Designer

- Ensure legal and ethical handling of user data with transparent UX
 - Tools: Cookie dashboards, consent flow systems
 - Experience: UX law and dark-pattern avoidance
-

8. Mobile-First Interface Specialist

- Optimize all builds for thumb-flow, microtext, and gesture
 - Tools: Flutter Web, mobile prototyping tools
 - Experience: Touch-native design
-

9. SEO & Accessibility Engineer

- Architect performance-ready, discoverable, and inclusive code
 - Tools: Lighthouse, WAVE, structured data automation
 - Experience: Inclusive digital presence
-

10. Emotionally Intelligent Form Designer

- Build forms that guide users with softness, clarity, and logic

- Tools: Typeform, Formbricks, empathy validation layers
 - Experience: UX writing + psychology-informed flow
-

11. Serverless Web Architect

- Design secure and scalable cloud-native infrastructures
 - Tools: Vercel, Firebase, AWS Lambda
 - Experience: Jamstack or serverless deployment
-

12. Web-Based Dashboard Engineer

- Build real-time control panels with live data & AI overlays
 - Tools: React Admin, Chart.js, REST/GraphQL
 - Experience: Government or enterprise dashboards
-

13. UX Copywriter & Microtext Strategist

- Write interface language that moves, reassures, and converts
 - Tools: UX writing libraries, tone-mapping tools
 - Experience: SaaS, onboarding, or growth copy
-

14. Design Systems Architect

- Maintain scalable visual identity systems with full documentation
 - Tools: Figma Libraries, Storybook, Tokens Studio
 - Experience: Product-brand synchronization
-

15. Motion-Driven Landing Page Specialist

- Create high-performance landing pages with scroll-triggered emotion
 - Tools: Webflow, GSAP, Three.js
 - Experience: Conversion-focused interface art
-

16. Performance Optimization Engineer

- Improve load speed, mobile score, and real-time responsiveness
- Tools: WebPageTest, GTmetrix, lazy load AI

- Experience: Core Web Vitals excellence
-

17. Cross-Language Web Localizer

- Adapt UI, language flow, and directionality across cultures
 - Tools: i18n libraries, cultural design overlays
 - Experience: Multilingual design systems
-

18. AI-Powered Chat & Support Designer

- Build intelligent help flows and emotional support bots
 - Tools: Intercom, Drift, custom NLP chat logic
 - Experience: Support UX or chatbot design
-

19. Voice-Controlled Web UX Engineer

- Design and test voice-first interfaces and command triggers
 - Tools: Web Speech API, voice-to-action mapping
 - Experience: Accessibility or futuristic UI
-

20. Browser Extension Developer

- Create add-ons that enhance browsing with real-time insights
 - Tools: Chrome APIs, extension security frameworks
 - Experience: Data overlays or task-based UX
-

21. Ethical UX Auditor

- Ensure all journeys are free of manipulation and psychological harm
 - Tools: UX pattern analyzers, ethics scoring tools
 - Experience: Human-centered design + digital ethics
-

💰 Base Salary: €6,200 / month

Final compensation reflects creative clarity, interface mastery, and multi-platform fluency.
