

Accelerator: **Data Stack Modernisation**

Accelerate your journey to the Modern Data Stack, powered by Snowflake's Data Cloud and our proven 5-step delivery framework.

5 Steps to accelerate *Data Stack Modernisation*

Jump in and out at any stage of the cycle

No need to follow every step of the accelerator cycle. You can jump in-and-out wherever needed.

01 Use Case Design & Data Discovery

Ideation workshop to identify priority use cases. Making sure use case is tied to overall business objectives and clear KPIs.

02 Data Pipelines & ingestion

Building automated ELT data pipelines that accelerate data movement and ensure seamless data integration.

03 Snowflake QuickStart

Full Snowflake setup to ensure data centralisation and storage without compromising governance and security.

04 Data Transformations

Data transformation and modeling to improve data quality and trustworthiness before activation.

05 BI & Analytics Activation

Activating BI & Analytics in a first layer of dashboarding & reporting with Modern Analytics platforms on top of your stack.

Trusted Partner. Proven Results.

Trust Biztory's expertise to accelerate your Data Journey. Our Accelerator has delivered multiple successful MDS deployments over time.

Accelerate the journey to Modern Analytics with **Snowflake**

Biztory's Data Stack Modernisation Accelerator helps you unlock the power of a Modern Data Stack – fully automated, scalable, and built for speed, efficiency, and AI-readiness. Ensure seamless data integration, improved performance and cost-efficiency with a Data Stack that grows alongside your business needs.

How our Accelerator helps with:

01 Flexible & simplified cloud deployments

Accelerate your journey to a cloud-based stack. We ensure a seamless transition from legacy systems to a modern stack without compromising on security or performance.

02 Integrated & unified data

We consolidate your fragmented data landscapes into a single, coherent platform on Snowflake's Data Cloud, enabling connected platforms to leverage this unified data.

03 Trusted data activation

Transform raw data into trusted data models that drive impactful strategic insights – powered by modern analytics platforms like Tableau, ThoughtSpot and Sigma.

Why customers love it:

✓ Faster time to deployment

We understand the complexities involved in modern data stack integrations. Our Accelerator is designed to get you there faster with go-live results in 2 months or less.

✓ Deep technical expertise

Get access to expert consultants that provide guidance, support, and training, reducing the dependency on deep technical skills in-house.

✓ Driving business value & ROI

Turn your investments into measurable success. Our structured approach includes setting clear benchmarks and tracking metrics that demonstrate real-world returns.
