

Snowflake Accelerator: **Data Stack Optimisation**

Optimise your Snowflake Modern Data Stack performance faster,
with our proven 5-step delivery framework.

5 Steps to accelerate *Data Stack Optimisation*

Jump in and out at any stage of the cycle

No need to follow every step of the accelerator cycle. You can jump in-and-out wherever needed.

01 Modern Data Stack Audit

Data landscape audit to set benchmarks for current performance and costs. Identify opportunities for growth.

02 Cost Optimisation

Optimise scaling and compute resources and implement best practices for data storage and cost management.

05 Managed Modern Data Stack

Managed services on retainer including data governance, training & enablement and performance monitoring.

04 Scalability and Security

Optimisation of RBAC settings and implementation of advanced security features alongside scalability testing.

03 MDS Performance

Optimise SQL & dbt transformations and streamlining data flows and reducing latency.

Trusted Partner. Proven Results.

Trust Biztory's expertise to accelerate your Data Journey. Our Accelerator has delivered multiple successful MDS deployments over time.

Accelerate the journey to Modern Analytics with **Snowflake**

Biztory's Data Stack Optimisation Accelerator helps you unlock the power of a Modern Data Stack – fully automated, scalable, and built for speed, efficiency, and AI-readiness. Ensure seamless data integration, improved performance and cost-efficiency with a Data Stack that grows alongside your business needs.

How our Accelerator helps with:

01 End-to-end optimisation

Enable sustainable Snowflake operations through clear roles, playbooks, and optimization cadences. We help you build the muscle to continuously improve platform usage.

02 Reduced costs and inefficiencies

Eliminate warehouse sprawl and auto-scaling misuse. We align compute to actual workload patterns and introduce automation that improves efficiency and reduces costs.

03 Governance & Security

Strengthen your data platform's posture with enterprise-grade security frameworks. We implement RBAC, row-level security, and governance rules aligned with your requirements.

Why customers love it:

✓ Faster time to optimisation

We understand the complexities involved in modern data stack optimisation. Our Accelerator is designed to get you there faster with go-live results in 2 months or less.

✓ Deep technical expertise

Get access to expert consultants that provide guidance, support, and training, reducing the dependency on deep technical skills in-house.

✓ Driving business value & ROI

Turn your investments into measurable success. Our structured approach includes setting clear benchmarks and tracking metrics that demonstrate real-world returns.

Leading Data + AI teams trust Biztory

What makes biztory different?

80+

Data + AI consultants in EMEA

Premier Services Partner for Snowflake

300+

Certifications

Premier Services Partner for Snowflake AI Data Cloud
