Experienced UX Manager and Designer with a proven track record of leading design projects, managing cross-functional teams, and delivering user-centered solutions. Skilled in transforming complex problems into intuitive and engaging user experiences. Strong background in interaction design, product development, and customer experience optimization.

WORK EXPERIENCE

Foundation Source • Remote • 02/2021 – Present

Foundation Source is a leading provider of enterprise-caliber and technology-led charitable giving solutions.

UX Manager

- I am leading the design team and collaborating cross-functionally with internal design and product teams to create the first enterprise-level PhilTech solution for financial institutions. This platform empowers large banks, financial advisors, and RIAs to manage all aspects of their clients' philanthropic efforts from a single platform—offering robust reporting capabilities with aggregated client data, as well as day-to-day operational management tools. By centralizing philanthropy management at scale, this solution positions Foundation Source at the forefront of the enterprise PhilTech space

Senior UX Designer

- Led cross-functional teams to strategize and unify customer experience touch points, resulting in a streamlined process that improved overall product quality.
- Redesigned a 13 year interface and experience to be WCAG compliant while improving on existing user pain points.

UX Designer

- I led the design of *Impactfully*, the first self-service software solution for private foundations. This innovative product opened a new market segment by providing a flexible, lower-cost alternative to our full-service offering, enabling foundations with smaller budgets or different needs to manage their philanthropic activities independently, without requiring white-glove service. By broadening accessibility, *Impactfully* empowered a wider range of foundations to drive impact while maintaining a streamlined, intuitive user experience.

SKILLS

Technical

Automatic Data Processing (ADP) • Remote • 11/2019 - 02/2021

Automatic Data Processing, Inc. (ADP) is an American provider of human resources management software and services

UX Designer

- Our squad was made up of an Engineering lead, a Product Owner, and myself as the Design lead. We worked on a feature that enabled users to import human analytics data from multiple HCM systems into the ADP platform. My role focused on crafting the experience for importing data, designing data visualizations, and ensuring data accuracy was maintained throughout the process.
- I led the design of a manager-focused insights feature within ADP's mobile app, enabling Manager's to make data-driven decisions about their teams. The feature combined internal employee data, such as performance and engagement, with external benchmark data from other companies to help managers identify potential attrition risks and performance gaps. By translating complex analytics into clear, actionable insights, we empowered managers to proactively engage with their teams and drive retention, productivity, and engagement.

Asurion • InOffice • 09/2016 - 11/2019

Asurion is a leading provider of device insurance, warranty & support services for cell phones, consumer electronics & home appliances.

Interaction Designer

- Part of a small but mighty digital SWAT team, where if it had to do with pixels, we were on it. I thrived in a fast-paced, collaborative environment with a group of super-talented creatives, bringing some seriously cool digital experiences to life. From creating a fully functional, human-sized phone (yep, you read that right) to tackling everything from UX/ UI design to interactive prototypes, we pushed boundaries and delivered tangible results. Whether it was thinking outside the box or reimagining everyday tech experiences, I loved the challenge of turning big ideas into real, user-centered designs. We didn't just think about innovation; we made it happen.

VOLUNTEERING & LEADERSHIP

JCC of Central New Jersey

Boy's Basektball Coach •
Scotch Plains, NJ

THOMAS • 01/2012 – 02/2016

Thomas connects buyers and suppliers to inform strategic decision-making, build supply chains and grow businesses

Design Manager

- InOffice At THOMAS, I learned how to work magic under pressure –juggling tight deadlines, managing client feedback, and somehow always keeping the creative juices flowing. We built everything from websites to videos to marketing materials that helped manufacturing companies generate leads and grow their businesses. Whether it was pulling an all-nighter to launch a website or taking a client's half-baked idea and turning it into a marketing masterpiece, I got pretty good at making things happen fast. Tight timelines? No problem. Client requests? Bring 'em on. And when the stress kicked in, we made sure to throw in a little humor to keep the team sane and the projects on track.

UI/UX Designer

Vault • New York, NY • 11/2009 – 01/2012

Senior Graphic Designer

Graphic Design Specialist

- Designing books was actually a valuable pillar into my design career. Developing a eye for leading, kerning and colors.

Lawn Doctor • Holmdel, NJ • 06/2006 – 06/2008

Graphic Designer

- At Lawn Doctor Inc.'s corporate office, I designed print and marketing materials for over 500 franchisees nationwide. My work ensured consistent brand standards across all locations while creating high-impact campaigns that supported local marketing efforts, seasonal promotions, and customer engagement. By delivering scalable, on-brand creative assets, I helped franchise owners effectively promote their services and grow their businesses.
