

FOR ENTERPRISES

Control

Fast-paced tight-deadline projects with moonshot ROI

If you are an engineering decision maker at an enterprise and are looking for a team

- ✓ that does not believe in 50 page decks
- ✓ that can conduct root-cause analysis thoroughly
- ✓ that can make a short term plan to keep the ship afloat
- ✓ that can get their hands dirty by simply getting things done

and more...

**Then Control is
for you!**

We conduct root-cause analysis to solve recurring system failures.

**We study the
infrastructure setup and
make optimisations to
improve customer
experience while
reducing IT costs.**

**We do not believe in a 50 page deck,
we get our hands dirty and
get things done.**

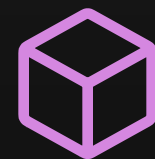

**What do we do
in Control?**

Identify problem context and root cause

Lay out short-term actions to foster a long-term plan

We get things done

Selected Work

**In 2021, we helped
Kotak Securities
turn around their 1.5
year data engineering
investment in three
weeks.**

180°

Ship turnaround stories

Our teams come-in, take quick actions and turn things around to create space for a long term roadmap.

78%

Improvement in Key System Metrics

Metrics such as time-to-recovery, release frequency, time-to-build features and tech-debt are improved.

Our Contributions

The Wednesday Show

We run a podcast where we talk about the design, development, marketing, and business of digital products.

We want to understand what it takes to build a digital business. So we can find better ways to build better and faster.
