ARCHITECTURAL TIMBER

ALTUS: Group 2 Fire-Rated Timber Lining

SPECIFY WITHOUT COMPROMISE

NATURAL TIMBER
BEAUTIFULLY FINISHED

GW Visualisation

Altus is a Group 2 fire-rated timber lining system designed for specification-led interiors where natural Paulownia, architectural finish and fire performance are equally important.

Crafted from natural Paulownia and treated through a specialised pressure impregnation process, Altus achieves Group 2 fire performance while retaining the refined character of the timber. The treatment is impregnated into the timber itself, rather than relying solely on a surface coating, allowing the natural grain and finish to remain central to the design.

Tested and assessed to achieve Group 2 fire performance in accordance with AS ISO 9705, with the test report issued by CSIRO, Altus offers greater flexibility for specifying natural Paulownia across commercial, hospitality, workplace and residential interiors.

PROFILES

90 x 9 x 3600mm
(Board Cover 86mm)

130 x 10 x 3600mm
(Board Cover 125mm)
