

GLOSSWOOD®

ARCHITECTURAL TIMBER

GW X VAARO

GW x Vaaro® Fire is the only fire compliant*, ultra-durable timber available as a complete coated and tested product range.

Combining the natural beauty of timber with enhanced durability and proven fire compliance*, GW x Vaaro is designed for projects where material performance and fire compliance are paramount.

Sourced from rapidly renewable, New Zealand Radiata plantations, GW x Vaaro is crafted for extreme conditions, providing an alternative to third-party treatments and old growth timbers traditionally used in high fire risk applications.

GW x Vaaro has been extensively tested to major fire compliance standards* around the world, both before and after weathering, in uncoated and coated form.

Australian fire compliance:
Exterior Cladding AS 3959, BAL-29
Interior Panelling AS 5637.1, Group 1

*Abodo's Vaaro has been tested to and has achieved AS/NZS 3837:1998 Type A and ISO 9705:2003 Group 1-S (NZ), AS 3959:2018 BAL29 and AS 5637.1:2015 Group 1 (AU) **Testing may vary across markets.
