

GLOSSWOOD®

ARCHITECTURAL TIMBER

EXTERNAL CLADDING GW X ABODO

Our collaboration with Abodo combines Glosswood's timber expertise with Abodo's sustainable, high-performance cladding.

Vulcan Vertical Grain is crafted from heat-treated, fast-renewable Radiata Pine grown in New Zealand. The heat-treatment process enhances stability, durability and coating performance for long-term exterior use.

Together, Glosswood and Abodo offer a cohesive timber solution across interior and exterior applications, uniting refined design, performance and sustainability.
