

# Provision your own self-service cloud environment in 30 minutes instead of 30 days

Public & Private sector businesses are taking full advantage of cloud technologies by empowering the business user

Until today, all provisioning and management of cloud services were performed by IT departments

IT departments are overburdened which creates a choke point

Now the business user can accomplish their missions on time and within budget

Launch a Zero Trust accelerator lab to evaluate & validate innovative technologies

Use Anantyx on AWS as your AI, ML and Cybersecurity Tools Test Kit

Establish Centers of Excellence (COE) based on relevant focus areas

Save Time and Cost while Increasing Productivity on All missions

Anantyx on AWS is a GovCloud ready cloud management platform accelerating the adoption of cloud service technologies

## Anantyx on AWS solves the need of non-IT Business cloud users

Create or change, Scale up or down and Add or delete cloud services

No user training or certifications needed

Access, manage, and evaluate new breakthrough technologies in a secure cloud environment

*"Finally, IT departments stop being merely a technology provider and become a technology orchestrator, accelerating, the adoption and use of complex cloud services by the business end user."*

Konstantin G. CTO

## Make budgeting & allocations easier

See Real Time Costs allocated by: Business Unit, Project, Team, and Individual, instead of by indecipherable CSP services nomenclature.

**Achieve your mission better, faster & cheaper.**

Bring the power of self-service cloud scalability and elasticity to your team.
