

## Curved Parts

Pre-curved metal framing ready when you need it. Instant quotes, fast shipping, and accurate geometry for straight-forward curved wall and ceiling projects. Provide a substrate that makes finishing simple.

With over 370 configurations, Radius Track has the part to suit your framing needs.

Track, slotted track, studs, angle, Z-furring, hat channel and CRC

## Kitted Framing

Prefabricated framing solutions delivered as organized systems. With labeled components, sequenced assemblies, and color-coded components, Radius Track simplify's installation and reduces labor in the field.

End-to-end support for complex geometry framing. Design collaboration, precision modeling, and installation guidance that bridge design intent with buildable reality.

## Why Radius Track?

Curves made. Simple.

# Why Radius Track? We Empower Teams.

Radius Track is not just a curved framing fabricator; we are a **framing partner helping you build for real-world construction.**

**Radius Track is the most complete curved framing solution by any comparison because we cover both sides of the job.** Contractors can order pre-curved components through Parts Online when the scope is straightforward, or step into a fully kitted solution when geometry, schedule, or risk demands more control. With broader gauge coverage (14–20 ga), steel and stainless options, a wide range of profiles, compound-curve capability, and flexible purchasing (online, direct, or distributor), Radius Track helps teams build complex geometry with confidence, at the level of support they need.

COMPANY	PRODUCTS	Offering	PRODUCT FEATURES *										NOTES
			Engineering	Gauges	Material	Profile Types	Profile #	Compound	Coating	Service Offering	Buying	Value	
Radius Track	Parts Online - eCommerce Systems - Kitted Solutions	Pre-curved	●	14 - 20ga	Steel, Stainless	Track, SLT, Angle, Z, Stud, Hat, CRC, Tabbled	Parts - 372 Systems - Unlimited	●	G60 & G90	●●●●	Online-Direct w/ Terms, or Distributor	Parts - \$ Kitted - \$\$\$	The customer determines the level of service they need, whether a part or a fully kitted solution; services include development, engineering, panels, trusses, labeled parts, installation drawings, deferred submittal, quotes with take-offs, constructability support, 3D model, and digital layout.

## 1. Two ways to buy with one technical backbone

- **Parts Online** (eCommerce) for fast, straightforward curved components
- **Kitted framing** for complete solutions when geometry or risk is a concern

Most competitors skew either "single product" or "one-off specialty," Radius Track covers all your framing needs.

## 2. Depth of profiles (not just track)

- Radius Track supports a broader set of profile types – the most globally and including custom profiles for unlimited possibilities.
- Coating options with stainless steel as an offering when needed
- 14 -20ga framing meeting your structural needs

## 3. Compound curves capability

Radius Track is one of the few companies that provide customized curved components including compound curves.

## 4. Procurement Flexibility

Radius Track offers multiple ways of buying our product - eCommerce for single curved parts, direct, or through your local distributor.

## 5. Service level is scalable (you decide)

At Radius Track, we meet you where you're at. We are the only company that can provide comprehensive services based on where you are in the project.

Whether you are bidding a project to win or in the middle of a complex build, we support your team with a service that aligns with their capabilities and skills. We level up your crew.

**We Meet You Where You're At.**
