

## Your Trusted **Partner.**

**We are a global provider of flexible and robust project maintenance solutions to Original Equipment Manufacturers and Plant Owners.**

[powerforce.global](https://powerforce.global)

We are committed to empowering Power and Energy companies worldwide with maintenance solutions that are as dynamic as they are dependable.

Leveraging extensive Original Equipment Manufacturer expertise, we tailor our services to meet your specific needs, wherever you are in the world.

## Efficient. Team. **Torque.**

Together,  
we **Deliver.**

# Teams That **Deliver.**

Our dedicated field service department mirrors the operational structures of Original Equipment Manufacturers (OEMs), but with a focused mission on providing skilled and semi-skilled workforce.

PowerForce Global ensures that our customers have access to a robust, reliable and dependable workforce for critical maintenance projects across energy infrastructure projects.

Technical  
Services.

# 01 Rotating Equipment Maintenance & Installation.

**We provide comprehensive rotating equipment services, from minor inspections to full scale overhauls.**

Our expertise covers disassembly and assembly, cleaning, calibration, alignment and balancing across:

- Gas Turbines
- Steam Turbines
- Generators
- Compressors
- Pumps & Motors
- Gear boxes

# 02 Balance of Plant & Auxiliary System Maintenance.

**We provide comprehensive repair and maintenance services across static mechanical equipment and instrumentation for balance of plant.**

Our expertise covers the maintenance, cleaning, inspections, disconnections/connections and on-site/offsite overhaul.

## 03

## Rigging & Lifting Services.

**We have an in-house team of NVQ Qualified Riggers and Crane Operators with extensive experience performing complex lifts during heavy-duty mechanical equipment maintenance and installation.**

Our dedicated Appointed Person can produce lift plans and deploy a full team of dedicated Riggers and Crane Operators for plant lifting activities.

## 04

## Fabrication Services.

**We provide a series of welding and fabricating services across industrial plant Turnarounds and power station Outages.**

Our dedicated team of Welders, Pipe Fitters and Platers have extensive experience working on Balance of Plant, Condensers and Heat Recovery systems and Combustors.

# 05 Sandblasting Services.

**We provide a range of on-site and offsite sandblasting services for Steam Turbines, Gas Turbine and Static Mechanical components ensuring we're a one-stop shop for our customers.**

- Abrasive (Grit) blasting
- CO2 (Dry) blasting
- Multiple Blast Cleaning Medias
- Provision of Tent & Equipment

# 06 Tooling & Consumables.

**We provide a series of 20ft Containers equipped with all necessary tools to perform our services including Metric and Imperial tooling equipment.**

- Hand Tools
- Spanners
- Sockets
- Hytorc
- Jacking
- Lifting
- Measuring
- Threading
- Hot Work
- Consumables
- COSHH
- Group-age
- PPE

Industry and Chemicals

## Our Industries.

**Our deep understanding of diverse sectors allows us to adapt, innovate, and deliver tailored solutions that meet the unique demands of your project.**

This breadth of experience ensures we can effectively navigate challenges and consistently provide high-quality results that drive success.

[powerforce.global/industries](https://powerforce.global/industries)

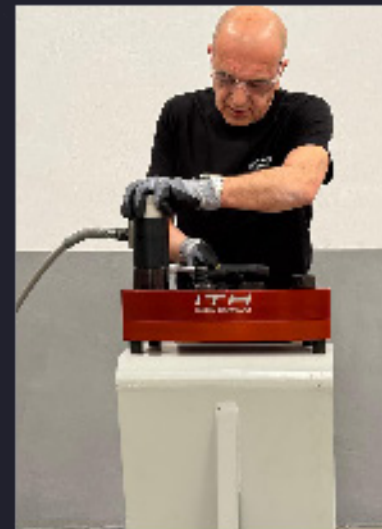

# Training and Development.

## Our Commitment to the Future.

**PowerForce Global has a dedicated Field Service training program.**

Our training centers are dedicated to empowering the global energy workforce through comprehensive apprenticeships and hands-on-training.

We re purposed Legacy Equipment from iconic plants like the Rattcliffe-on-Soar Coal Fired Station and Port Talbot Steel works, allowing their equipment to live-on and empower future generations of industrial workers. At our facility, we provide both theoretical and practical instruction to ensure our workforce is ready to perform from day one.

# Our Accreditations.

Our dedicated field service department mirrors the operational structures of Original Equipment Manufacturers (OEMs) but with a focused mission on providing skilled and semi-skilled workforce.

PowerForce Global ensures that our customers have access to a robust, reliable and dependable workforce for critical maintenance projects across energy infrastructure projects.

# Our Customers.

At PowerForce Global, we pride ourselves on building lasting partnerships with leading Original Equipment Manufacturers (OEMs), plant owners, and energy operators worldwide. Our collaborative approach delivers reliable maintenance solutions that minimize downtime, optimize performance, and drive operational excellence. Trusted by industry giants, we support critical projects across power generation, nuclear, oil & gas, and beyond.

“  
Powerforce went above and beyond to ensure our recent Steam Turbine Major was a resounding success. You can see they consider every detail and quality and safety are at the forefront of everything they do  
”

Western Europe  
Service Manager

## Partner **with us.**

Powerforce Global is the ideal partner for major energy projects worldwide, offering extensive experience, regional expertise, and a commitment to quality. Our tailored solutions – from tooling and vendor management to robust localisation strategies – ensure safe, efficient, and high-quality outcomes for your turbines, generators, and wider outage requirements. We look forward to discussing how we can support your operations and build a partnership that drives long-term success.
