# Cautionary Note

This presentation contains “forward-looking information” and “forward-looking statements” (together, the “forward looking statements”) within the meaning of applicable securities laws and the United States Private Securities Litigation Reform Act of 1995, including the Mineral Reserve Estimate and updated the Mineral Resource Estimate (“MRE”) which includes La Preciosa, the Avino Mine (consisting of the Elena Tolosa (“ET”) deposit, Guadalupe, and La Potosina) with an effective date of October 31, 2025. The Oxide Tailings Deposit mineral reserve estimate was completed in 2024 and is materially unchanged since its publication and has an effective date of January 16, 2024, and can be viewed within Avino’s latest technical report dated February 5, 2024 for the Pre-feasibility Study and references to Measured, Indicated Resources, and Proven and Probable Mineral Reserves referred to in this presentation. This information and these statements, referred to herein as “forward-looking statements” are made as of the date of this document. Forward-looking statements relate to future events or future performance and reflect current estimates, predictions, expectations or beliefs regarding future events and include, but are not limited to, statements with respect to: (i) the estimated amount and grade of mineral reserves and mineral resources, including the cut-off grade; (ii) estimates of the capital costs of constructing mine facilities and bringing a mine into production, of operating the mine, of sustaining capital, of strip ratios and the duration of financing payback periods; (iii) the estimated amount of future production, both ore processed and metal recovered and recovery rates; (iv) estimates of operating costs, life of mine costs, net cash flow, net present value (NPV) and economic returns from an operating mine; and (v) the completion of the full Technical Report, including a Preliminary Economic Assessment, and its timing. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives or future events or performance (often, but not always, using words or phrases such as “expects”, “anticipates”, “plans”, “projects”, “estimates”, “envisages”, “assumes”, “intends”, “strategy”, “goals”, “objectives” or variations thereof or stating that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements. These forward-looking statements are made as of the date of this news release and the dates of technical reports, as applicable. Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the future circumstances, outcomes or results anticipated in or implied by such forward-looking statements will occur or that plans, intentions or expectations upon which the forward-looking statements are based will occur. While we have based these forward-looking statements on our expectations about future events at the date that such statements were prepared, the statements are not a guarantee that such future events will occur and are subject to risks, uncertainties, assumptions and other factors which could cause events or outcomes to differ materially from those expressed or implied by such forward-looking statements.

**Cautionary note to U.S. Investors concerning estimates of Mineral Reserves and Mineral Resources**

All reserve and resource estimates reported by Avino were estimated in accordance with the Canadian National Instrument 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) Definition Standards. The U.S. Securities and Exchange Commission (“SEC”) now recognizes estimates of “measured mineral resources,” “indicated mineral resources” and “inferred mineral resources” and uses new definitions of “proven mineral reserves” and “probable mineral reserves” that are substantially similar to the corresponding CIM Definition Standards. However, the CIM Definition Standards differ from the requirements applicable to US domestic issuers. US investors are cautioned not to assume that any “measured mineral resources,” “indicated mineral resources,” or “inferred mineral resources” that the Issuer reports are or will be economically or legally mineable. Further, “inferred mineral resources” are that part of a mineral resource for which quantity and grade are estimated on the basis of limited geologic evidence and sampling. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

Peter Latta, VP Technical Services, Avino, a Qualified Persons for the Company as required by NI 43-101, has reviewed the technical information concerning the properties contained in this presentation for accuracy and have authorized its disclosure.

# A Primary Silver Producer and Explorer in Mexico

A growth strategy that positions Avino to intermediate-producer scale

## PROJECT PORTFOLIO

**Avino Mine - Production**

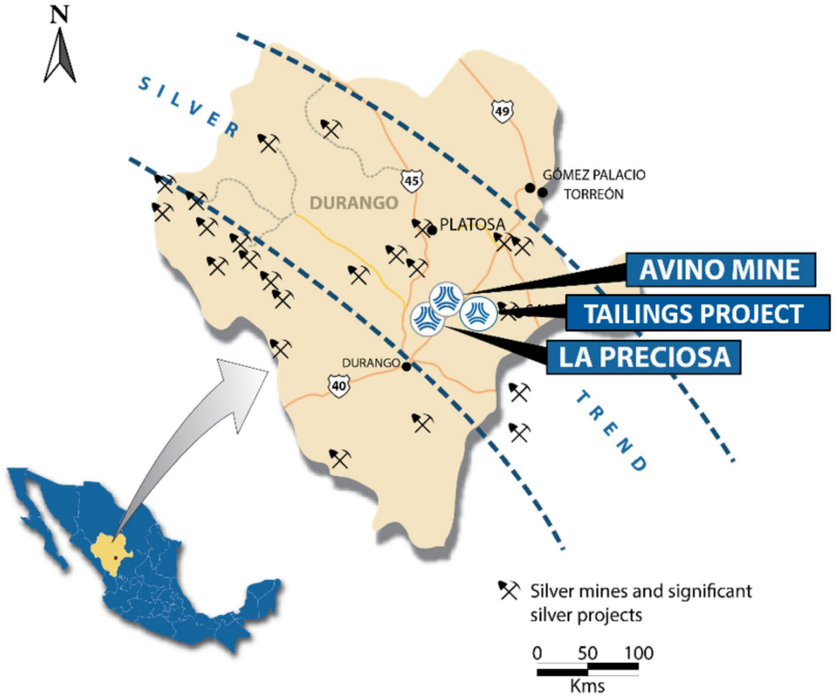

- Disciplined Producer generating free cash flow
- 500 year history & decades of mine life ahead
- 2,500 tonnes per day with 4 circuits

**La Preciosa - Development**

- One of the largest permitted silver assets in Mexico
- Processing at 400 to 500 tpd
- 19 km to the Avino mill

**Oxide Tailings Project - Development**

- Pre-Feasibility Study Completed in 2024

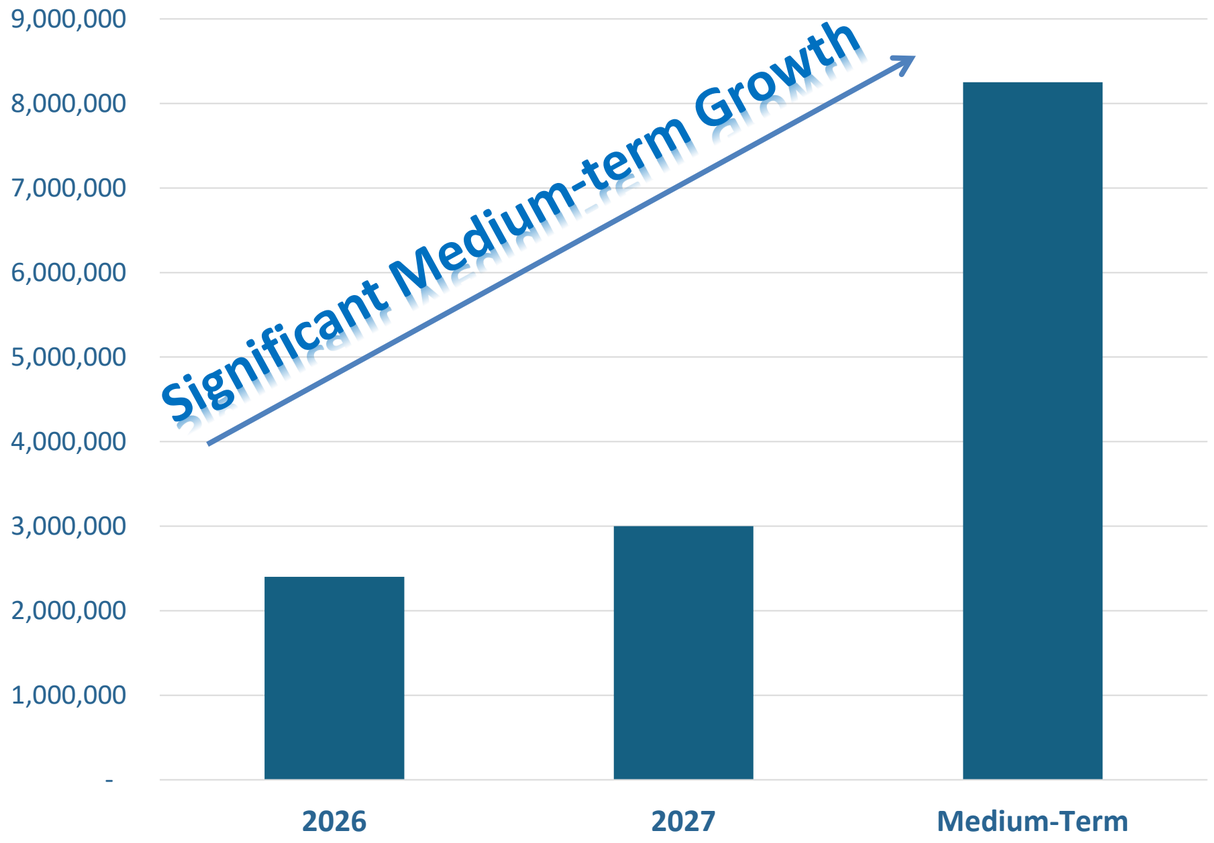

## LARGE SILVER EQUIVALENT RESOURCE BASE

- **127 million AgEq oz of proven and probable mineral reserves** *NI 43-101 effective date October 31, 2025*
- **301 million AgEq Oz of measured and indicated mineral resources** *NI 43-101 effective date October 31, 2025*
- **~70% pure silver**

# Medium-Term Outlook: 8 – 10Moz AgEq Producer

Building a platform for sustained silver production growth

Consolidated production profile: Avino, La Preciosa and Oxide Tailing Project

**Pathway to 10+ Million Silver Equivalent Ounces**

- 2026 Production Guidance: 2.2M – 2.5M AgEq oz
- 2027 Production: 3M AgEq oz
- Multiple organic growth opportunities across Avino's asset portfolio

**Growth Catalysts**

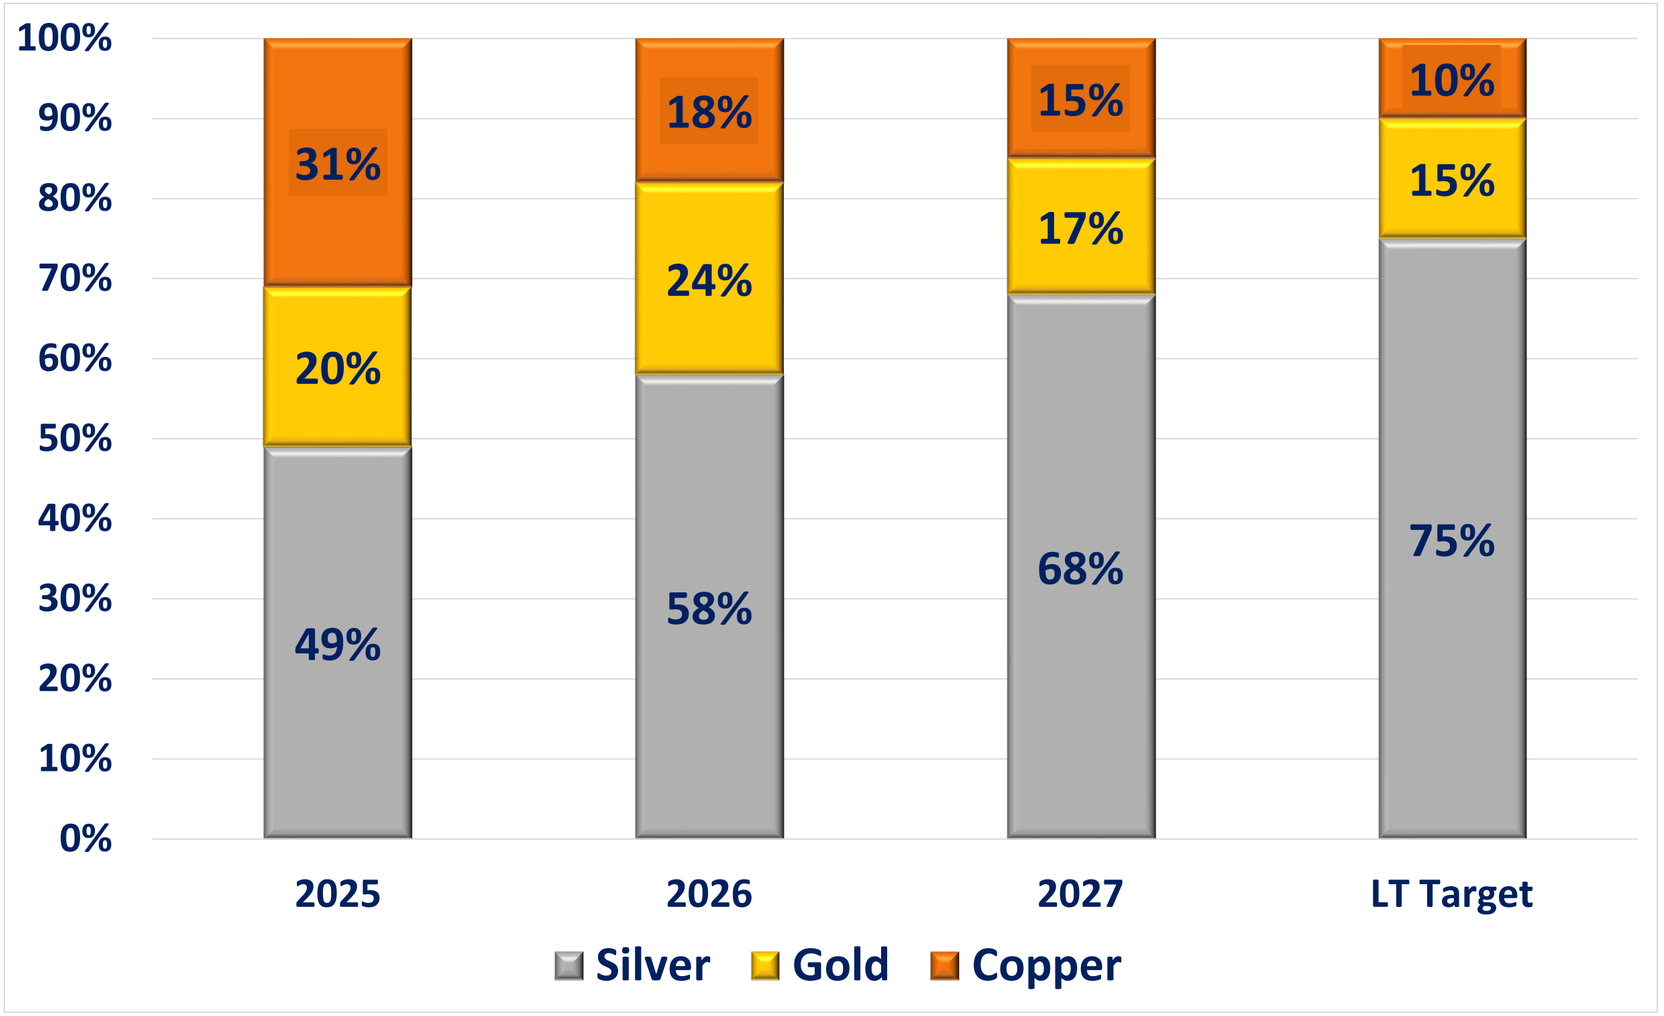

- La Preciosa development and scale up – potential standalone plant
- Expansion opportunities at the Avino processing plant
- Trade off studies and evaluation ongoing

**Long-Term Growth Potential**

- Oxide Tailings Project
- Additional Reserve Conversion and Resource Expansion

# Production Profile – Return to Primary Silver

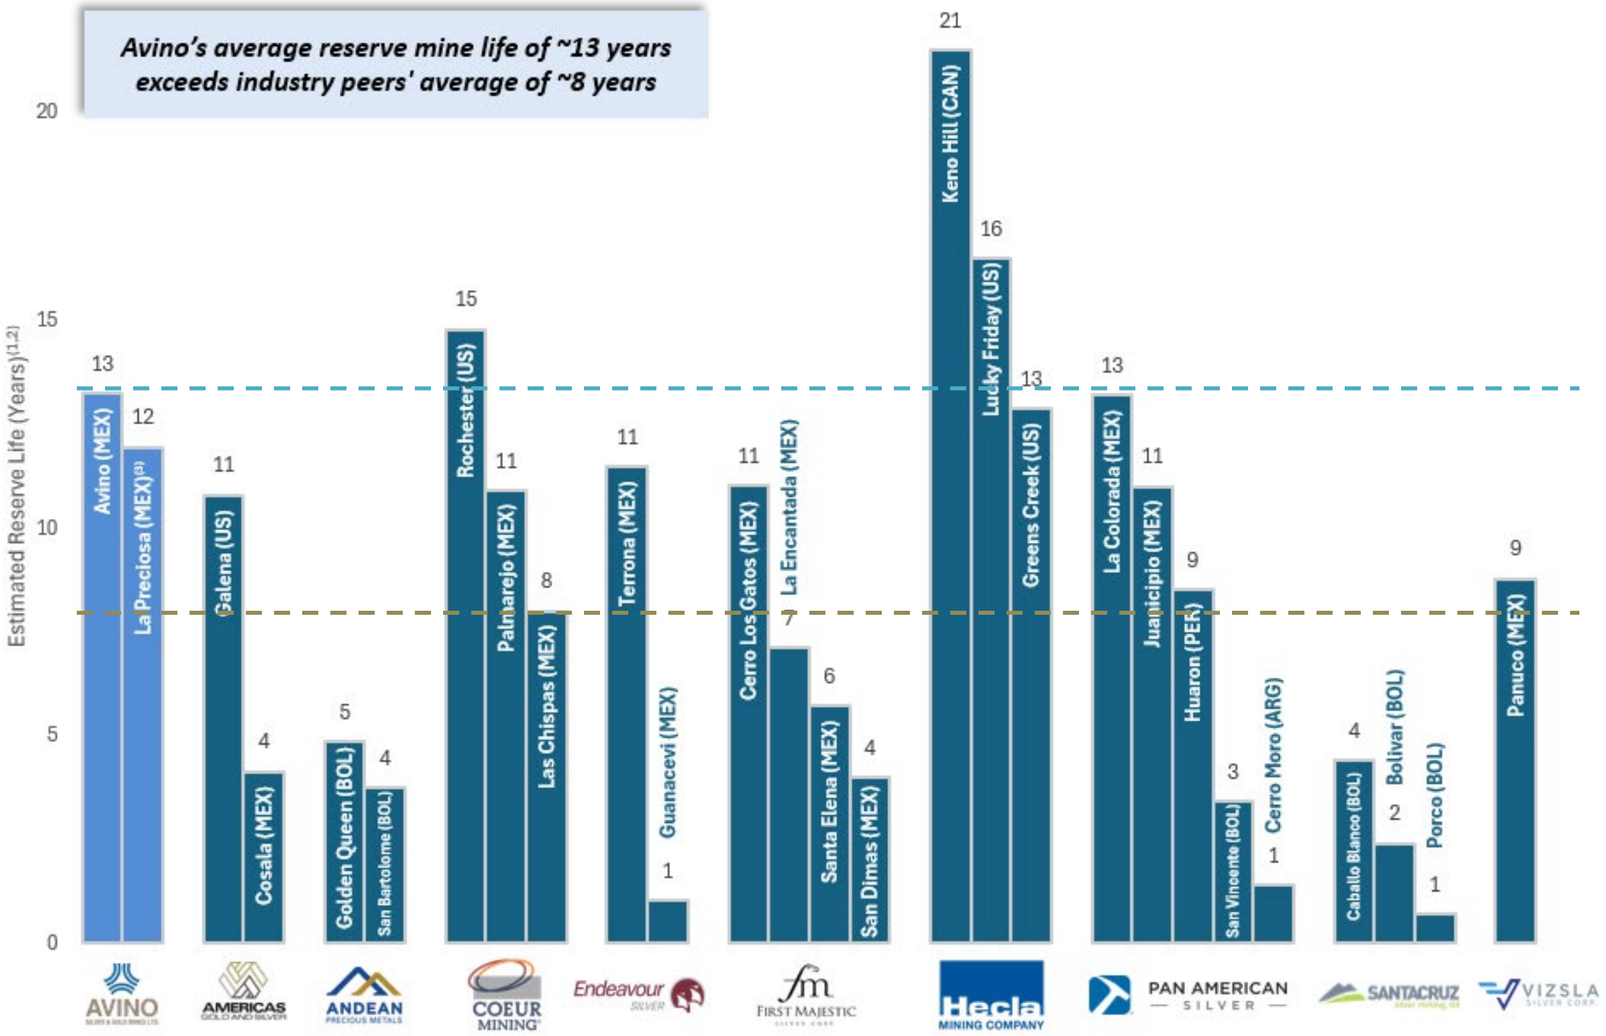

## Revenue Mix by Metal

# Long Reserve Lives

**Avino's Avg Reserve Mine Life: 13 years**

**Industry Peers Avg Reserve Mine Life: 8 years**

# The value of Avino Recognized Through it's Transformational Growth Strategy

### Dry-Stack Facility
Avino made an investment in it's tailings management system. Our ongoing commitment to safey and environmental stewardship. The facility completed and commissioned on the Avino property

### Strategic Acquisition
Avino acquired the La Preciosa property from Coeur Mining, with it's proximity only 19 km away from the Avino property and infrastructure

### Significant Mineral Resources
Adds to resources and now has large silver equivalent resource base with 371M AgEq ozs

### Pre-Feasibility Study
Completed a pre-feasibility study on the Oxide Tailings project marking major milestone in growth plan

### La Preciosa - Update
Received required mining permits, underground development commences

### Recognition top TSX30
Included in the TSX 2025 TSX30 at 5th spot. Previous 3 years share performance increased 610% & market cap increased 778%

### Avino Mine
Annual Production of 2.6M AgEq ounces

### Best Intercepts in Company History
Drills best intercept in Company history at the ET area of the Avino System, below Level 17 of current workings

### Coeur Sells Position in ASM
Coeur sells 14,000,000 common shares of Avino through secondary offering

### Record Revenues
Achieves high production levels, record revenues and cash flow generation

### Acquires Outstanding Royalties
Acquires all royalties and contingent payments, acheives 100% owndership of La Preciosa

### Inaugural MIneral Reserves
Consolidated mineral reserves of 127M ozs AgEq and 301M AgEq oz of measured & indicated mineral reserves

*Avino's share price shown in USD

*The silver price from January 2022 until June 2026

# Financial Highlights – Q3 2026

## Financial and Operating Results

- Quarterly revenues of **$33.4M**
- **55%** of revenues generated from silver ounces sold, over 90% from precious metals
- **44%** gross profit margin, **49%** on a cash basis
- Net income after taxes – **$6.1M** ($0.03/share)
- Adjusted earnings* – **$14.3M** ($0.08/share)
- Operating cash flows* – **$12.7M** ($0.07/share)
- Free cash flow excluding La Preciosa development* - **$6.0M**

## Balance Sheet

- Cash: **$138 million**; Working Capital: **$142 million**
- **Debt-free** excluding operating equipment leases

**See Footnotes & Non-IFRS Accounting Standards reconciliations sections in Appendix A*

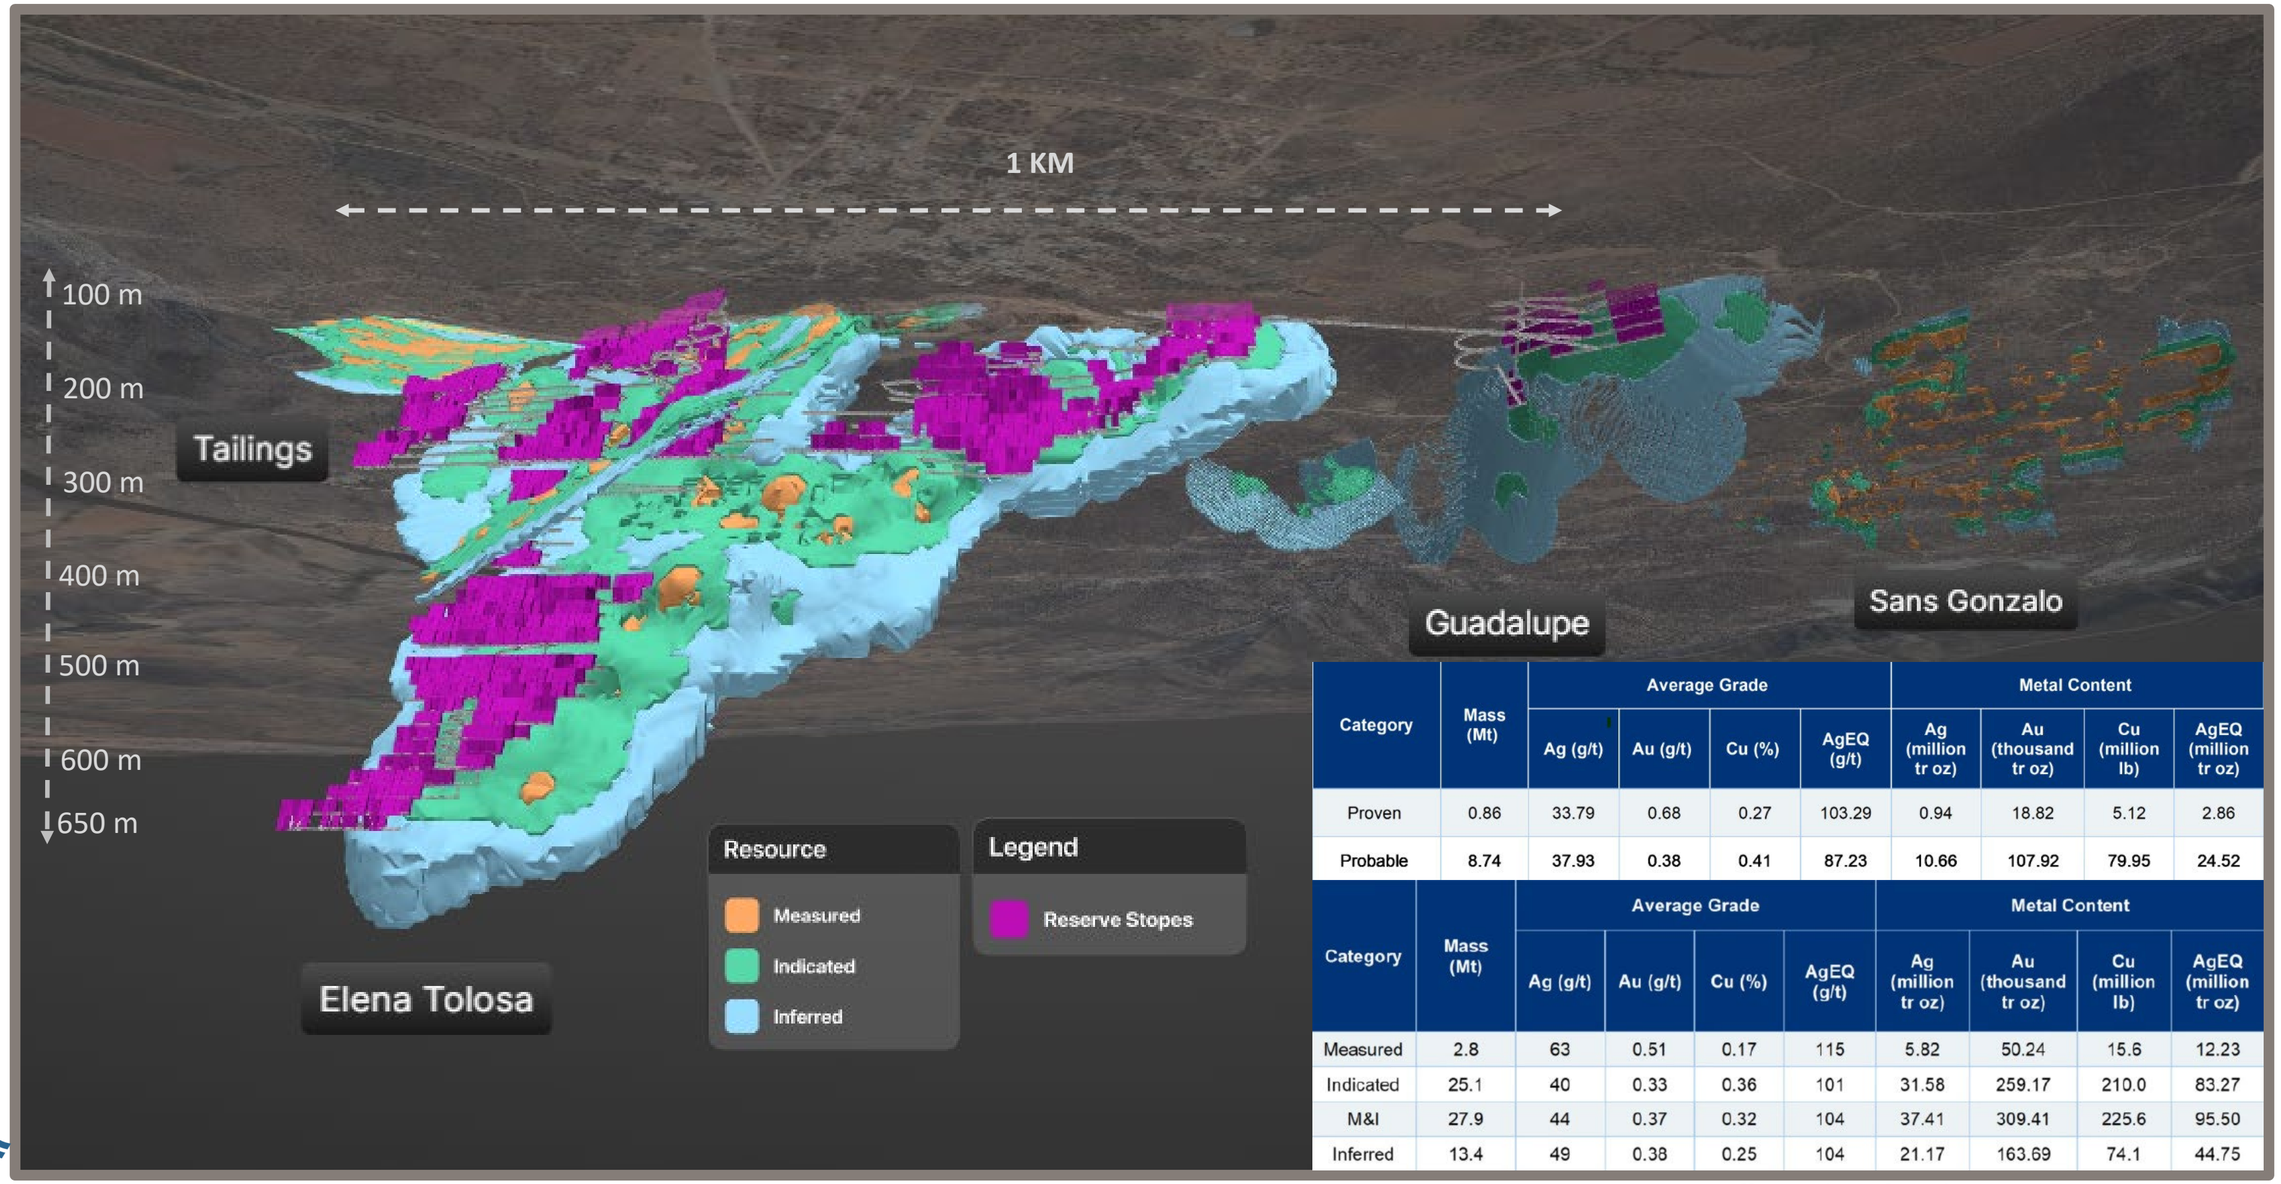

# The Avino Mine – **500 years of history**

- Mine type: Underground
- Metals Mined: Ag, Au, Cu
- 2,500 tpd flotation plant

- ~ 12 years of Mineral Reserves
- Large Mineral Resource inventory
- ~ 2-3 M AgEq ozs annually since 2015

# Footnotes

**Slide 4**

1. *"AgEq" production forecasts were made using long-term metal price forecasts at the time and material changes to these prices will impact AgEq production totals in future periods.*

**Slide 5, 8, 14-16**

1. *Silver equivalent or "AgEq" was calculated using metal prices of $45.30 per oz Ag, $3,929 per oz Au and $4.85 per lb Cu. These metal prices are based on the Company's 2026 budget as approved by the Board of Directors, and previous periods have been recalculated using these prices for comparability purposes. Calculated figures may not add up due to rounding.*
2. *"Silver equivalent payable ounces sold" for the purposes of cash costs and all-in sustaining costs consists of the sum of payable silver ounces, gold ounces and copper tonnes sold, before penalties, treatment charges, and refining charges, multiplied by the ratio of the average spot gold and copper prices to the average spot silver price for the corresponding period.*
3. *Non-IFRS Accounting Standard measure. These measures are widely used in the mining industry as a benchmark for performance, but do not have a standardized meaning under IFRS Accounting Standards and the calculation methods may differ from methods used by other companies with similar reported measures. See Non-IFRS Accounting Standards Measures section for further information and detailed reconciliations.*

***Slide 22, 29-30***

*Notes for UG Reserves*

1. *Totals may not sum due to rounding.*
2. *Underground Mineral Reserves as of October 31, 2025 are derived from Measured &Indicated Resources, account for depletion to that date, and are reported with a reference point of mined ore delivered to the plant.*
3. *Metal prices considered for the underground Mineral Reserves estimates were US$36.90/t.oz Ag, US$3,210/t.oz Au, and US$4.4/lb Cu. Other key assumptions and parameters include metal recoveries (89% Cu, 74–70% Au, and 87–80% Ag), payable factors applied on a deposit-specific basis (83–96% Ag, 95% Au, and 96.75% Cu), treatment and other smelter charges (US$134.25–68 per dry metric tonne), freight to smelter (US$45 per wet metric tonne), refining charges for silver, gold, and copper (US$0.30/oz Ag, US$6.00/oz Au, and US$0.07/lb Cu), and applicable concentrate penalties. Mining, processing, and G&A operating costs for the Gloria, Abundancia, and Martha veins were estimated at US$75.31/t, US$55.21/t, and US$60.89/t for mining; US$18.45/t for processing; and US$16.80/t for G&A, respectively, resulting in NSR breakeven cut-off values of US$110.56/t for Gloria, US$90.46/t for Abundancia, and US$96.14/t for Martha.*
4. *AgEQ grade is estimated considering metal price assumptions, metallurgical recovery for the corresponding mineral type/mineral process and the metal payable of the selling contract as of effective date.*

*Notes for Oxide Tailings Reserves*

1. *No material change has occurred since the 2024 PFS; reviewed by the QP and remains valid under current assumptions.*
2. *The effective date of the Oxide Tailings Reserves Estimate is January 16, 2024.*
3. *Reserves estimated assuming open pit mining methods*
4. *Reserves are reported on a dry in-situ basis*
5. *Reserves are based on a gold price of US $1850/tr oz., and silver price of US $22/tr oz, mining cost of US$1.00/t mined, milling costs of US$18.00/t feed, and USG&A cost of US$3.00/t feed.*
6. *Mineral Reserve includes consideration for 1% mining dilution and 99% mining recovery.*
7. *Ore-waste cut-off was based on US$21.00/t of NSR.*
8. *AgEQ grade is estimated considering metal price assumptions, metallurgical recovery for the corresponding mineraltype/mineral process and the metal payable of the selling contract as of effective date.*

*Notes for Resources*

1. *Totals may not sum due to rounding.*
2. *Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.*
3. *The Mineral Resource estimate is classified in accordance with the CIM Definition Standards for Mineral Resources and Mineral Reserves incorporated by reference into NI 43-101 Standards of Disclosure for Mineral Projects ("NI-43-101").*
4. *The Measured and Indicated Mineral Resources are inclusive of those Mineral Resources modified to produce the Mineral Reserves*
5. *Based on recent mining costs, Mineral Resources are reported for Avino at cut-offgrades of 55 g/t, 130 g/t, 100 g/t for Avino ET, Guadalupe, and La Potosina, respectively.*
6. *Based on recent mining costs, Mineral Resources are reported at La Preciosa Agrecovery 80%, Au Recovery 70%, Ag price $36.90/t. oz., Auprice $3,210/t. oz. Cut-off grades in silver equivalent grades (AgEQ),Avino Mine – 55 g/t, La Preciosa Underground – 120 g/t, Oxide Tailings -50 g/t.*
