NMLC	NQ	HQ	PQ	PULL BACK	AUGER	ROTARY MUD

OVERVIEW

MK08 is a compact, high-capacity drilling rig designed to deliver strong drilling performance while maintaining a small site footprint. Its rubber tracks, small chassis and swing around mast extension make it well suited for sites where tight access and manoeuvrability are important.

FULL SPECIFICATION

ROTARY DRIVE HEAD	3,530 NM	MAIN WINCH CAPACITY	3,000 KG
PULL DOWN	4,000 KG	WIRELINE WINCH CAPACITY	Approx. 500m
Feed stroke	3.5 KG	Transport LxWxH	5.4m x 1.9m x 2.0m
DTH DRILLING	7 inches	SAMPLING	Push Tube/SPT sampling/Core
SPT HAMMER	Automatic	MUD PUMPS	High Volume Mono, L09 Bean Pump
HEIGHT EXTENDED	8.6 M	Engine	Kubota V3300-T

SAFETY & COMPLIANCE

- Emergency stop controls positioned for rapid shutdown
- Rotation guarding around rotating drilling components
- Safety lockout switch for drill cage
- Updated fire certificates
- Regular inspection and certification of lifting equipment
