THE US EDUCATION CONUNDRUM

If **2900+ apps** and **\$30B** a year **can't find a solution**, we should just **give up**, right?

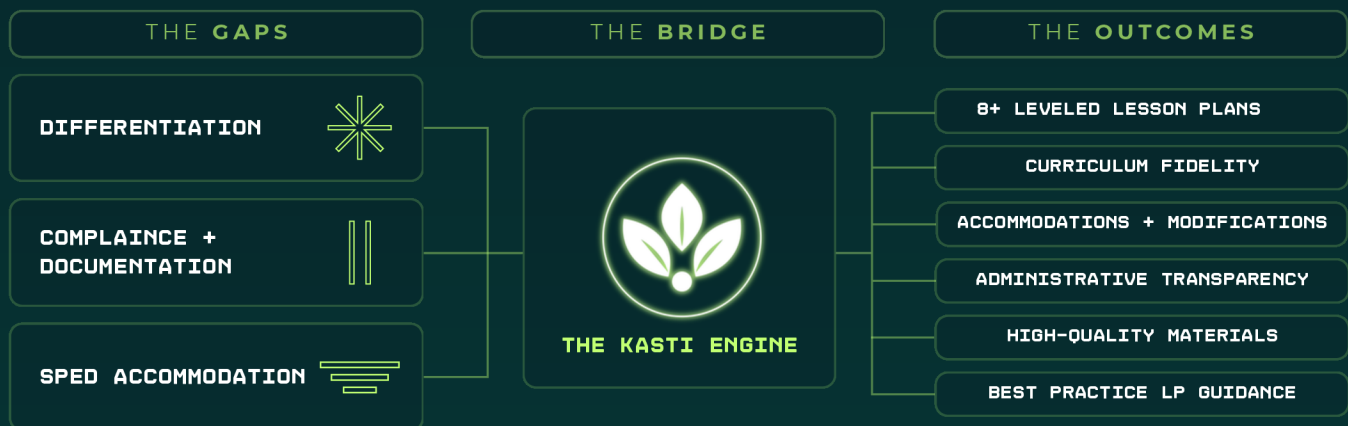

Would you believe with **Kasti...**

- ★ **50%** of teachers' non-instructional work is **automated**
- ★ Schools **save money**
- ★ Every student receives **high-quality, personalized education**, regardless of background or ability

...and that **no one else** is doing this?

We get it, we'd be **skeptical of us too.**

We **bridge** the gaps to **unlock** limitless potential.

Everyone **wins.**
Yay EdTech

- + Administrators gain **transparency**
- + Teachers regain **autonomy**
- + Students have **agency**
