

# AI-powered acoustic monitoring to enhance healthcare.

Transforming support for the most vulnerable through AI that analyzes sounds.

## The solution

The box connects to Wi-Fi, analyzes everyday sounds in the room.

Critical or alarming sounds are automatically detected by our AI, and triggers an immediate alert, while fully maintaining the privacy of residents.

Real-time, qualified alerts are instantly delivered to caregivers through the Smartphone

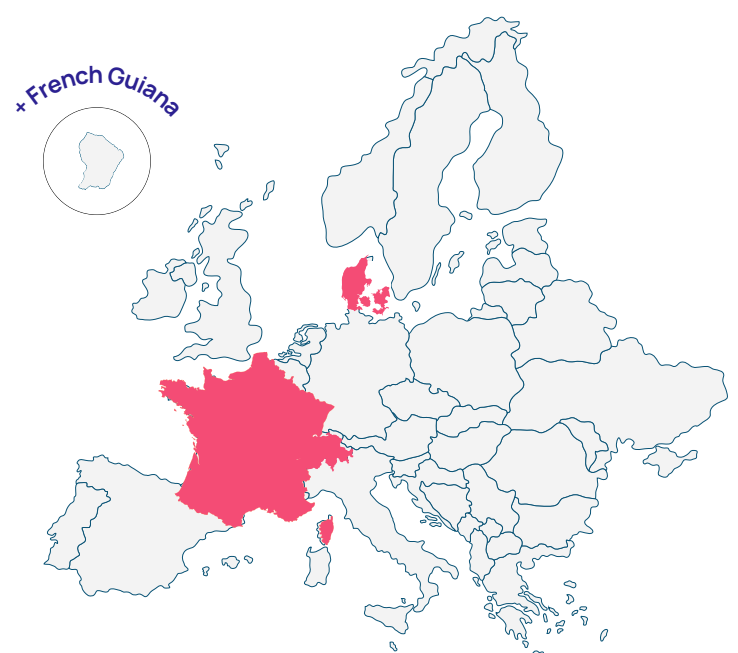

## Continuous and discreet monitoring

Thanks to **acoustic monitoring**, Orikio detects falls, calls for help, respiratory distress, and other emergencies, alerting caregivers in real-time.

- Enhance safety day and night
- Ensures recovered caregiver time
- Providing peace of mind to families

## Tailored to **your** needs

Built on real-life training data, Orikio adapts to every user and learns the acoustic signatures of each living environment.

**+ 3 500**

EQUIPPED ROOMS IN EUROPE

## The **impact on the field**, in a few key figures

**1h**

time regained per caregiver

**100 %**

recommendation

**180**

respiratory distress cases detected per month
