

## FRENCH AI GOES GLOBAL

orikio, **dedicated to healthcare and people**, has developed a disruptive technology: an **AI-assisted acoustic monitoring solution** that is revolutionising everyday life in medical and social care facilities (nursing homes, residential care homes, facilities for people with disabilities).

Our mission: **to transform the care of the most vulnerable through AI that analyses sounds to detect abnormal situations** (falls, cries for help, vomiting, etc.) in real time, without the need for wearable sensors or video surveillance. **Discreet, non-intrusive and respectful of privacy**, this innovation speeds up interventions, enhances resident safety and improves the quality of life of carers. Guided by a clear vision of more humane, attentive and responsive care, **orikio places ethics, practical utility and impact at the heart of its development**.

orikio demonstrates that **AI made in France** can understand essential sounds in a wide variety of environments: care homes, disability facilities and private homes, anywhere in the world, regardless of language.

### OUR NOTABLE PUBLIC PARTNERS

With more than **50 employees**, supported by strong strategic partners, and with more than **€14 million raised**, orikio has established itself in France as a key player in e-health.

It is now continuing its **large-scale deployment**, with expansion underway in **Northern Europe and Japan**. Our ambition is clear: to **become the global benchmark for acoustic monitoring** and transform the way we support vulnerable people.

In 2024, Orikio was named **Start-up of the Year by EY France** at the Entrepreneur of the Year Awards, a significant recognition that confirms our role as a pioneer of ethical and useful innovation in the healthcare sector. By the end of the year, the company will have **12 patents filed**, demonstrating the technological strength and innovative capacity of its solution.

## A JOURNEY MARKED BY INNOVATION AND RECOGNITION

orikio has distinguished itself by participating in various projects and awards, including the following examples:

orikio named **Start-up of the Year** in the Brittany region and then nationally.

orikio selected by the **Ministry of Economy** to present its solution at an event related to the **Paralympic Games**.

Included in the **anti-fall plan of the Ministry responsible for independence**.
