

Saw Filer Vocational Training 2026

Burton Mill Solutions offers a range of saw filer vocational trainings to teach the next generation the basics of saw filing and help experienced professionals build on existing skills and knowledge.

Each comprehensive three-day course includes hands-on training and classroom instruction from our Cutting Tool Specialists, who have decades of experience and a passion for sharing their knowledge. Each course covers a primary focus and other major skills required for proper blade and equipment maintenance. We'll provide cut-resistant PPE, practice saw blades and other tech center equipment, printed materials, and daily lunches.

All training sessions are hosted at the Burton Mill Solutions Technical Center (formerly the Simonds International Technical Center) at 1920 N Cashua Dr, Florence, SC 29501.

Contact our technical center administrator **Patrick Chandler (patrick.chandler@burtonmill.com)** to sign-up.
