

Disposable Planer Knife System

Introducing the Disposable Planer Knife System with our (patent pending) 2-sided knife design. This innovative dual-sided knife allows for both flat- and side-head cutting options. The design and quality is versatile and durable, and can revolutionize your operation, giving it the edge you need to take your production to the next level at a fraction of the cost.

The Disposable Planer Knife System requires fewer head changes, leaving fewer opportunities for accidents to occur and offering you more uptime with less maintenance. Extending your run time will also keep your operating costs down.

Keep your operation optimally efficient with our patent-pending technology. Experience cutting-edge performance that saves you time, reduces risks, and increases your profits.

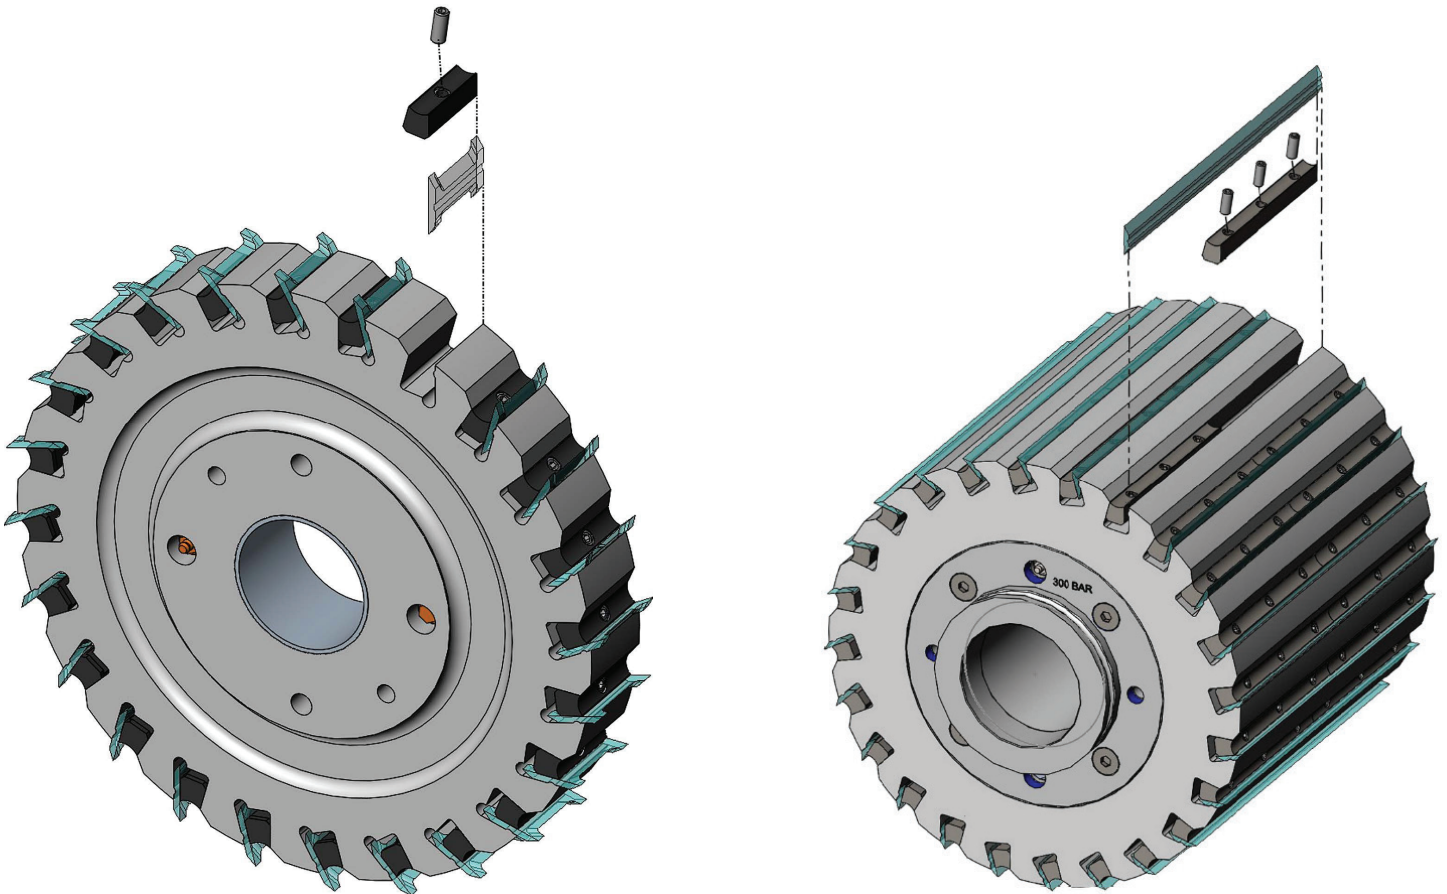

For more details contact us today!

The heads can be manufactured to accommodate all major makes of high production planers. If you have an interest in upgrading, contact us about taking the first step toward reaping the benefits of the Disposable Planer Knife System. We offer options for low up-front cost conversions.

Key Features:

- Innovative patent pending 2-sided knife system for flat- and side-head cutting options
- Lowest tooling cost per board foot in the industry
- Reduced jointing time for smoother operation and minimal downtime
- Industry-leading run times for higher productivity and greater profits
- Fewer head changes for a lower risk of injury, as well as eliminated time-consuming grinder operations
- Superior tolerances and precision for a cleaner, more accurate cut
- Innovative gib & head design to reduce wear and tear, enhancing the longevity of equipment
- Compatible with all high-production planer models
