

GALE™

HERBICIDE

FOR SELECTIVE MANAGEMENT OF SURFACE, SUBMERGED AND EMERGENT AQUATIC WEEDS IN BAYOUS, DRAINAGE DITCHES, LAKES, MARSHES, NON-IRRIGATION CANALS, PONDS AND RESERVOIRS

GALE™ Herbicide is a selective herbicide for the control of a wide range of stored and flowing water aquatic weeds. It controls submerged, floating and emergent weeds including hydrilla and other hard-to-control species. GALE™ works by inhibiting acetolactate synthase (ALS), stopping weed growth quickly. Its water soluble powder formulation allows for easy mixing and flexible application options for effective aquatic weed management.

GROUP

2

HERBICIDE

SELECTIVE AQUATIC WEED CONTROL

EFFECTIVE ON SUBMERGED, FLOATING & EMERGENT WEEDS

FAST ACTING WITH LONG LASTING RESIDUAL

PROVEN & RELIABLE PERFORMANCE

ACTIVE INGREDIENT:

By Wt.

Bispyribac-sodium (sodium 2,6-bis[(4,6-dimethoxypyrimidin-2-yl)oxy]benzoate)	80.0%
Other Ingredients:	20.0%
Total:	100.0%

GALE™ Herbicide is a soluble powder containing 80% active ingredient.

BROAD SPECTRUM CONTROL

Controls a wide range of surface, submerged and emergent aquatic weeds including hydrilla and other hard-to-control species.

FLEXIBLE APPLICATION

Can be applied as a subsurface or surface application for maximum flexibility and effective weed control.

FAST ACTING RESULTS

Inhibits weed growth quickly by targeting ALS enzyme for visible results and long-lasting control.

PROVEN PERFORMANCE

Trusted and used by aquatic weed managers for consistent and dependable results.

WHY CHOOSE GALE™ ?

FEATURE	GALE™
Active Ingredient	Bispyribac-sodium
Herbicide Group	Group 2
Mode of Action	ALS Inhibitor
Control Spectrum	Surface, Submerged & Emergent Aquatic Weeds
Application Sites	Lakes, Ponds, Reservoirs, Canals, Ditches, Marshes & More
Formulation	Soluble Powder
Application Method	Subsurface or Surface Application
Use Sites	Quiescent, Slow Moving & Flowing Water Sites
Rate of Action	Fast Acting
Residual Activity	Long Lasting
Ease of Use	Easy-to-Mix & Apply Water Soluble Packets

IDEAL FOR USE IN:

- Lakes & Ponds
- Reservoirs
- Non-Irrigation Canals
- Bayous & Drainage Ditches
- Marshes & Wetlands
- Golf Course Water Hazards
- Aquaculture & Fish Ponds
- Industrial & Stormwater Ponds
- Quiescent, Slow & Flowing Water Bodies

CONTROLS A WIDE RANGE OF WEEDS

See label for complete list of controlled species.

TECHNICAL SNAPSHOT

Active Ingredient	Bispyribac-sodium
Concentration	80.0%
Herbicide Group	Group 2
Mode of Action	ALS Inhibitor
Formulation	Soluble Powder
Use Sites:	Wide Range
Application	Subsurface / Surface
Rate of Action	Fast Acting
Residual Activity	Long Lasting

APPLICATION METHODS

- Subsurface Applications
 - Surface Applications
 - Direct Spot Treatments
 - Boat / Hand Broadcast
 - Aerial Applications
- See label for complete directions and use instructions.

PRODUCT FEATURES

- Selective control of aquatic weeds
- Controls submerged, floating and emergent weeds
- Effective in a wide range of water conditions
- Long residual activity
- Water soluble packets for easy mixing
- Proven, reliable performance

EPA REG. NO. 83529-187
