

Sharda Cropchem USA

DEFEAT™

FUNGICIDE

SYSTEMIC PROTECTION.

Uptake through roots & foliage.

LONG-LASTING CONTROL.

For control of diseases on ornamental plants; ornamental bulb, corm, and tuber plants; conifers and conifer nurseries; Christmas trees and Christmas tree plantations; forest plantations; forest nurseries; and non-bearing citrus trees and fruit and nut plants grown in greenhouses and nurseries (including field- and container-grown plants grown outdoors and in shade houses, lathhouses and other production sites and structures), retail nurseries, residential and commercial landscapes, and interior plantscape ornamentals.

For control of disease of vegetable transplants grown for retail sale to consumers.

For control of turf diseases on golf courses; lawns; landscape areas around residential, institutional, public, commercial, and industrial buildings; parks, recreational areas, and athletic fields; and sod farms.

ACTIVE INGREDIENTS:

By Wt

Mefenoxam*	22.0%
Other Ingredients:	78.0%
Total:	100.0%

*CAS No. 70630-17-0 and 69516-34-3

DEFEAT™ is formulated as a soluble liquid (SL) and contains 2 lb mefenoxam per gallon.

SYSTEMIC PROTECTION

UPTAKE THROUGH ROOTS & FOLIAGE

LONG-LASTING DISEASE CONTROL

FOR GREENHOUSE, NURSERIES & LANDSCAPES

SYSTEMIC ACTION

Absorbed by the plant and translocated to provide complete protection.

BROAD-SPECTRUM CONTROL

Controls a wide range of important soil-borne and foliar diseases.

LONG-LASTING RESIDUAL

Provides extended residual activity for season-long protection.

VERSATILE USE

For ornamentals, turf, vegetable transplants, nurseries & more.

DEFEAT™

FEATURE	DEFEAT™
Active Ingredient	Mefenoxam 22.0%
FRAC Group	4
Chemical Group	Phenylamide
Mode of Action	Systemic (Phenylamide Fungicide)
Activity	Systemic
Movement in Plant	Via roots and foliage
Formulation	SL (Soluble Liquid)
Application	Foliar Spray, Soil Drench, Chemigation
Use Sites	Greenhouse, Nursery, Landscape, Turf, Vegetable Transplants
Signal Word	CAUTION
