

**Billions in institutional capital have  
been waiting to move on-chain**

**The wait is over**

**RAZE**  **ON XDC**

The global market for on-chain yield

# Meet the Raze Team

- **30 years of experience** in startups and enterprise software development
- **10 years** in blockchain architecture
- **35+ years** in capital markets, Managing Director at a FINRA-registered Broker-Dealer (Series 7 & 63)
- **\$2.8B+** in private placements and investment contracts

## The Problem:

Real-world assets lack a turnkey, scalable pathway to be structured, launched, and operated as compliant, on-chain **yield products**.

**TradFi built the capital markets**

**Crypto built the technology**

It's time for a **better bridge**

## The Solution:

Raze enables issuers to launch compliant, RWA-backed yield products while giving investors access to institutional-grade, **on-chain yield**.

- **A first-of-its-kind onboarding platform** for both Asset Managers, Issuers and Investors, including white-glove services.
- **End-to-end** issuance, onboarding, compliance, and investor operations —handled through a single workflow.
- **A vault marketplace** offering USDC-based yields to traditional and crypto-native investors.

# What Raze on XDC solves

## For Asset Owners/Issuers:

- 90% reduction in costs of issuance
- Faster speed to market
- Expanded global investor reach
- Off-chain managed funds accessible on-chain
- Supports Reg D and Reg S exempt offerings

## For Investors:

- Accessible and regulated offerings on-chain
- Invest with USDC, earn in USDC with no restrictions
- Competitive yields paid out daily, monthly, or quarterly
- Lower minimums for investors to participate

## Built for Investors:

- Institutions
- Family Offices
- HNWIs
- Protocols
- Exchanges

# It's all about the **stablecoin**

Raze overcomes major hurdles to institutional adoption, yet remains simple through its use of stablecoins.

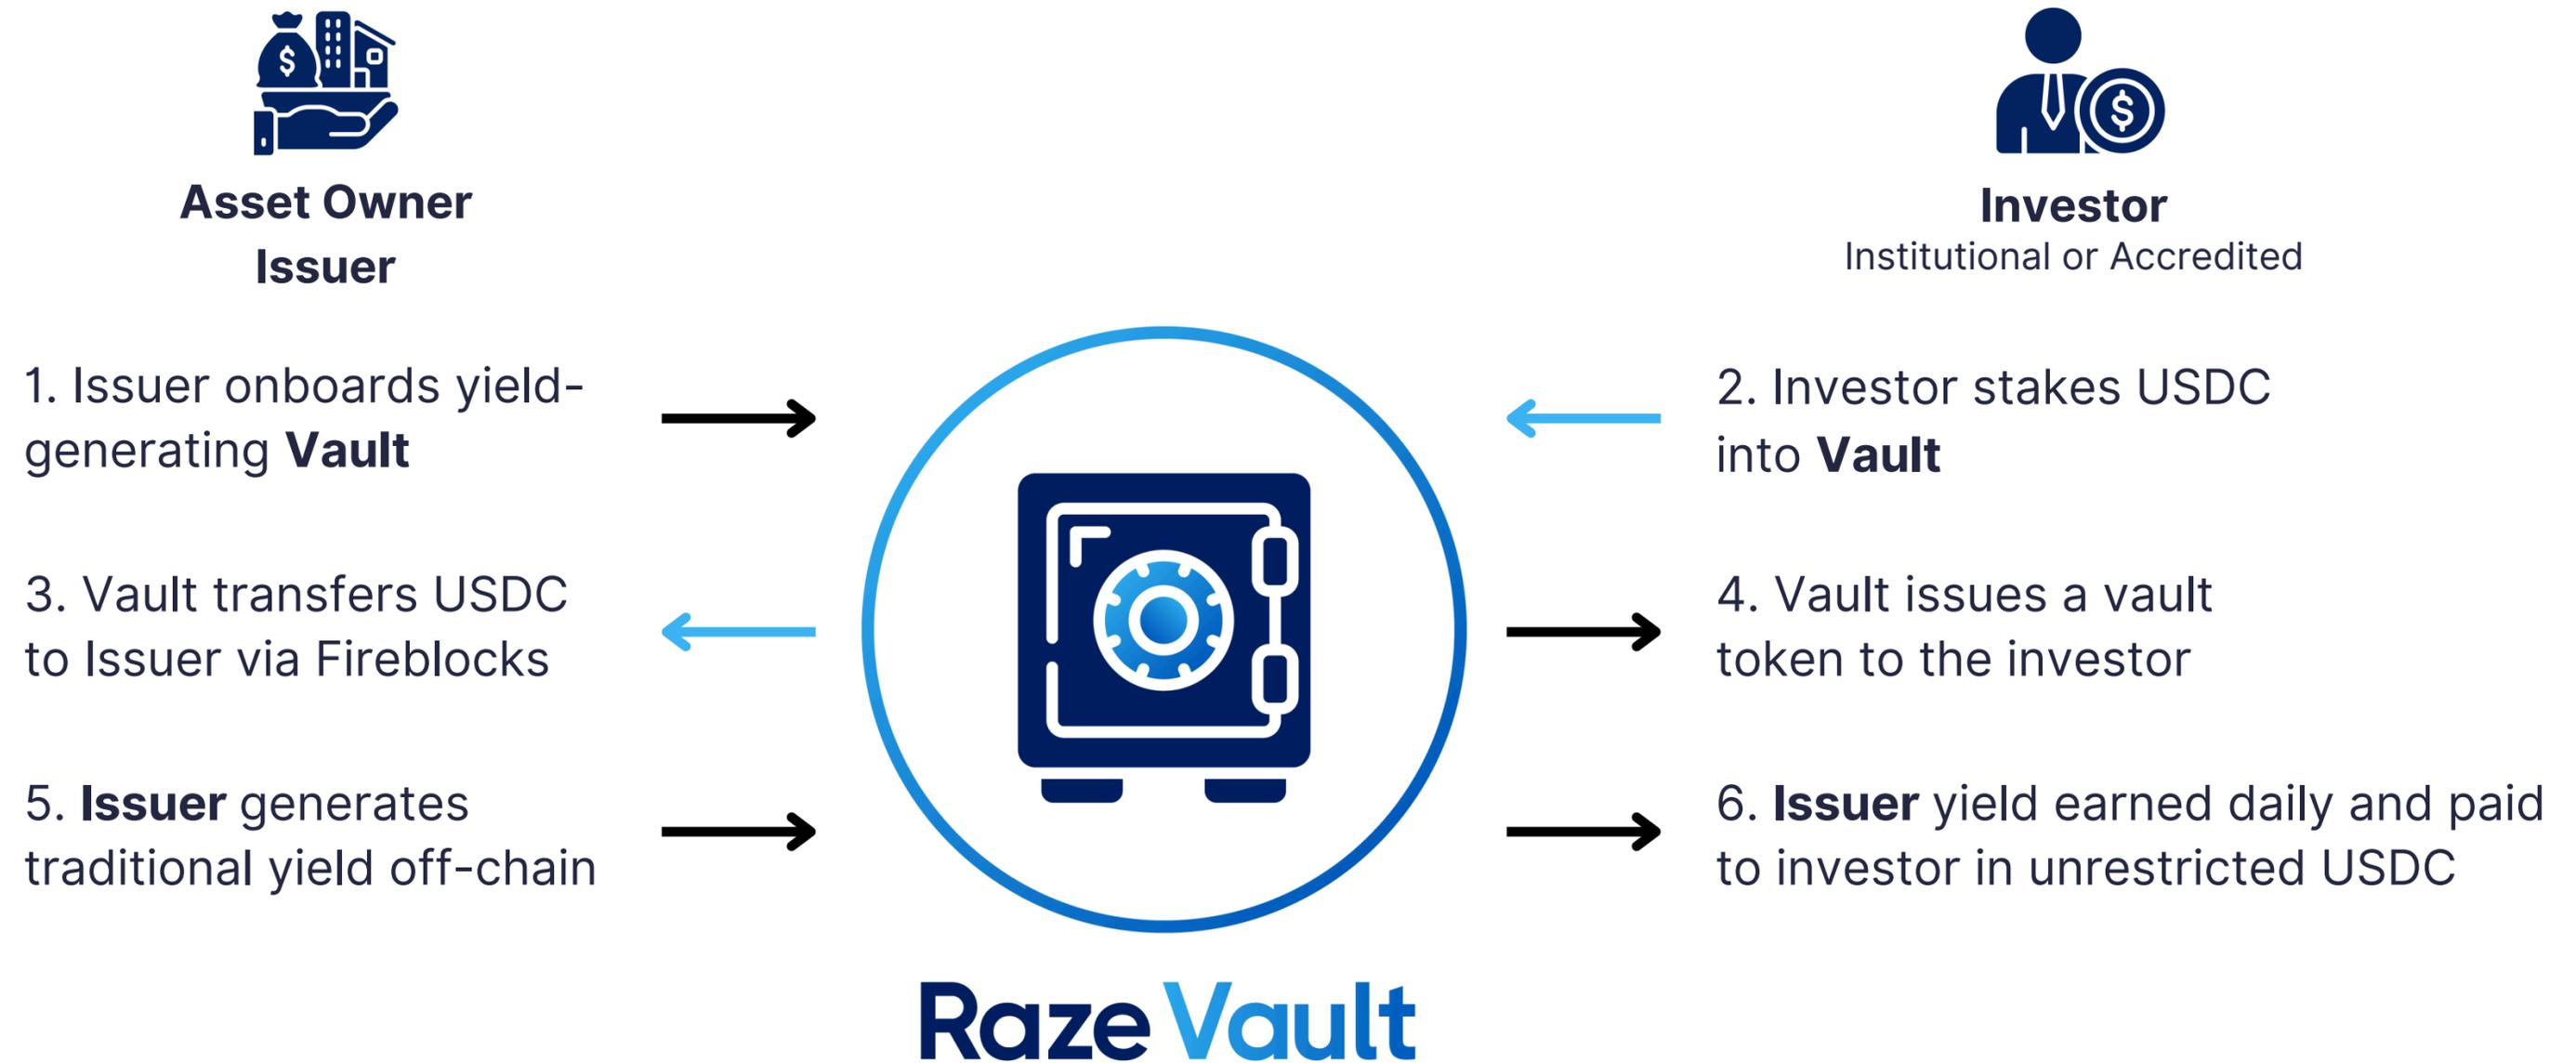

With USDC's global reach and clearer regulatory footing in the U.S., it's the best way to deliver yield and onboard investors.

**Why settle for anything less than competitive yields paid in unrestricted USDC?**

# How it Works

DeFi investors, institutions, and HNWI can stake stablecoins and earn daily yield generated from global issuers with real world assets (RWAs)

# The Platform

# Integrations

Strategically integrated with the Digital Asset Ecosystem

Raze integrates with the core infrastructure of the digital asset economy, spanning custody, stablecoins, Layer 1 networks, compliance, security, and regulated distribution—so issuers and investors can operate with confidence at institutional scale.

# Business Model

Paid by the Issuer

## Setup Fee and Services

White-glove structuring and onboarding services that help asset owners and issuers transform off-chain, cash-flowing assets or existing funds into compliant, on-chain yield products.

## Tokenization Fees

Transaction-based fees earned at the smart-contract level on token issuance, purchases, redemptions, and yield distributions.
