Music & Wellness

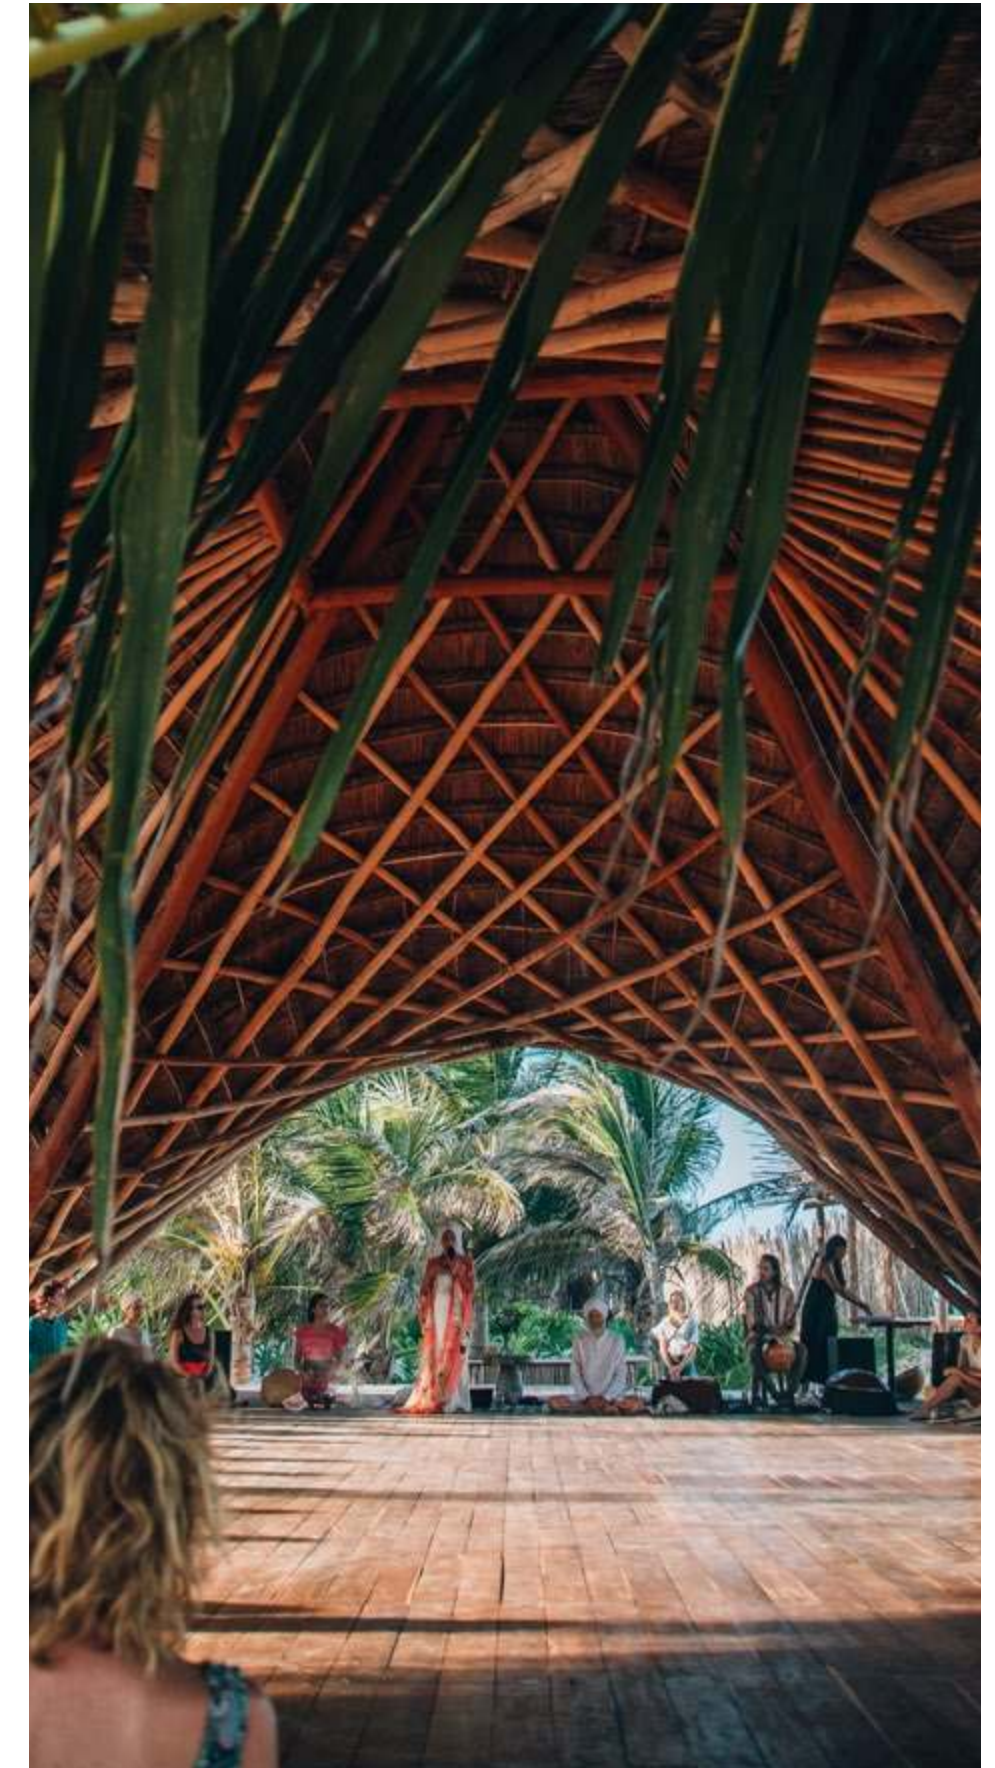

Beach Club Access

IKAL - Mayan Sanctuary

The La Reserva Community has preferred access to the serene beauty of Ikal Beach Club, where pristine shores meet tranquil wellness activities.

Immerse yourself in yoga sessions, holistic treatments, and rejuvenating experiences designed to soothe the soul. As the sun sets, enjoy world-class music programming that transforms the night into an unforgettable celebration.

IKAL
·MAYAN SANCTUARY·

Communal pool 19 meter (62 feet)

Amenities & Services

Communal Pool

A real eye catcher with its 20 meter long of perfectly laid natural stone surrounded by the trees.

Restaurant

Even in a slow-paced lifestyle, there's one thing you want to be fast.

Firepit

What better way to close of the day than with a glass of wine at the firepit.

Security

Camera systems, lobby and 24/7 security to take care of our guests.

Storage

Each apartment includes a separate 3.11m² (33.48ft²) storage room on the ground floor.

Laundry Centre

To make sure your laundry is done properly, we offer an on-site laundry.

Parking

For each unit a dedicated parking space is available for purchase.

Property Management

Developer will remain involved to supervise the Maintenance and Property Management.

Lobby

To serve you and your potential guests in the best way we can.

Back-up Generator

No matter the circumstances life continues at La Reserva. Even at power outages, the whole condominium will continue to operate.

Bicycle Parking

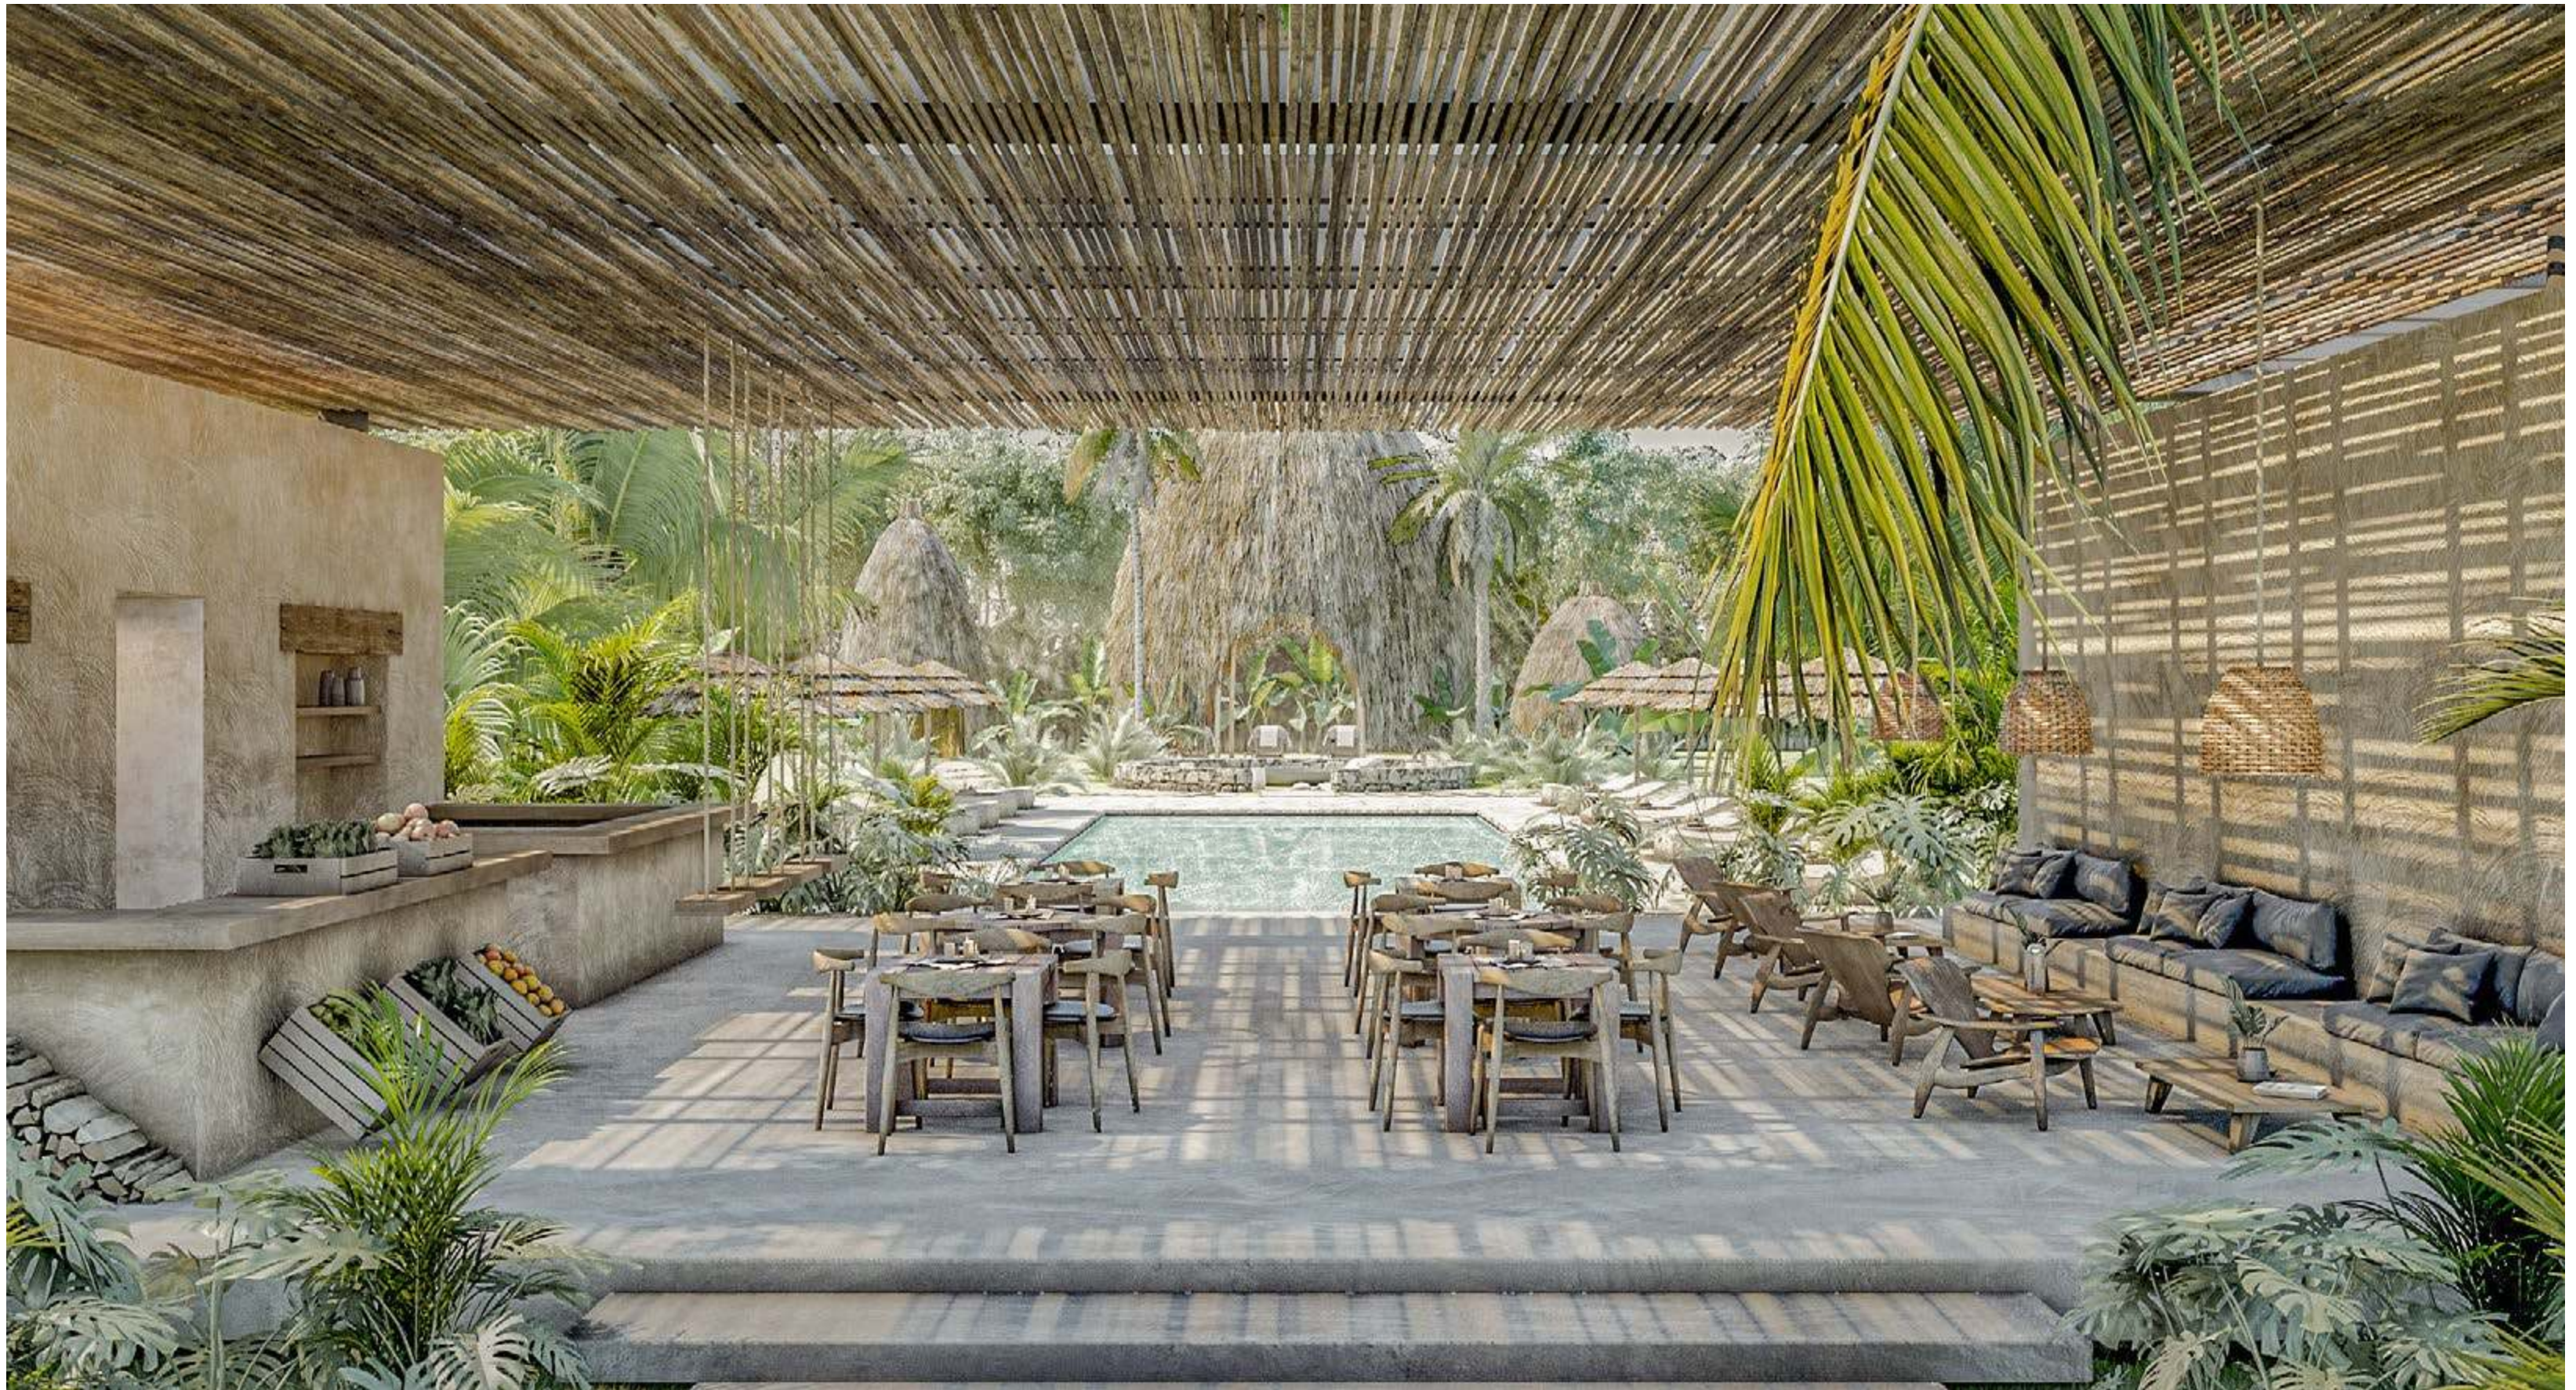

What a luxury to be able to bike to a nice breakfast on the beach!

Fibre Optic Internet

Even in a slow-paced lifestyle, there's one thing you want to be fast.

Drinking Water

Through a central Reverse Osmosis system we will enjoy high quality drinking water from every tap. Say goodbye to plastic jerrycans.

Organic Restaurant

Firepit

Infrastructure

Water

Taking care of a precious resource

Drinking Water

Our central Reverse Osmosis plant will provide the apartments and communal area with clean, healthy drinking water. Say goodbye to plastic water jerrycans, and no more calcium buildups in your bathrooms!

Waste Water Treatment Plant

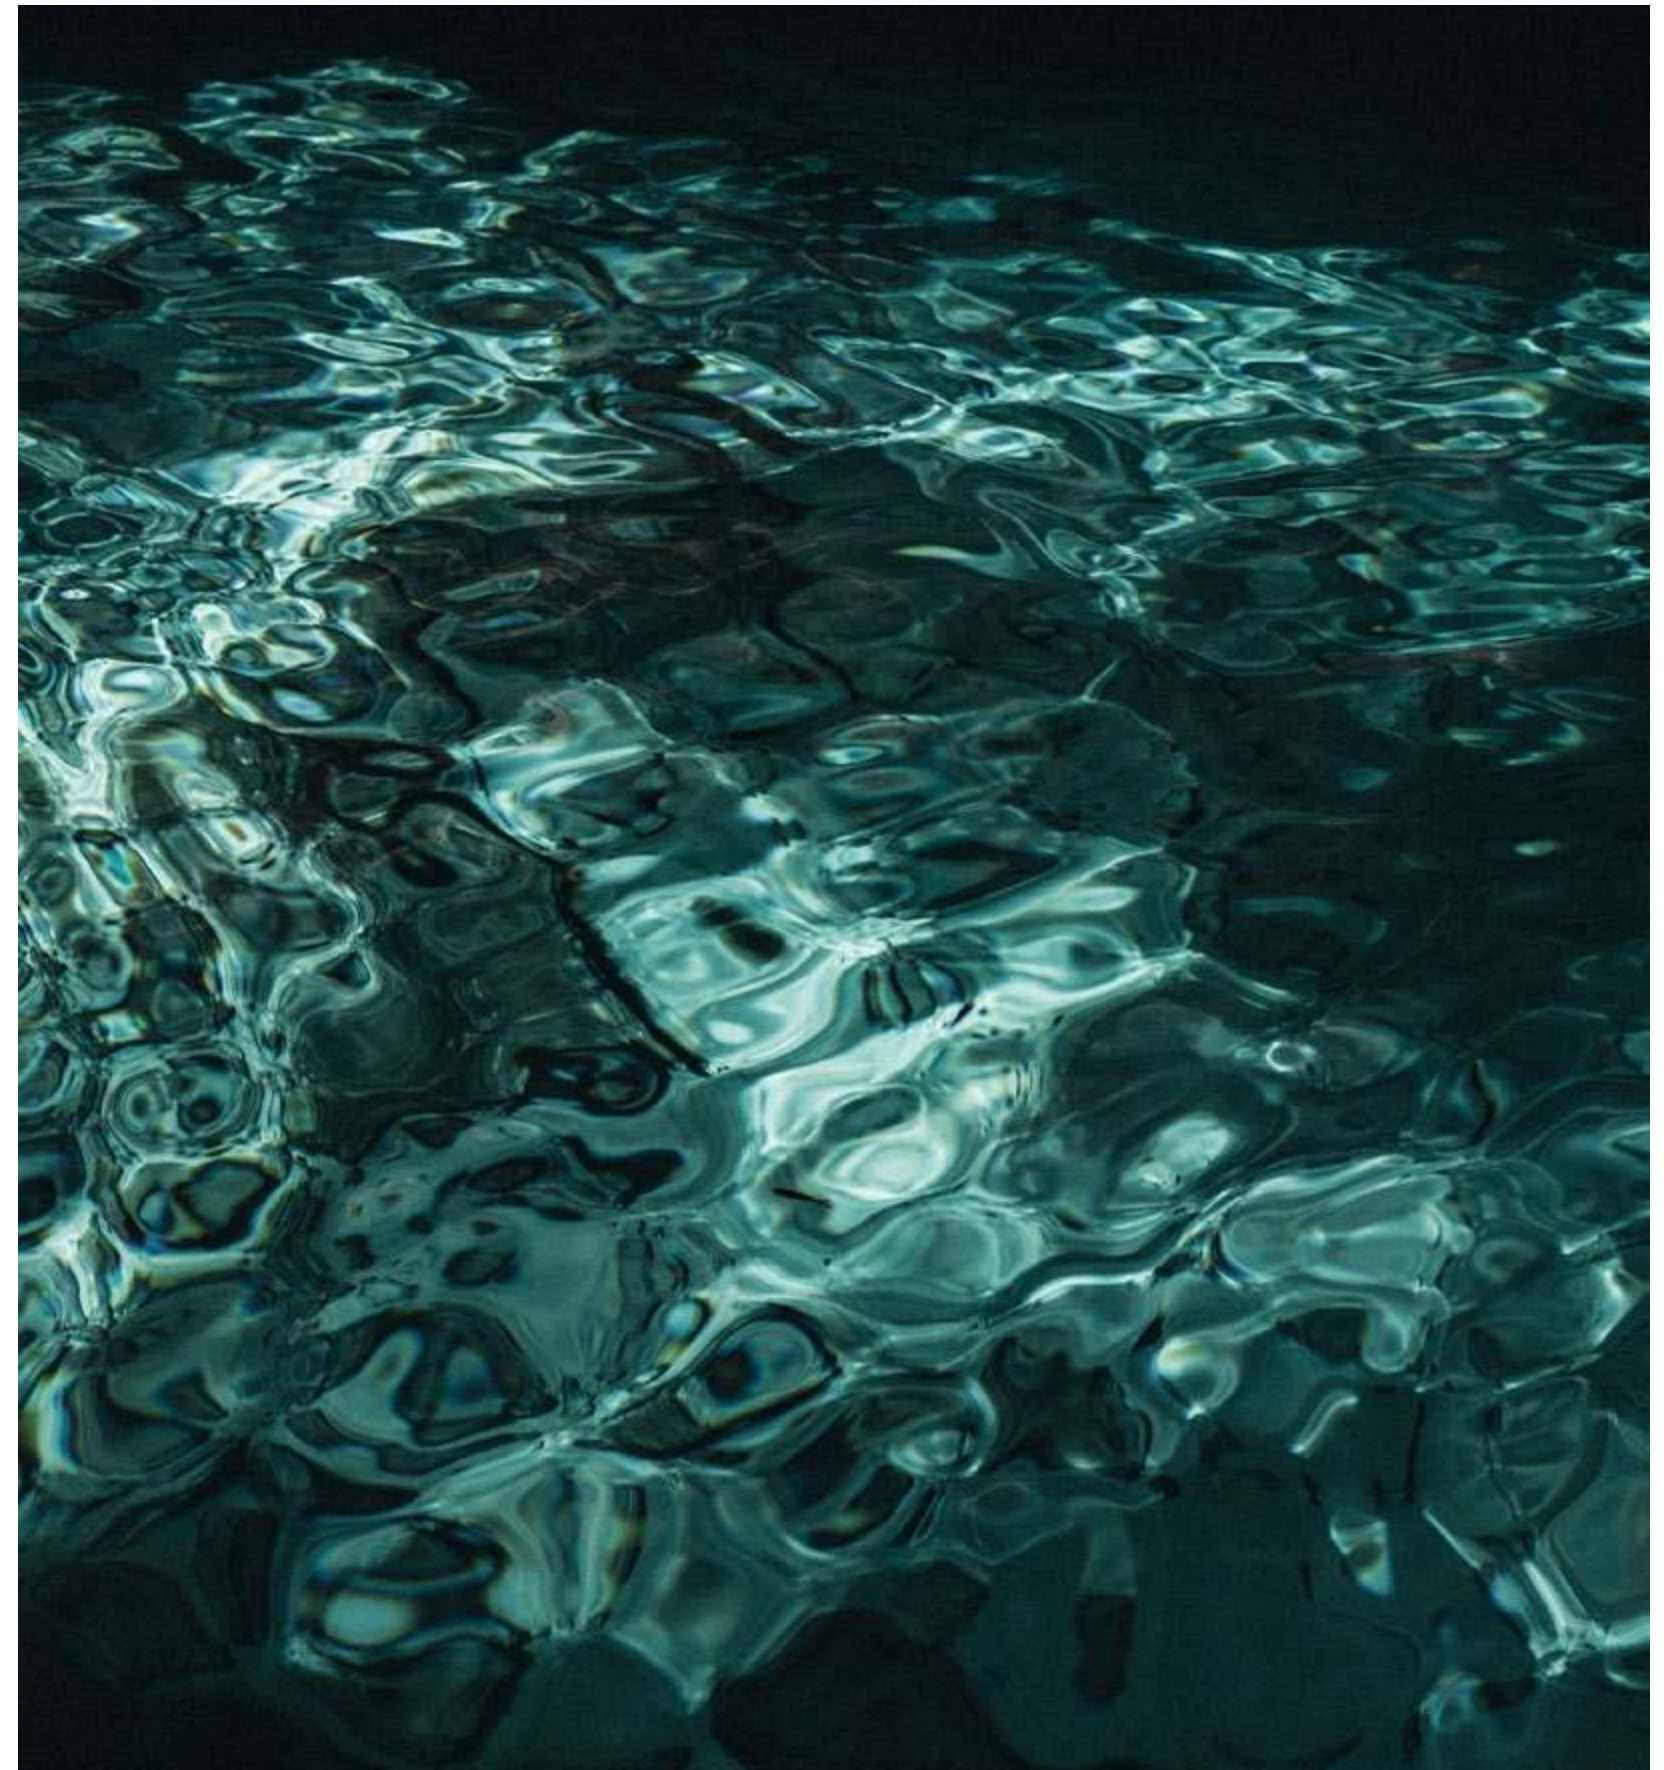

All the water used in La Reserva will go through a five step Waste Water Treatment Plant, after which large part will be used for the automated irrigation.

Four days of Back-Up

In case of a power outage, our water plant manages a four day rentention tank for the drinking water. Meaning there will always be a drinking water back-up for four days.

Energy

Towards a cleaner future

Energy Efficient Windows

We chose for the best insulating, uncoloured windows on the market, offering a U-value of around 0.48. This superior insulation means up to 20% saving of your AC energy consumption.

Construction Block

Interior walls will be constructed of the thicker 20cm blocks, all exterior walls are made of Hebel blocks, thermally and acoustically superior to the most commonly used blocks.

Emergency Back-Up Generator

In case of power outages a generator will provide energy for all ventilation, fridges, lighting and control in the apartments. Communal logistics, such as water pumps and lighting will also be powered.

Air Conditioning

Cooling that doesn't cost the world

Mini Chiller

The Mini Chiller is a central Airconditioning System, predominantly used in high-end hotels. This system brings huge advantages over traditional mini-split systems:

Up to 25% lower energy consumption

Their energetic consumption is up to 25% lower, resulting in lower energy bills and a lower carbon footprint of the building.

No visible AC units

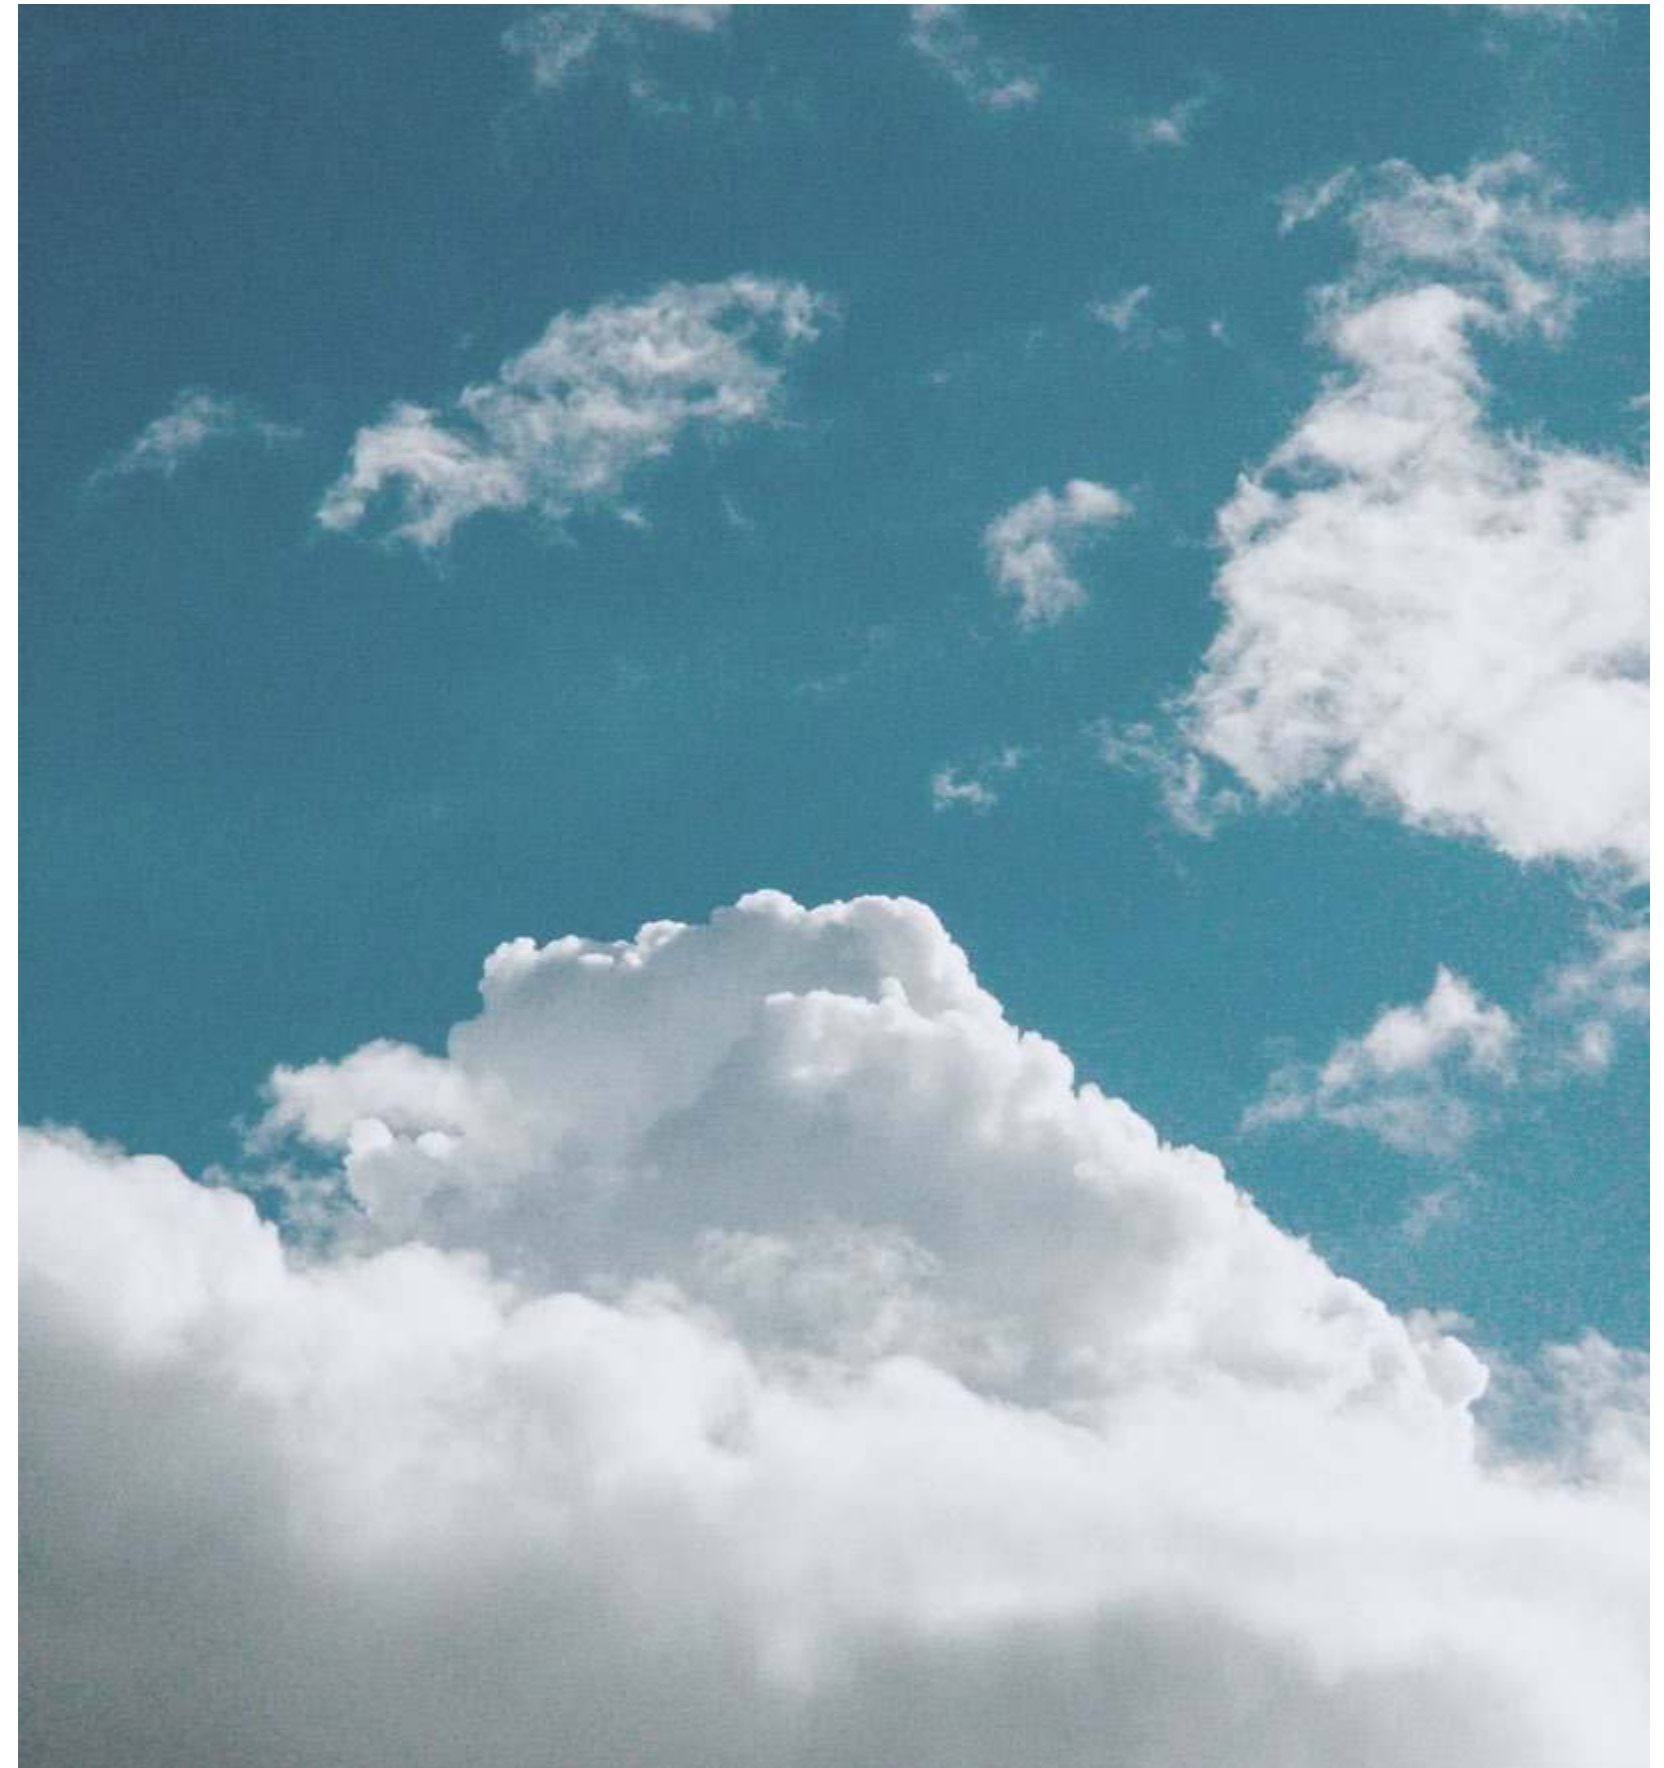

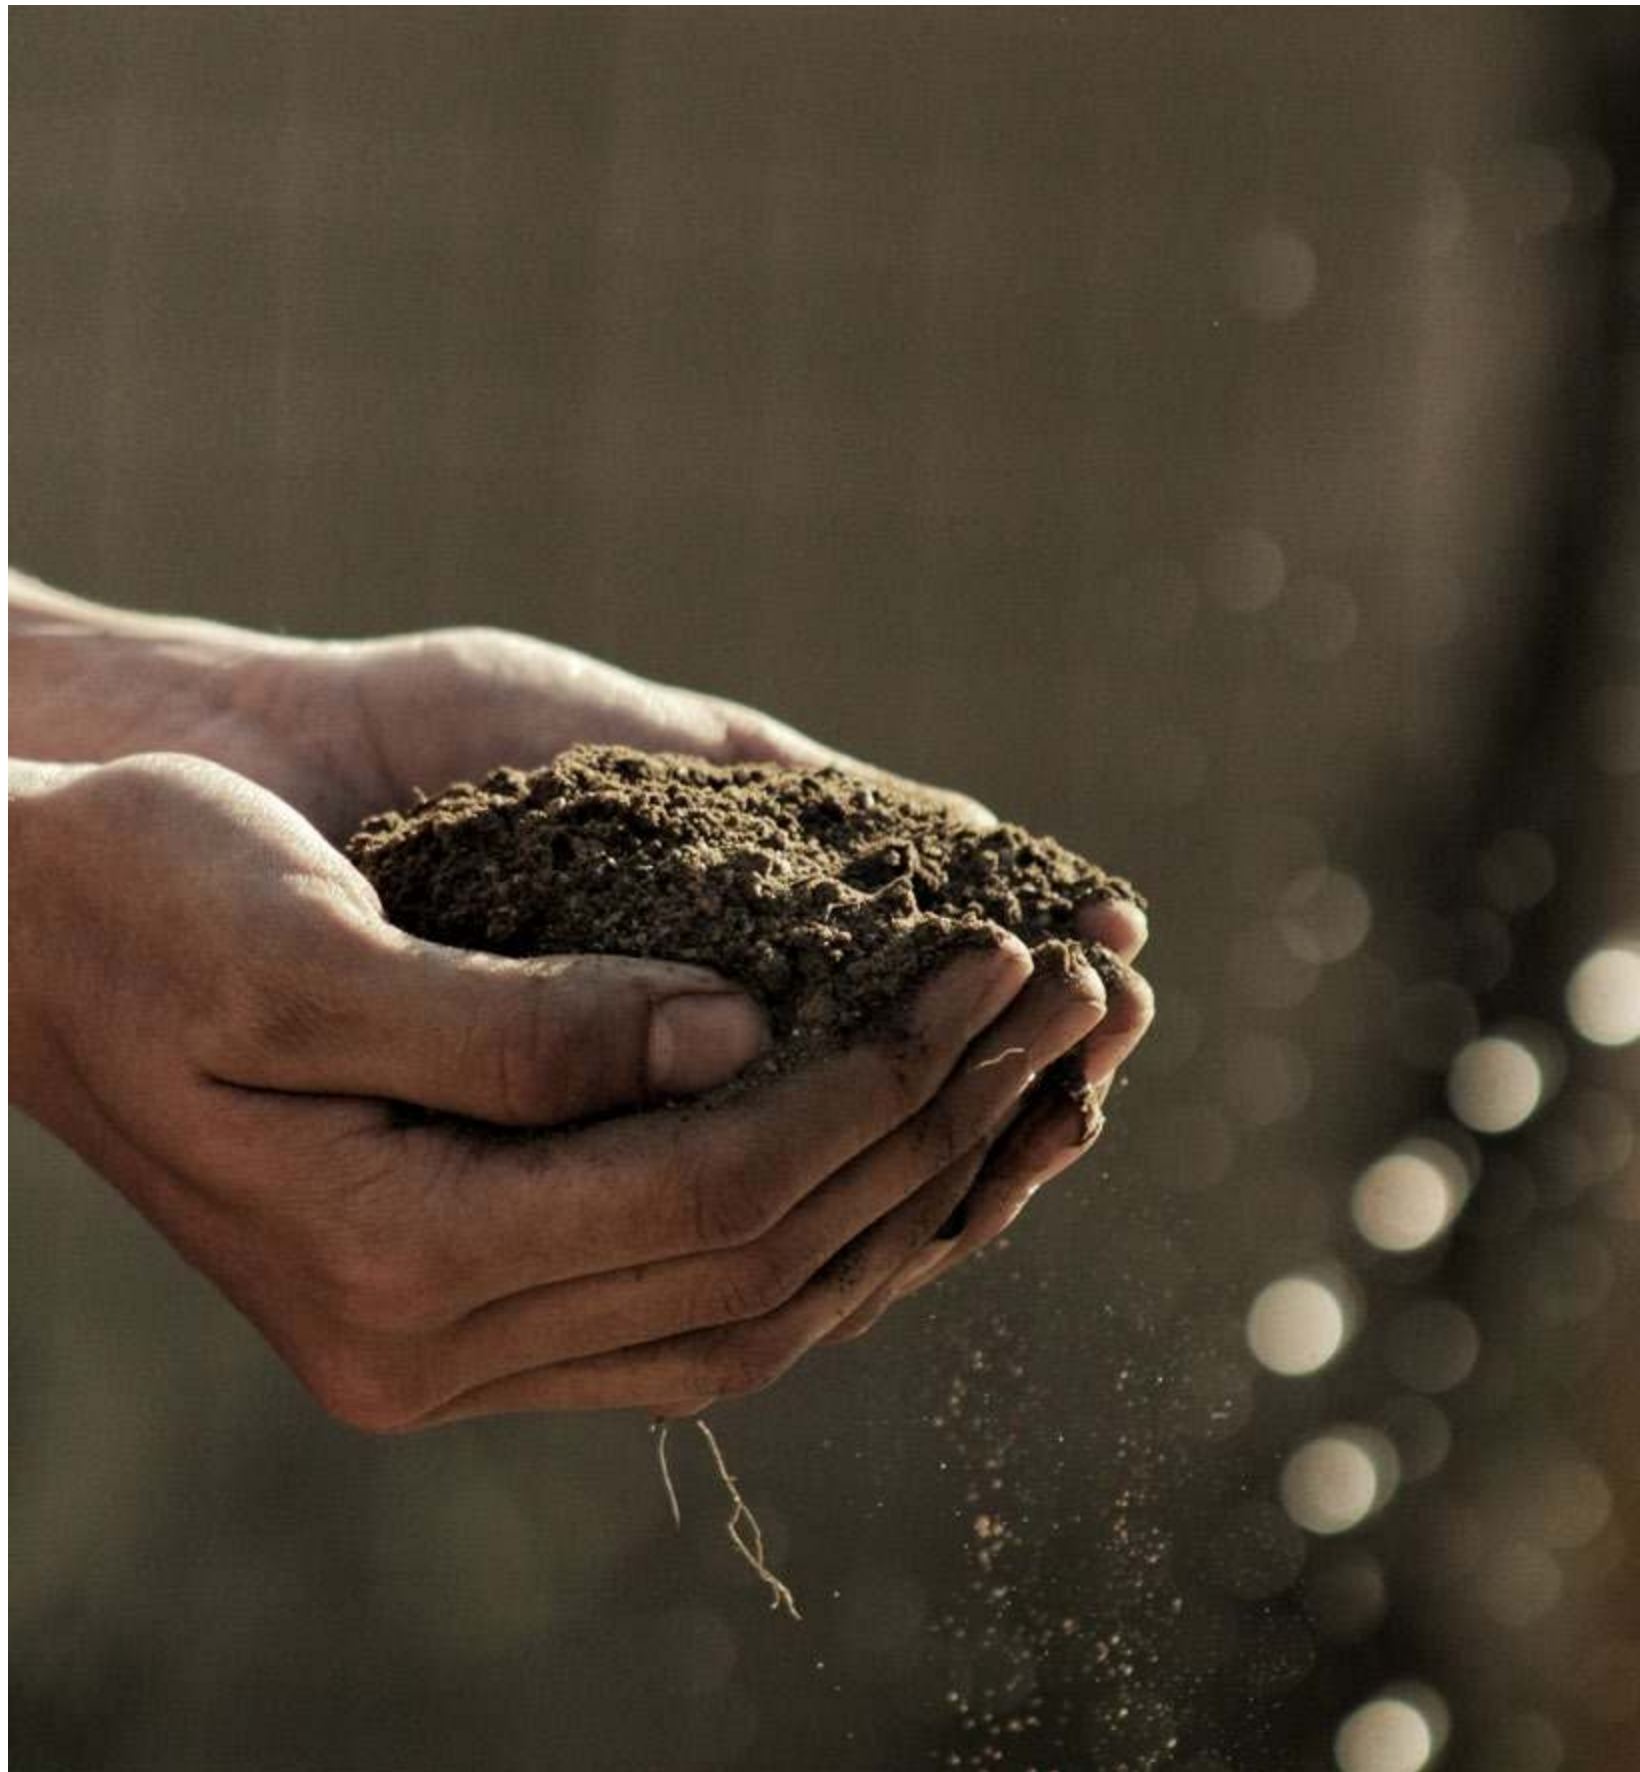

All the Air Conditionig units are worked away very subtly in the ceiling. No white AC boxes on the wall or ceiling.

No use of toxic gas

Where regular Air Conditionings use the toxic Freon gas as their reffridgerant, the Mini Chiller uses cold water. Way more friendly to the environment!

Recycling

Closing the loop

Anaerobic Composting

All organic waste from the apartments and the restaurant will be treated in the closed composting system. The end products, fertilizer and gas, can be used in the garden, farm and restaurant!

Urban Farm

On top of the lobby we created an urban farm, where we can grow herbs, spices and smaller vegetables for use in the restaurant.

Spaces reserved for waste separation

La Reserva has dedicated spaces for the collection and separation of the waste generated by the apartments and restaurants, so it can be recycled municipally.

Gas heating

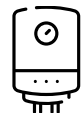

Reliable & Sustainable

Gas Cooking

For all those who love to cook a good meal at home, we installed a natural gas system for cooking. Apart from being more comfortable to cook with, it is still the cleanest and cheapest form of heating too.

Natural Gas Water Heating

All water for showers and taps will be heated with natural gas too. So in case of power outages, there will still be hot water coming from your shower!

Sustainability

Ron de Gruyter - Sustainability Advisor

The perfect balance

Up to 70% of GHG emissions of buildings actually take place after the construction. Energy consumption for cooling being one of the mayor contributors. That's why it's important to choose the building orientation that offers the perfect balance between cross ventilation, daylight and a cool building.

Implementation

Strategical green spaces around the building, green roofs, celosias and pergolas are all examples of how we can prevent excessive energy costs and lower the environmental impact.

Tulum

Tulum

Postcard Paradise

Perched on a cliff above the Caribbean Sea, Tulum has become a haven for gypsetters. A bohemian soul is breathed in, with the mysterious heritage of the Mayan city as a backdrop. Scattered ruins, boutique hotels, hippie-chic bazaars, lush greenery and natural pools, called cenotes, streak along the beach.

Amongst the most beautiful white sand, palm lined beaches in the world. Stylish ecological boutique hotels are scattered along the 10 km coastline until you reach the breath-taking UNESCO heritage site Si'an Kaan; 400.000 hectares of pure, untouched nature.

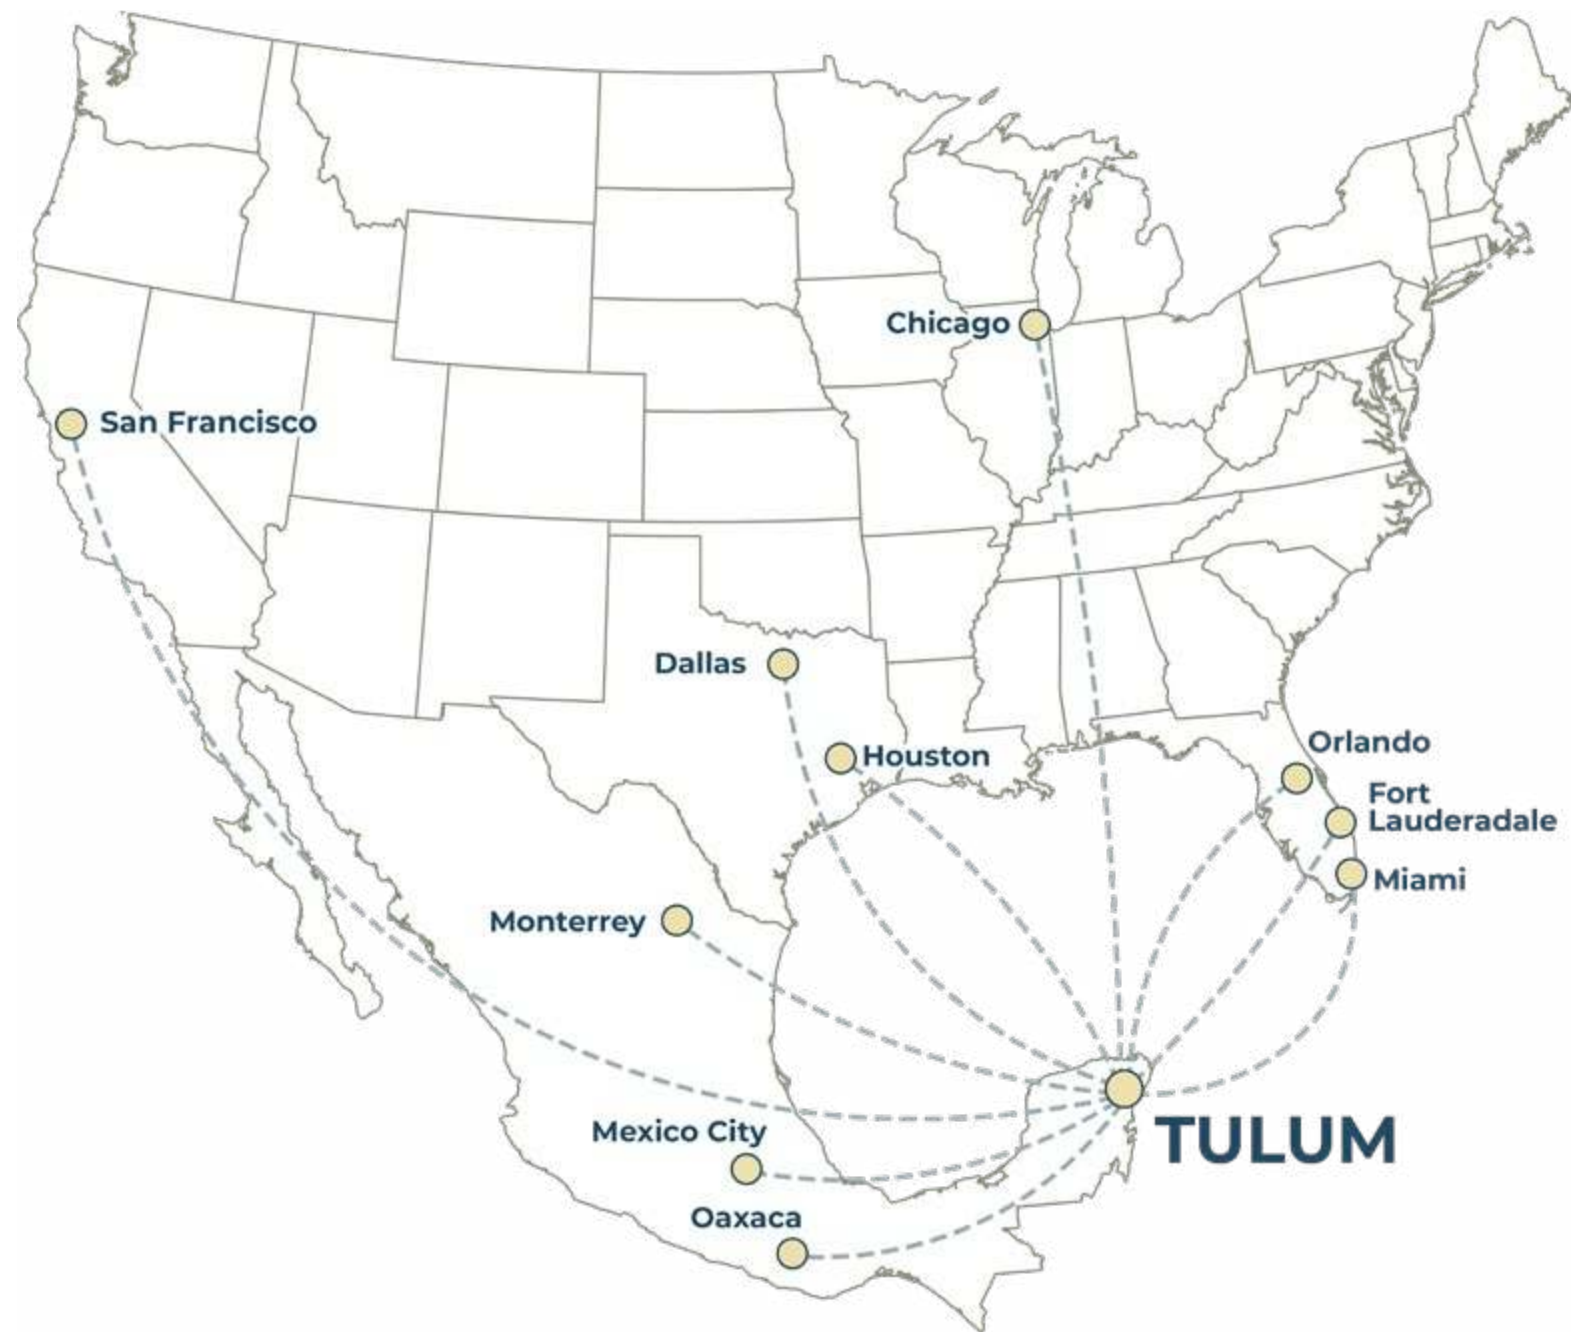

Location La Reserva

Right between the beach and the town lies Region 15. A highly anticipated area that is quickly developing into an upscale residential neighborhood.

Many high-end projects have already set the standard for what is to come.

You'll find yourself minutes away from the beach and all the amenities that the bustling little town of Tulum has to offer.

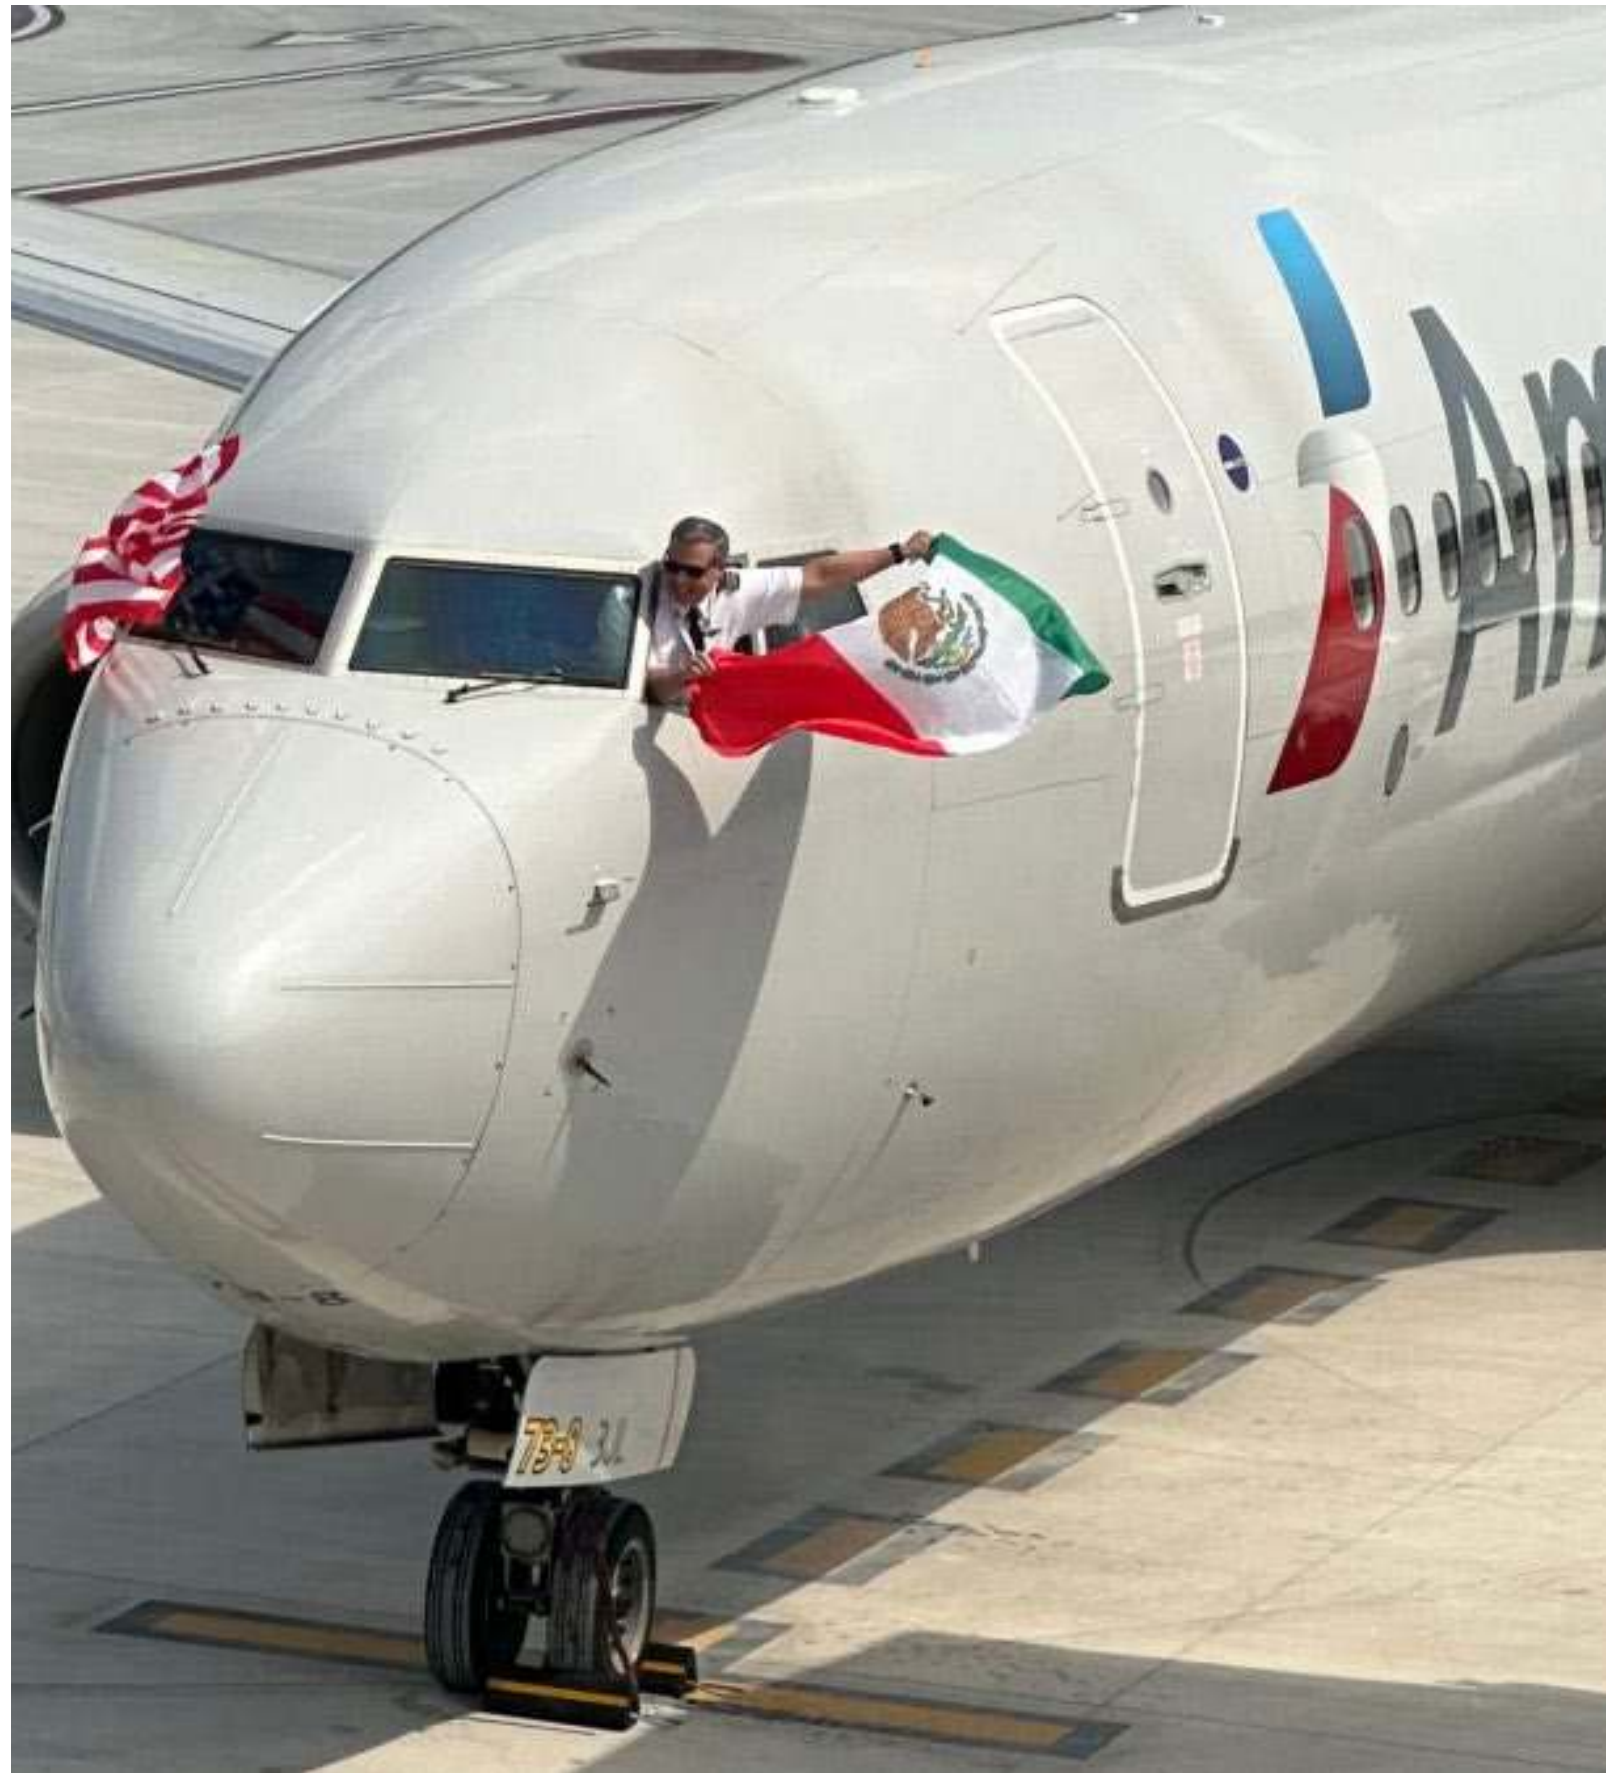

Tulum International Airport

Airport to home in 20 minutes!

The new Tulum airport is set to revolutionize travel, offering seamless connectivity to major US capitals such as **New York**, **Los Angeles**, **Miami**, and European hubs like **London** and **Paris**.

This enhanced accessibility will attract a global audience, significantly boosting tourism and investment. For the real estate market, this translates to increased property values and demand, making Tulum an even more attractive destination for home-owners.

Mayan Train

Started operation in 2024

Experience all that the Yucatan Peninsula has to offer, while traveling in speed and comfort.

From the Bacalar lagoon, the beautiful cities of Valladolid and Merida, to the ruins of Palenque and Calakmul!

Tulum Luxury Segment

Tulum is rapidly evolving into a premier luxury destination. Renowned brands such as **Ritz-Carlton**, **Nobu**, **Scorpios** and **Azulik** are flocking to this paradise, bringing unparalleled elegance and sophistication.

Experience the perfect blend of natural beauty and upscale living.
