DEVELOPMENTS IN TULUM

We are developing in Tulum

We are currently developing in Tulum - Riviera Maya, we have delivered our second project in Lúum Zama, Mestiza, after our first great experience with Zambo and we are already working on Mestiza 15, our third development. We chose this community within Aldea Zama because we found in it the quality, exclusivity and sustainability we were looking for to grow the properties we dreamed of.

Tulum makes us fall in love every day with its beauty, culture and natural environment and leads us to constantly generate new ideas that help us to strengthen our roots in this country.

Portfolio

Aspects that define us

Quality

Quality is fundamental to everything we do. Quality construction delivered by our experienced team of managers and subcontractors. Quality building materials and products. Quality relationships between you and our team, including our sales consultant.

Architecture

We love to design and build homes. We love to create a special home and help our homeowner add their own personal touches and style to make that home an expression of themselves.

Sustainability

We think that our developments can have a profound impact on the natural environment, economy, health and productivity of our communities. We hope to create a model for sustainable development companies to use as inspiration for future commercial projects.

Portfolio

Our projects

2018

Zambo

It is a boutique project with only 12 units of one, two and three bedroom penthouses. All apartments have a private pool or jacuzzi.

2021

Mestiza

Mestiza has 26 units with 4 different typologies. All units have a bathtub, pool, garden or terrace. The project reflects the honesty and simplicity of Yucatecan and African architecture, with its warm color palette and natural textures.

2024

Mestiza 15

The project is located in Region 15. A 123-unit community will be created and the development will feature amenities that complement each owner's lifestyle.
