

Privacy Policy - PromptSpaceGuard Browser Extension

Applicable to: Chrome Web Store & Microsoft Edge Add-ons **Effective:** March 22, 2026 **Version:** 1.0

In case of discrepancies, the German version above shall prevail.

Data Controller

Naft Unique GmbH Chamerstrasse 172, c/o Uhuhus kmg 6300 Zug, Switzerland UID: CHE-181.461.693
Email: contact@promptspace.ch Phone: +41 (0)41 511 78 20

What Does PromptSpaceGuard Do?

PromptSpaceGuard is a browser extension that detects and anonymizes sensitive data (personally identifiable information, PII) before it is sent to AI tools such as ChatGPT. All PII detection and anonymization takes place **locally in your browser**.

Data Processed Locally in the Browser

The following data is processed **exclusively locally** in your browser and is **never** transmitted to our servers or third parties:

- **Input text** in ChatGPT text fields
- **Detected PII** (names, addresses, social security numbers, IBANs, phone numbers, etc.)
- **Anonymization mappings** (e.g., "Hans Müller" → "[Person 1]"), stored in session storage, deleted when the tab is closed
- **File contents** (PDF, DOCX, XLSX), extracted locally and scanned for PII
- **AI model inference** for name recognition (executed locally in the browser)

Data Transmitted to Our Backend

Our backend (api.promptspace.ch, hosted in Switzerland) receives **only pseudonymized operational data** - never your input text or detected PII:

Data	Purpose	Legal Basis
Company Key (SHA-256 hash)	License validation	Performance of contract (Swiss DPA Art. 31(2)(a); GDPR Art. 6(1)(b))
Device ID (UUID)	Seat counting (floating license)	Performance of contract
Audit metadata (action, risk level, PII count, timestamp)	Usage statistics for administrators	Legitimate interest (Swiss DPA Art. 31(1); GDPR Art. 6(1)(f))
Health reports (error codes, system status)	Error monitoring, fail-closed security	Legitimate interest

Important: Before any transmission, input text, PII values, and anonymization mappings are explicitly removed (sanitization).

Browser Permissions

Permission	Purpose
storage	Local caching of license data, settings, and PII patterns
activeTab	Access to input fields on chatgpt.com for PII detection
offscreen	AI model execution for name recognition in an isolated environment
scripting	Text extraction from file attachments (PDF, DOCX, XLSX)
alarms	Periodic license checks and system health monitoring

The extension is **only active** on chatgpt.com and chat.openai.com.

AI Model for Name Recognition

- An AI model for automatic detection of personal names, place names, and organizations is downloaded from our Swiss backend (only with a valid license) and **executed locally in the browser**. No user data is sent to external services. There is no remote code execution.

Hosting and Data Location

Service	Provider	Location
Backend & Dashboard	Infomaniak Network SA	Geneva, Switzerland
Encrypted Backup	Contabo GmbH	Munich, Germany

There is **no data transfer** to third countries outside the EU/EEA. Backups contain no PII and are encrypted with AES-256.

Cookies and Tracking

PromptSpaceGuard uses **no cookies**, **no analytics tools** (Google Analytics or similar), and **no advertising tracking**. No data is shared with third parties for marketing or profiling purposes.

Retention Periods

Data	Retention	Deletion
License data	Contract duration + 30 days	Automatic
Audit metadata	12 months (default)	Automatic or on request
Health reports	90 days	Automatic
Device IDs	Contract duration + 30 days	Automatic

After contract termination, all customer data is deleted within 30 days.

Your Rights

You have the following rights regarding your data (Swiss DPA Art. 25 ff.; GDPR Art. 15–21):

- **Access** to stored data
- **Rectification** of inaccurate data
- **Erasure** of your data
- **Data portability** (export via admin dashboard as CSV)
- **Objection** to processing based on legitimate interests

Requests to: contact@promptspace.ch (response within 30 days).

Supervisory Authority

Switzerland: Federal Data Protection and Information Commissioner (FDPIC), Feldeggweg 1, 3003 Bern - www.edoeb.admin.ch

EU/EEA: The data protection authority responsible for your place of residence.

Security Measures

- TLS/HTTPS for all connections
- AES-256-GCM encryption of sensitive data fields
- Company Keys stored as SHA-256 hash (non-reversible)
- Two-factor authentication (TOTP) for administrators
- Fail-closed design: if a protection component fails, sending is blocked

Changes

If material changes are made to this privacy policy, the updated version will be published at the same URL. The date under "Effective" will be updated accordingly.
