

# BriefCatch Standalone Deployment

Log in to the [BriefCatch Portal](#), then click the BriefCatch Standalone tab.

*If you don't have an account under your organization, please [contact support for assistance](#).*

The portal contains information on your organization's enterprise subscription, deployment guides, and access to the BriefCatch Standalone software and license key.

## BriefCatch Standalone Documentation

BriefCatch Standalone is a COM/VSTO add-in and can be deployed to your users using our installers.

- [Standalone Deployment Guide](#)

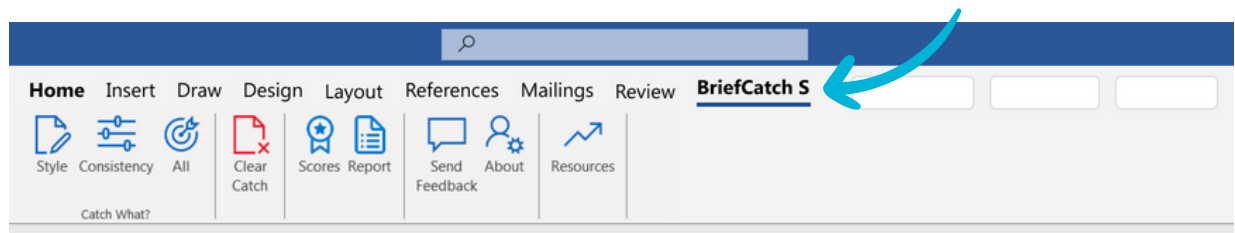

## File Downloads

- **BriefCatchInstaller.exe**: Installs BriefCatch to the user profile.
- **BCMSSetup.msi**: Installs BriefCatch to the user profile.
- **BCMSSetupLM.msi**: Installs BriefCatch to the machine.
- **BriefCatch.cer**: Signed certificate file, sometimes needed when deploying.
- **noAutoUpdate.txt**: This file allows you to disable the update notification for your users.
- **Enterprise License**: The license key used to activate BriefCatch for the duration of your license period.

Download the installer you'd like to use, along with your license key. BriefCatch Standalone requires an annual license key to be installed to keep the software active for your users. The license key can be [attached to your deployment](#).

## Using BriefCatch Standalone

Once BriefCatch Standalone has been installed, it can be opened by clicking the BriefCatch S tab in Word.
