

# What is Business?

## 1.2 Industries and Sectors

In this class, we've learned another way to understand and organize businesses according to what they do. We learned about the North American Industrial Classification System for categorizing businesses by industry and sector, and learned how to use the NAICS code.

In this practice exercise, you'll pick a business and find it's NAICS code. You'll then work backwards to explore the industry group, sub-sector, sector as well as examples for each.

As a reminder:

The 6 digits represent the NATIONAL INDUSTRY

The 5 digits represent the INDUSTRY

The 4 digits represent the INDUSTRY GROUP

The 3 digits represent the SUB SECTOR

The 2 digits represent the SECTOR

To look up a NAICS code, you can use a search engine, AI tool or a website like [naicslist.com](https://naicslist.com)

<b>Business name</b>	<hr/>
<b>National Industry code (6 digit)</b>	<hr/>
<b>National Industry name</b>	<hr/>
<b>Industry code (5 digit)</b>	<hr/>
<b>Industry name</b>	<hr/>
<b>Industry Group code (4 digit)</b>	<hr/>
<b>Industry name</b>	<hr/>
<b>Sub-sector code (3 digit)</b>	<hr/>
<b>Sub-sector name</b>	<hr/>
<b>Sector code (2 digit)</b>	<hr/>
<b>Sector name</b>	<hr/>
