

Capability Statement

Navira Federal, LLC reduces mission risk and accelerates secure delivery for civilian federal agencies, bridging emerging commercial innovation with federal standards across cybersecurity, cloud modernization, artificial intelligence, and mission systems engineering.

OUR METHODOLOGY: GATE Gap Analysis › Adoption › Top-Down › Evaluation *Navira Federal's operating methodology for secure modernization.*

HOW NAVIRA DELIVERS

Cybersecurity & Zero Trust

Zero Trust Architecture and ICAM engineering lead on FDA's DIMES BPA, reducing identity-based attack surface for a civilian health mission platform; ATO/RMF execution and continuous monitoring sustain mission risk posture.

Artificial Intelligence & Data

Process automation and cognitive delivery engineering for HHS acquisition systems, plus AI-assisted document review and decision-support analytics within federal case management and financial systems environments.

Cloud & Platform Modernization

Legacy Oracle, .NET, and SharePoint modernization for FTC and cloud/DevSecOps modernization for RRB, accelerating secure platform delivery without disrupting mission operations.

Mission Systems Engineering

Enterprise IT and financial systems platform delivery for RRB and SBA, sustaining 99.98% uptime and continuity of mission operations.

CORPORATE EXPERIENCE

CUSTOMER AGENCY	SCOPE OF WORK
Federal Trade Commission EXCEPTIONAL CPARS	Sustained mission continuity for FTC's legacy financial and case systems through 17 years of unbroken prime delivery; current task order modernizing Oracle, .NET, and SharePoint closed with an Exceptional CPARS rating.
Railroad Retirement Board ACTIVE	Reduced operational risk for RRB's enterprise IT environment through active prime delivery of IT support and cloud/DevSecOps modernization under GSA MAS, sustaining 99.98% uptime and a 35% year-over-year cost reduction through ITIL and Azure migration; period of performance runs through 2029.
Small Business Administration ACTIVE	Improved modernization velocity for SBA's Office of Financial Systems, Innovation, and Data Transparency through active PRISM platform support, sustained through 2028.
Food and Drug Administration (HHS) TEAM MEMBER	Strengthened identity-centric security across FDA's enterprise mission systems as Zero Trust Architecture and ICAM engineering lead on FDA's DevSecOps Innovation, Modernization, and Engineering Services (DIMES) BPA.

DIFFERENTIATORS

- **Measurable operational performance.** 99.98% uptime and a 35% year-over-year cost reduction delivered for RRB's enterprise IT environment through ITIL and Azure modernization.
- **17 years, zero terminations.** Unbroken prime delivery at FTC since 2009, most recently closed with an Exceptional CPARS rating.
- **Zero Trust and ICAM depth.** Engineering role on a large-scale FDA Zero Trust Architecture and identity, credential, and access management BPA.
- **Diversified mission exposure.** Team delivery on FDA's DIMES BPA and HHS acquisition systems modernization extends reach beyond regulatory and financial systems into civilian health and public safety missions.
- **GSA MAS Large Category access.** Available through GSA MAS ordering procedures under Contract 47QTC25D00B5 across IT professional services, order-level materials, and highly adaptive cybersecurity SINs, subject to applicable FAR requirements.
- **WOSB-certified delivery partner.** Positioned for sole-source and set-aside award pathways across civilian federal agencies.

WHY AGENCIES CHOOSE NAVIRA

- Accelerates secure modernization with a proven federal prime delivery record across cybersecurity, cloud, and mission systems engineering.
- Reduces acquisition risk through GSA MAS ordering procedures under Contract 47QTC25D00B5, subject to applicable FAR requirements.
- Sustains mission continuity through an experienced federal delivery team carried forward through the Navira Federal transition.
- Aligns delivery to Zero Trust and FedRAMP standards for civilian agency mission environments.

DISCUSS YOUR MISSION CHALLENGE. Schedule a 30-minute executive capabilities briefing to explore modernization priorities, operational risks, and acquisition pathways.

Corporate Transition Notice

ATTACHMENT TO NAVIRA FEDERAL, LLC CAPABILITY STATEMENT

Navira Federal, LLC is the successor-in-interest to iCallidus, Inc. by asset purchase agreement effective April 1, 2026. The corporate experience cited in the accompanying capability statement was performed under CAGE code 20X07, held by iCallidus, Inc. and carried forward without interruption to Navira Federal, LLC.

Predecessor entity	iCallidus, Inc.
Successor entity	Navira Federal, LLC
Transition instrument	Asset Purchase Agreement, effective 2026-04-01
CAGE Code	20X07 (unchanged)
UEI	KJF4UM4WYD34
Novation status	FAR 42.1204 novation agreement in process with the cognizant GSA Contracting Officer

The delivery team, contract vehicle, and program history associated with this corporate experience are unchanged by the transition. Navira Federal, LLC continues performance under the same personnel and operating structure that established the record cited in the accompanying capability statement.

Questions regarding the transition or novation status may be directed to the contact below.
