

PRANNA FEATURE SHEET

Inspired by the durability of natural leather and the organic aesthetics of nature, Pranna® Xtreme is engineered to enhance performance in demanding interior environments. Its distinctive leather-like texture, soft-touch surface, and high adaptability provide a balanced combination of comfort, functionality, and design. As one of the most established collections in the Latin American market, Pranna® Xtreme is available in an extensive color palette, allowing seamless integration across a wide range of architectural and commercial applications.

HIGH GREASE RESISTANCE

Advanced surface technology developed for environments exposed to elevated levels of contamination and accelerated wear caused by heavy foot traffic. Xtreme® incorporates enhanced protective layers that deliver superior resistance to grease, perspiration, and food-based residues, helping maintain surface integrity and appearance over time. It is specifically engineered for high-demand commercial spaces such as cinemas, theaters, and quick-service restaurants.

KEY FEATURES:

- Abrasion Resistant
- Impermeability
- UV Resistant
- Mildew Resistant
- Easy to Clean
- Flame Retardant
- Low Temperature Resistant
- Chemical Resistant
- Oil Resistant

CLEANING INSTRUCTIONS:

1. Basic Maintenance

- We recommend cleaning at least once a week to extend the lifespan of the upholstery, preventing dirt and contamination from building up and stains from becoming permanent.
- Clean the whole surface in circular motions using liquid hand soap and water (1 part soap to 9 parts water), or check the guide for recommended cleaning products. Rinse and wipe with a clean damp white cloth to get rid of any excess soap. Repeat as needed and then let dry.
- Once a month, you can use a soft-bristle brush for a deeper cleaning. Remember, light colours need more care, more often.

If you need to disinfect the product because it has come into contact with organic material (blood, urine or fecal matter), check the guide for appropriate cleaning products and:

- Clean with a clean white cloth or fabric. If you choose to use a bleach solution, only use 0.5% concentration, which can be prepared as follows:
 - If the original concentration is 5.6% sodium hypochlorite, dilute in water with dilute 1 part of sodium hypochlorite per 10 parts of water.
 - If the original concentration is 8-10% sodium hypochlorite, dilute in water with dilute 1 part of sodium hypochlorite per 20 parts of water.
 - Rinse and wipe with a clean damp cloth or fabric to get rid of any excess.
 - Dry.

For all other stains:

- Clean within 24 hours to avoid permanent stains on the surface. After this time has passed, effectiveness of removing the stain drops to 50%.

2. Important Notes:

- Do not use Solvents like paint thinner, Varsol, acetone, whiteners, waxes, silicones or detergents and/or cleaning products that are not pH neutral.
- Don't make marks on the product with pens or markers, it may absorb the ink and cause a permanent stain.
- Cleaning tools like plastic or wire sponges, or hard-bristle brushes that can damage the material permanently.
