Total Property Taxes Paid by the East Side Storage Project

¹ All job values are full-time equivalents (FTEs) and are the sum of the direct, indirect, and induced jobs during construction and annual operations which can be found in Table 1.

² Earnings are a measurement in dollars of the total wages produced by the jobs found by the software. These earnings are categorized by construction impacts and operations impacts.

³ Output refers to economic activity or the value of production in the state or local economy. It is an equivalent measure to the Gross Domestic Product, which measures output on a national basis.

Our property tax analysis was based on total capital expenditures for the Project and distributed across property tax classes using industry standard assumptions and average tax rates for the county. All tax rates are assumed to stay constant and the Project is assumed to be decommissioned in 20 years. No comprehensive tax payment was calculated, and these calculations are only to be used to illustrate the potential economic impact of the Project.
