

The digital recruiter that listens, works
and delivers talent, on autopilot.

Recruitment hasn't changed in 20 years

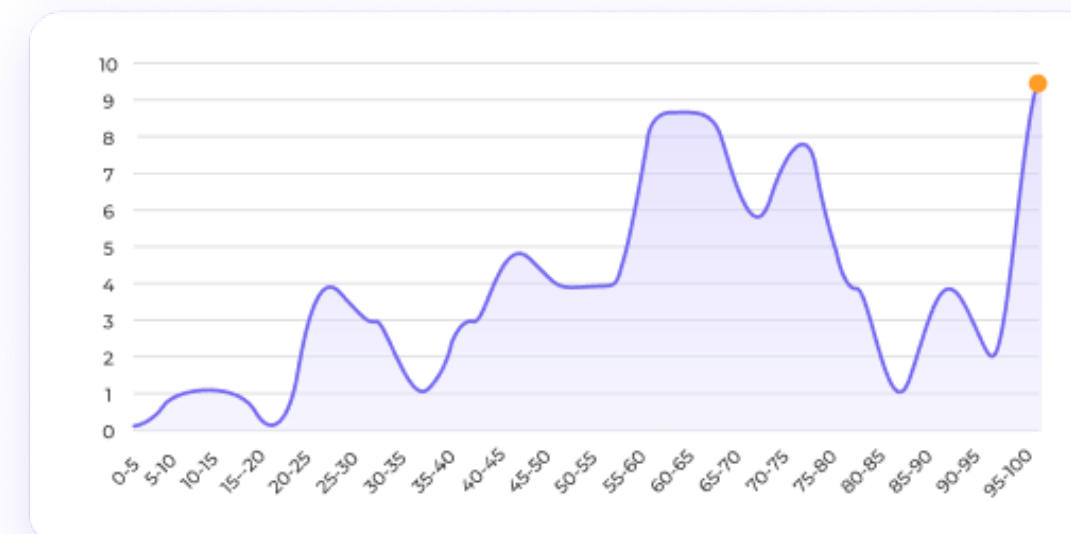

- until now.

Over **27 hours** of operational time is spent on data processing and diagnostics for every hire.

Gateway eliminates the manual effort of candidate sourcing, screening, and shortlisting.

The platform integrates human experts into AI workflows to advertise jobs, find and shortlist candidates, with insights and advisory services so employers make the right choices.

2. Applicant Tracking Software with AI screening tools.

3. Shortlisted candidates sent daily via email and WhatsApp

4. Integrated human expert to overlay insight and advise.

How does it work?

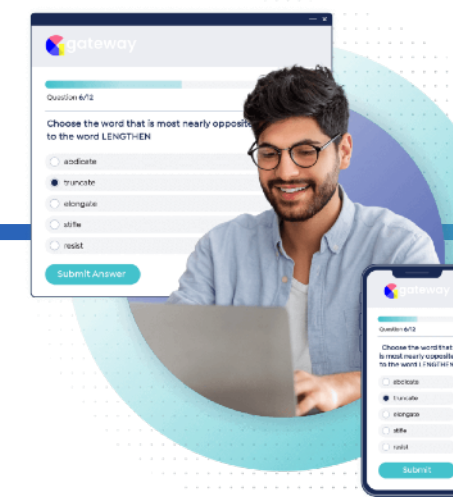

Client briefing with our
recruitment consultant

Gateway posts your job, runs
ads, and finds candidates
through targeted searches.

Candidates are screened and
scored in shared ATS

We send you daily emails with
shortlisted candidates and
expert human insights.

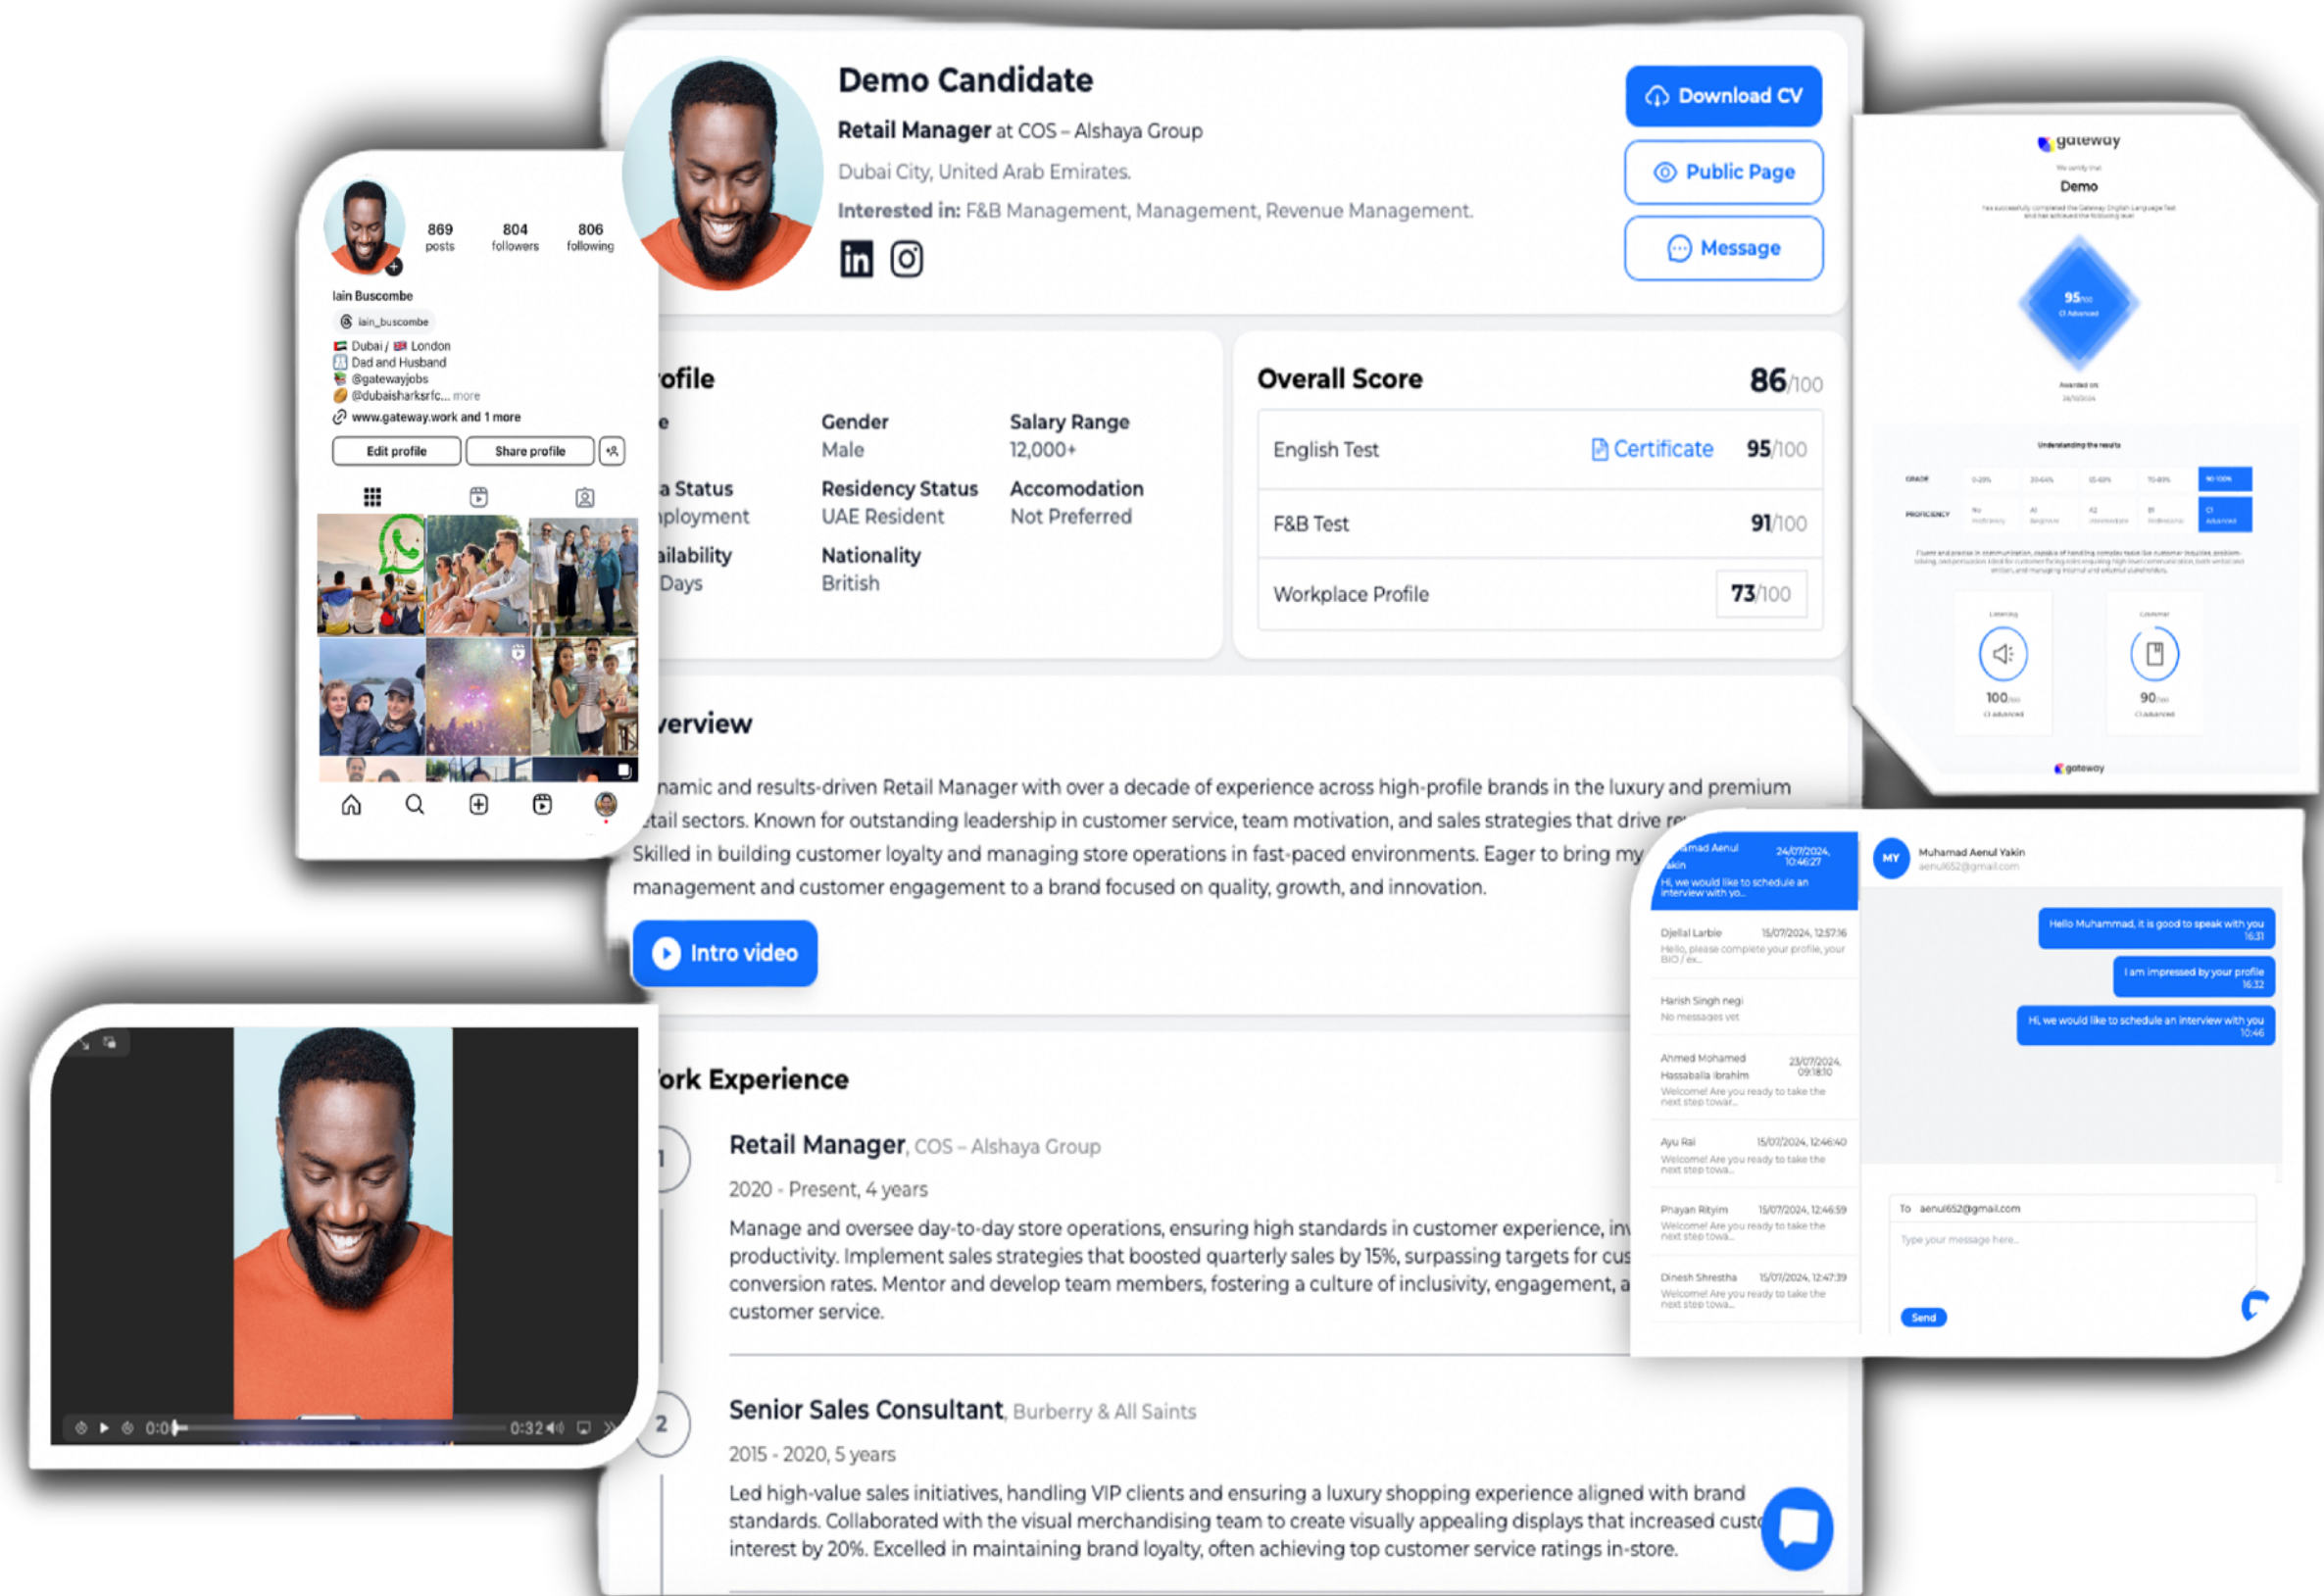

Candidate profiles

Far more than a resume.....

Every application gets converted into a smart, interactive online profile. Our screening process includes resume scoring, skills tests, psychometric evaluation and one-way video interviews.

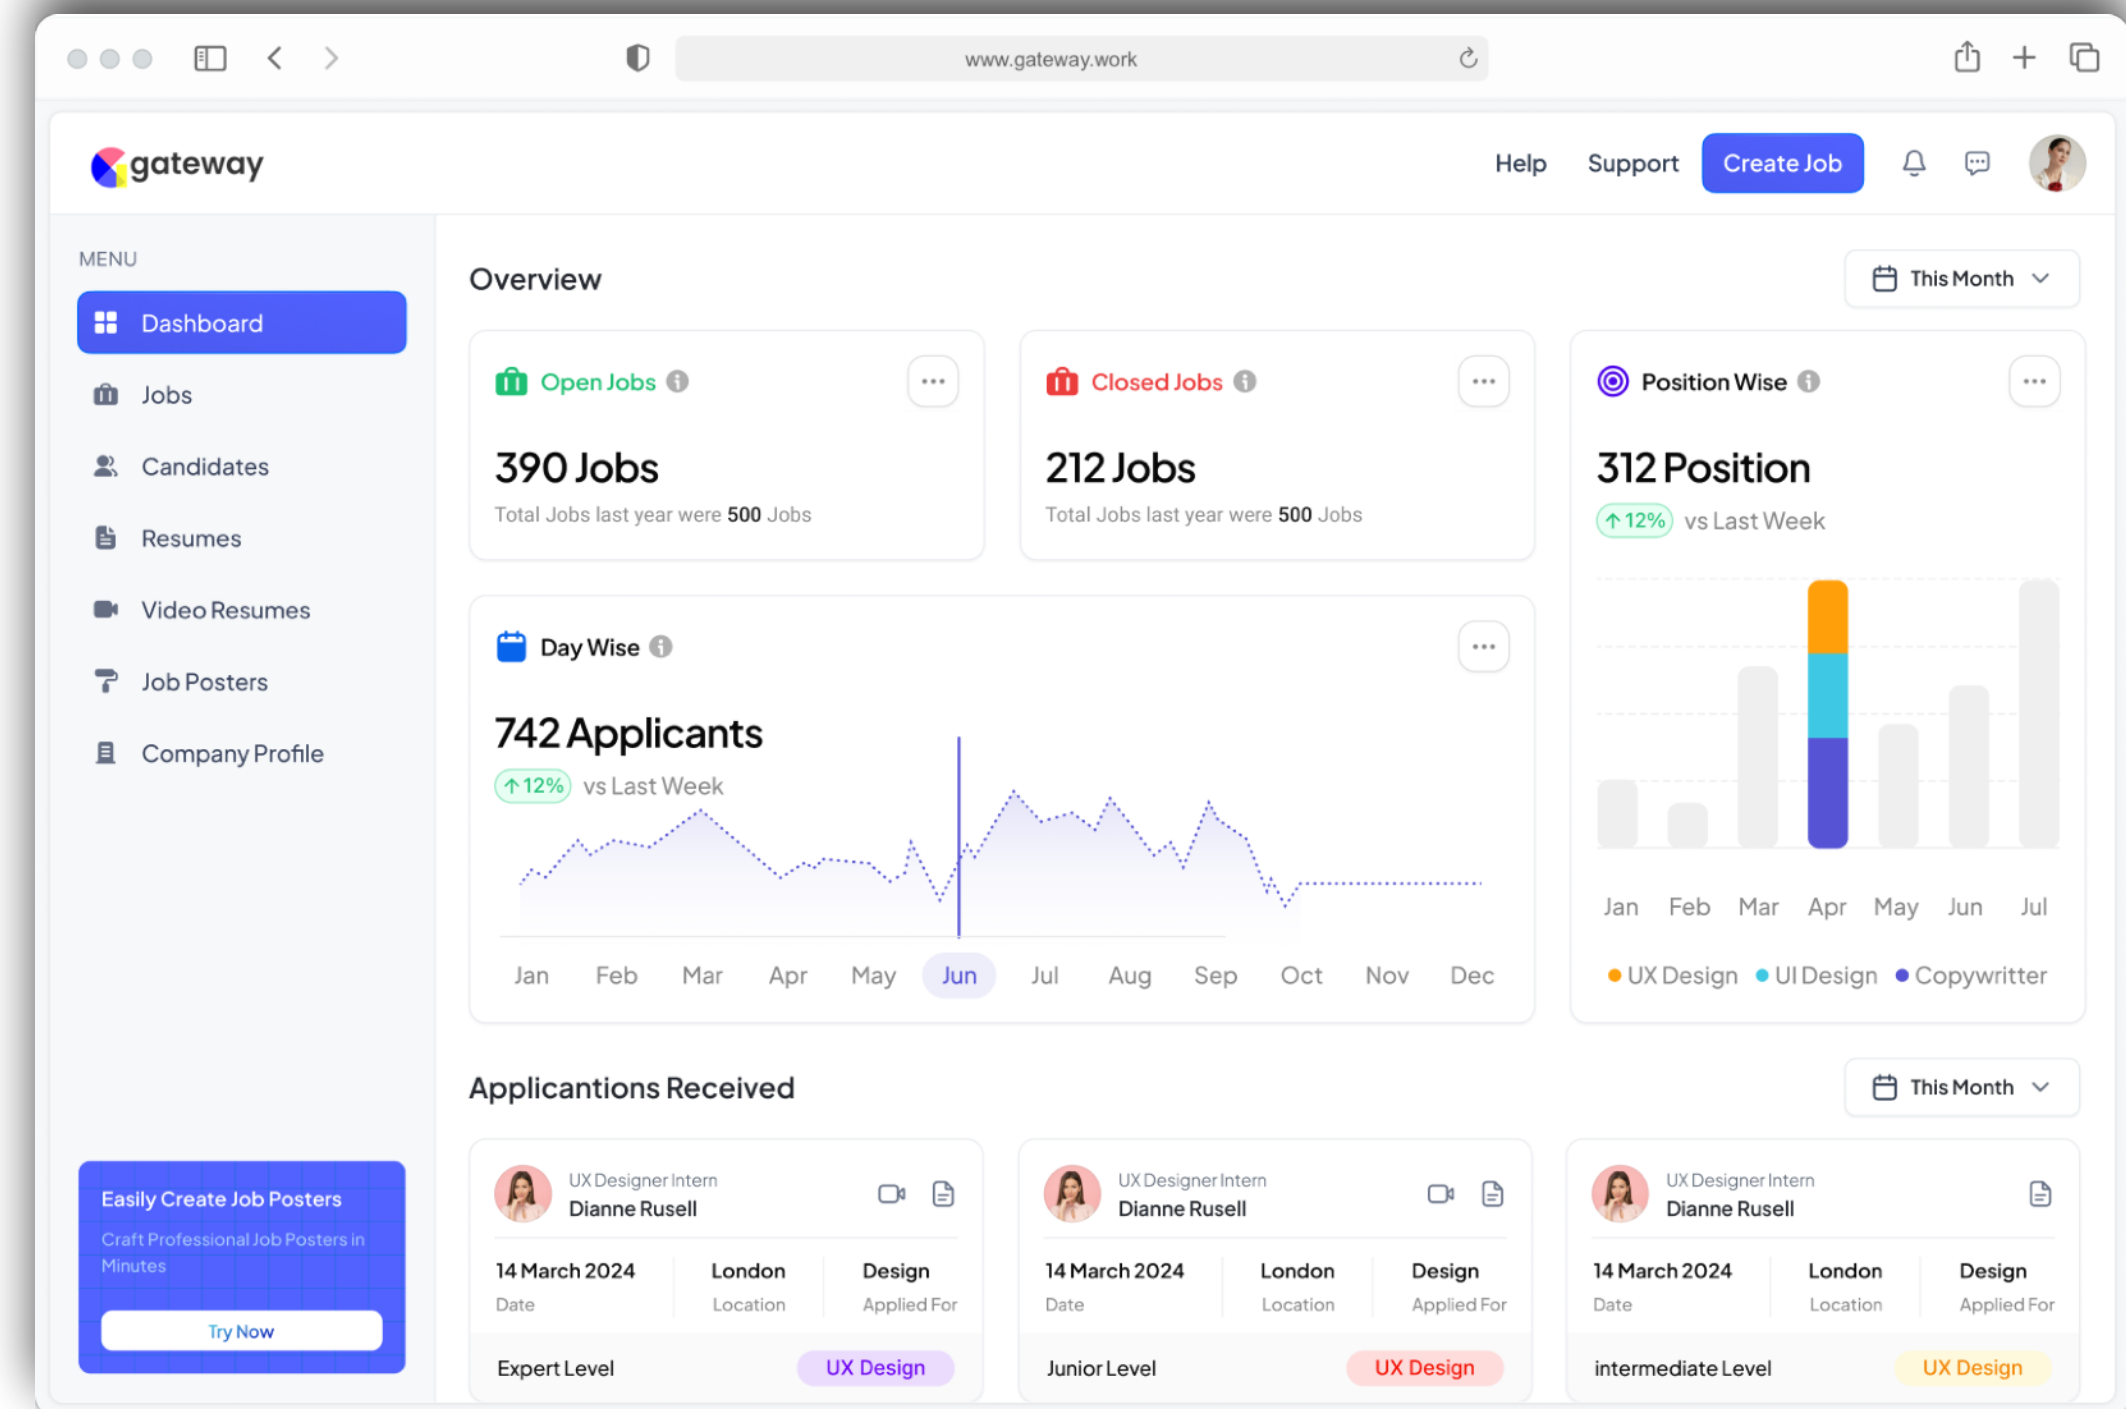

You can access any application, review their videos and tests and contact them directly through the platform.

Results, not just workflows

Third party recruitment, with the control of in-house team.

- Human experts to provide insights and advise on strategy.
- Applicant Tracking Software
- Custom Careers Page
- Job distribution and advertising
- CRM to build your private talent pool
- Real-time performance dashboard
- Fully managed recruitment [1 role per month]
- Full ownership of candidate data

Trusted across industries

We work best with companies 50–1,000 employees. Where HR teams are stretched, there's no industry expertise and resistance against paying high agency fees.
