Proven approaches to prevent problems associated with high-risk substance use

Media-rich Content

Images, animations, and videos maintain engagement

Interactive Sessions

Times for discussion, self-reflection, and activities

Customizable Delivery

Fit your time, location, and substances of concern; online courses with accountability features available

Proven Results

Over 40 years of research and real-world success

Whether used in a prevention setting or as a response to policy violations, Prime For Life programs engage students in preparing for a future of low-risk alcohol and drug choices.

"I would consider this year to be a success. We've had approx. 500 kids complete the course with only about 25 repeaters [of school policy violations]. 95% success is very good to me."

Program Administrator

"Thank you for the knowledge I have gained, this has helped me more than you could imagine and has drastically changed my perspective on high-risk choices."
