Your Business, Your Rules, Your ERP.

Transform how you work,
with ERP that feels like your own.

Solution Overview

Tangle

Finally an ERP that helps you succeed...

Tangle is a next-generation ERP system built for flexibility, automation, and clarity. Whether you're quoting jobs, managing materials, running production, or tracking profitability, Tangle adapts to your process, not the other way around. With built-in AI and real-time dashboards, it empowers teams to innovate, move faster, automate smarter, and scale confidently.

"Other Vendors could not match our needs - Tangle met 100% of our requirements"

Why Tangle Is Different

Unlike traditional systems that constrain you, Tangle gives you the freedom and familiarity of a spreadsheet, powered by enterprise-grade capabilities. Tangle enables you to grow and scale painlessly. As a business owner you can:
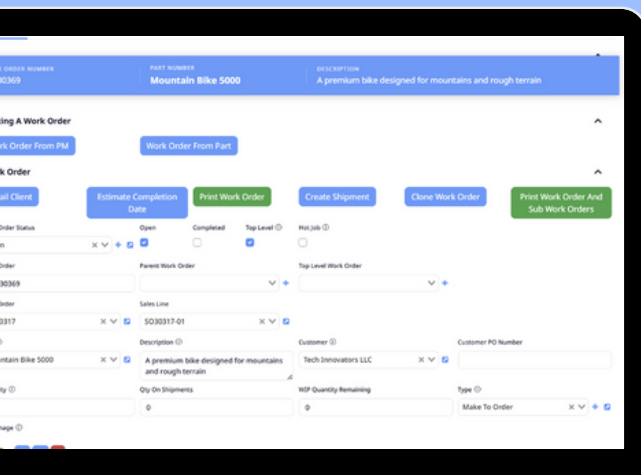

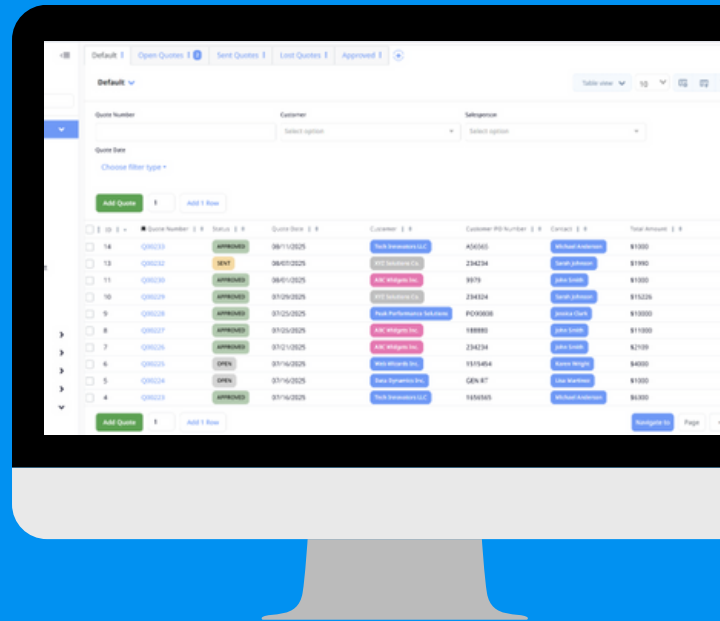

- Customize fields, formulas, and workflows
- Just describe your intent, and MILO your AI assistant translates it into action
- Adapt business logic without code changes
- Integrate easily with your data and tools

"Tangle isn't your typical ERP. It's punk rock - loud, fast, and unapologetically flexible. We built it for people who hate being boxed in, who want power without the bureaucracy. You run your business your way, Tangle just makes it ridiculously easy."

Wayne Bryne, CEO

Flexible Quoting System

- Supports multiple quoting styles: simple markup, time & materials, templated options
- Drag-and-drop UI and real-time performance
- Visual quote templates editable directly in Word.

End to End Order Management

- Turn quotes into sales orders and work orders with one click
- Custom production methods, BOMs, and work order nesting
- Comprehensive shop floor interface with live time tracking and QC capture

*"Tangle helped us reduce our time to quote by over 90%"*

Real Time Inventory Management

- Track by lot, location, and transaction history
- Auto-calculated demand, availability, and shortages
- Supports traceability and QR code tagging

Track by lot, location accounts, and history

Auto-calculated demand availability, sality and shortages

Supports tracialibility and QR ode tagging

Integrated Purchasing Workflow

- Bulk generate POs from demand
- Spreadsheet upload, Excel-like editing, and vendor assignment
- Inventory receipt and traceability

## Intelligent Scheduling & Capacity Planning

- Visual 'kanban' boards for job scheduling
- Auto-scheduling using GPT logic
- Capacity-aware forecasting, alerts for late jobs

"Tangle is able to bend every which way and that's been the best aspect of working with this software - the potential to create virtually everything we need."
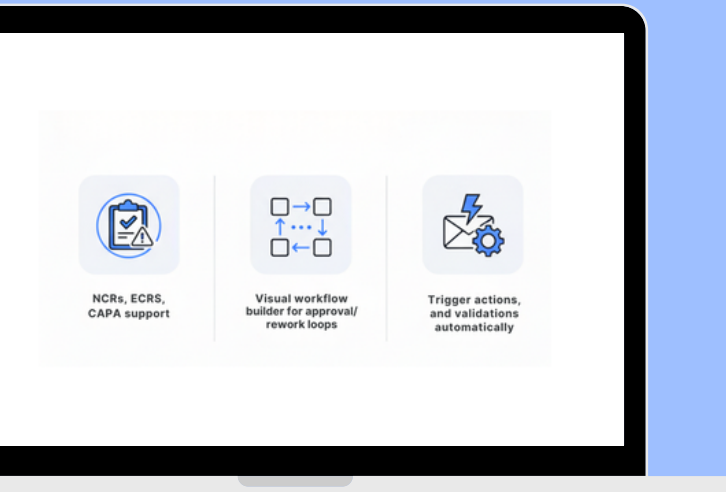

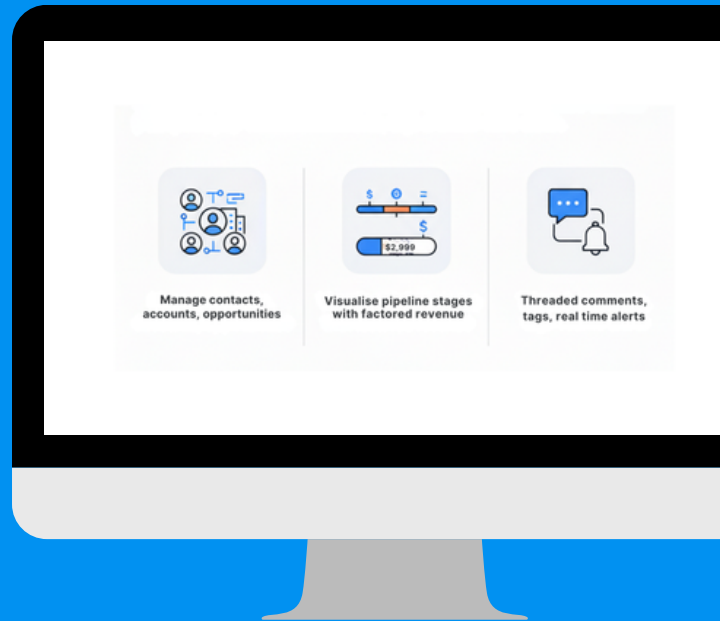

AI-Powered Reporting & Forecasting

- Auto-generate dashboards with natural language AI assistant
- Create forecasts and plan materials by quarter, month, week
- Customise any logic via embedded code
- Cost tracking

CRM and Sales Management

- Manage contacts, accounts, opportunities
- Visualise pipeline stages with factored revenue (Hubspot-style)
- Threaded comments, tags and real-time alerts

Quality Control & Workflow Automation

- NCRs, ECRs, CAPA support
- Visual workflow builder for approval/rework loops
- Trigger actions, emails, and validations automatically

"Using Tangle we have reducing our production costs by 30%"

Engineer-to-Order (ETO) Ready

- Quote, plan, and build custom jobs with flexible multi-level BOMs, Operations and Materials
- Automate work order creation from dynamic estimates
- Track materials, revisions, and customer-specific configurations
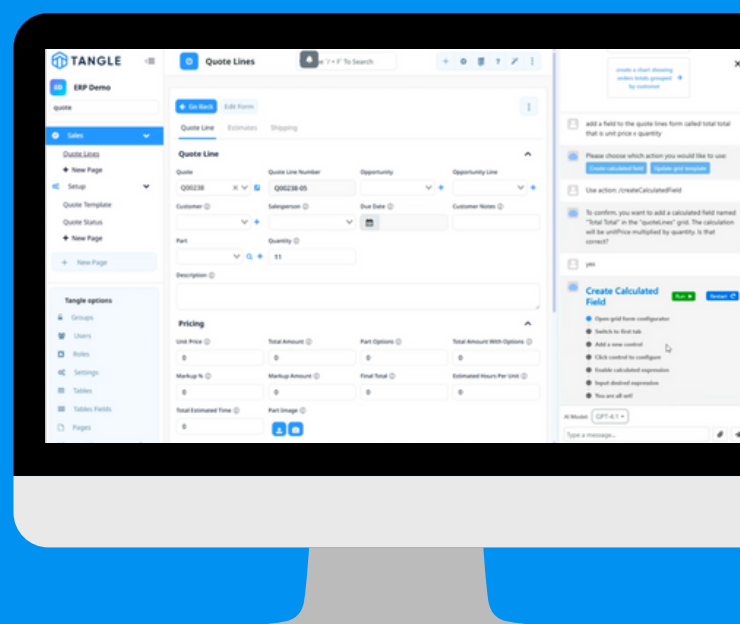

Deep Integration Capabilities

- Native QuickBooks integration (OOB)
- Connect with Shopify, HubSpot, ShipStation, Stripe, Amazon
- Custom API/webhook and Zapier support

Built-in Intelligence

Tangle MILO AI assistant leverages GPT and embedded logic to:
- Auto-assign operations
- Generate code for dashboards and integrations
- Guide users through data configuration

"We had a need to exit an unsuitable ERP system that was forcing us to change our way of doing business. Tangle enabled us to quickly and easily customize a system to fit our needs. Great support and onboarding."

Migrations Made Easy

Whether switching from spreadsheets or a legacy ERP (JobBoss, NetSuite, etc.), Tangle accelerates onboarding:
- No-code data importers
- Legacy logic and data mapping
- Clean handoffs and training workflows
