What I bring

13+ years of international experience in operations, supply chain and process improvement. Focus: Data-driven decision making, scalable processes, cost reduction and transparency — all with an unconventional mindset. Proven results in multinational, start-up and SME environments.

Strengths

- Process design, development and automation
- Analytics based operations and efficiency improvement
- Digital system implementation
- Operational efficiency enhancement

Achievements

- +8% margin growth (New procurement structure)
- +0.9% profit increase (Automation of communication related admin tasks)
- -12% production cost (Relocation of production internationally)
- -21% operational cost (New warehouses and workflows)

Languages

- Hungarian: Native
- English (UK): Business Proficient
- German: Advanced conversational
- Danish: Basic Conversational

Tools and Technologies

- Cloud based an on-premise ERP, CMS and WMS systems (e.g. Salesforce, SAP, Xero)
- Automation platforms (e.g. N8N, Make, Zapier)
- Operating systems (e.g. iOS, Microsoft)
