

Fire Safety Product of the Year

This category recognises a specific fire safety product that demonstrates outstanding innovation, performance, and real-world impact in improving fire safety outcomes in Ireland. Products may include passive or active fire protection solutions, detection devices, suppression equipment, emergency systems, or integrated fire safety components.

Entries should be for a clearly defined product that has been actively used, specified, or deployed within the past 2–3 years.

****Below are some tips to include in your application, not a strict list of points that have to be answered***

Product Overview

- *Product name and description*
- *Manufacturer/supplier and their role in development*
- *Core purpose and function of the product*
- *Fire safety problem the product is designed to solve*

Innovation & Design Excellence

- *What makes the product innovative compared to existing solutions*
- *Key design features and technical advancements*
- *Use of new materials, engineering methods, or technologies*
- *Improvements over previous versions or competing products*
- *Evidence of research and development (R&D) input*

Fire Safety Performance & Effectiveness

- *How the product improves fire safety outcomes*
- *Performance in real-world conditions*
- *Reliability, durability, and consistency of operation*
- *Evidence of testing results or performance validation*

Compliance, Certification & Standards

- *Compliance with relevant Irish and European standards*

Ease of Installation & Integration

- *Practicality of installation or implementation*

Safety Impact & Measurable Outcomes

- *Demonstrable improvements in fire safety performance*

Supporting Evidence (Required)

Applicants should include:

- *Product technical datasheets and specifications*
- *Case studies from Irish installations*
- *Performance testing results*
- *Photographic evidence of product use*
- *Testimonials from clients, engineers, or installers*
